Want to **create a basic virtual tour** on your WordPress site quickly and easily? With **WP VR** – the leading free 360° panorama and virtual tour builder plugin – you can turn a single 360-degree panoramic image into an immersive experience in just minutes. Perfect for real estate listings, hotel showcases, business locations, or any site needing interactive 360 views.

WP VR by RexTheme is beginner-friendly, mobile-responsive, and SEO-optimized, helping boost engagement and reduce bounce rates on your WordPress pages.

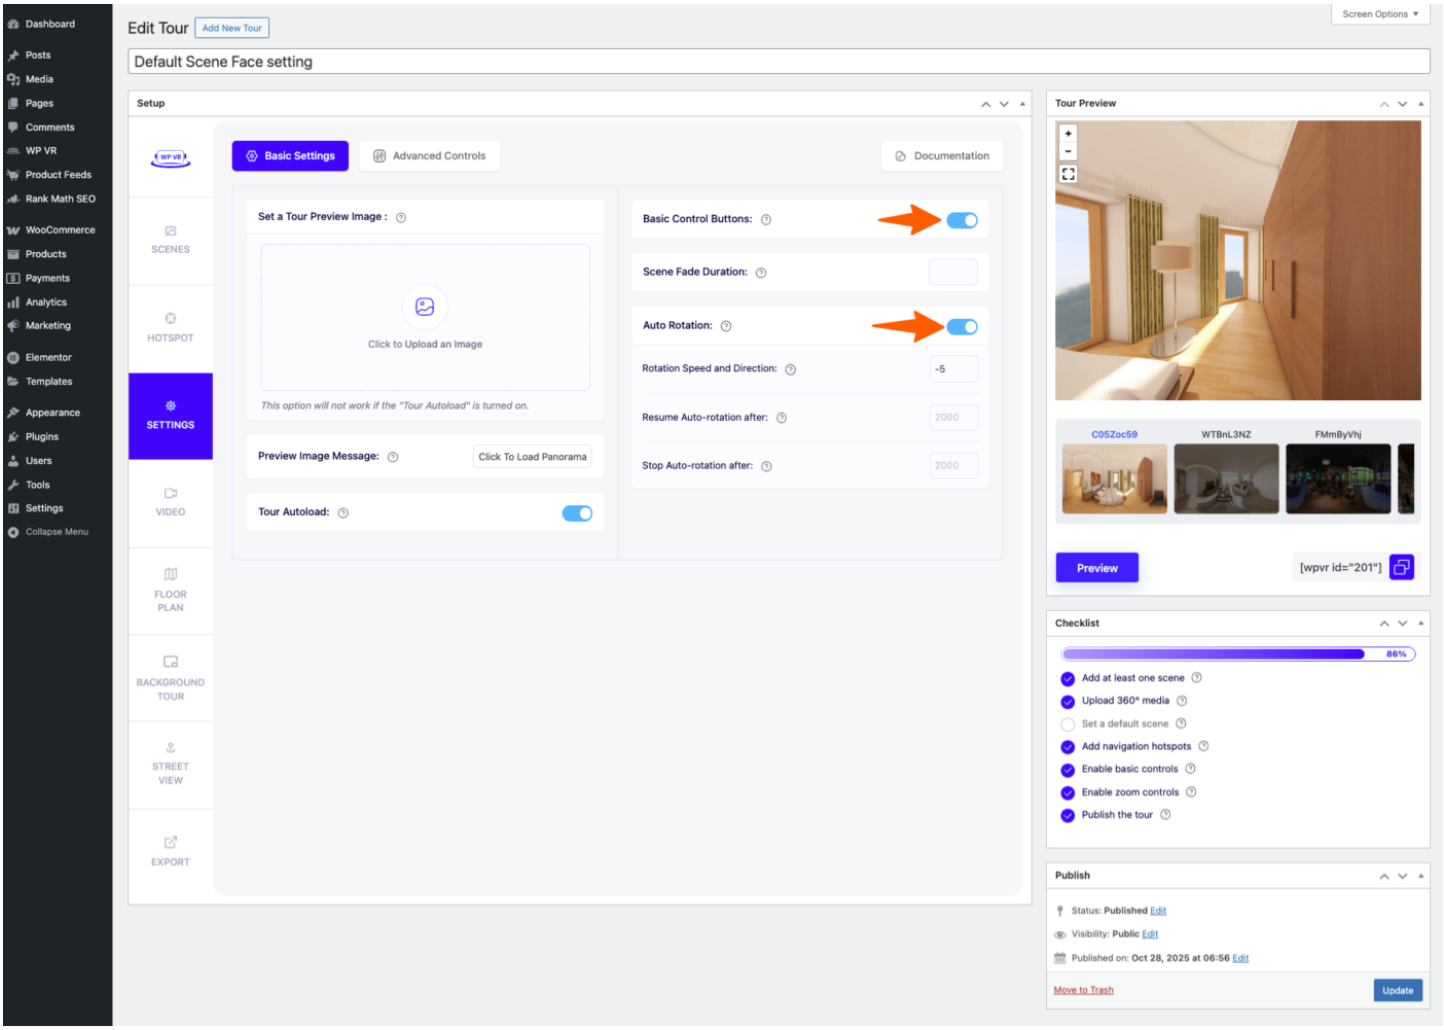

Why Create a Basic Virtual Tour with WP VR?

- **No Coding Needed:** Upload one 360 panorama photo and go live.
- **Free & Powerful:** Basic tours are fully functional in the free version.
- **Mobile-Friendly:** Responsive design for phones and desktops.
- **SEO Benefits:** Interactive content increases dwell time and user signals for better rankings.
- **Quick Setup:** Ideal for beginners creating their first 360 virtual tour in WordPress.

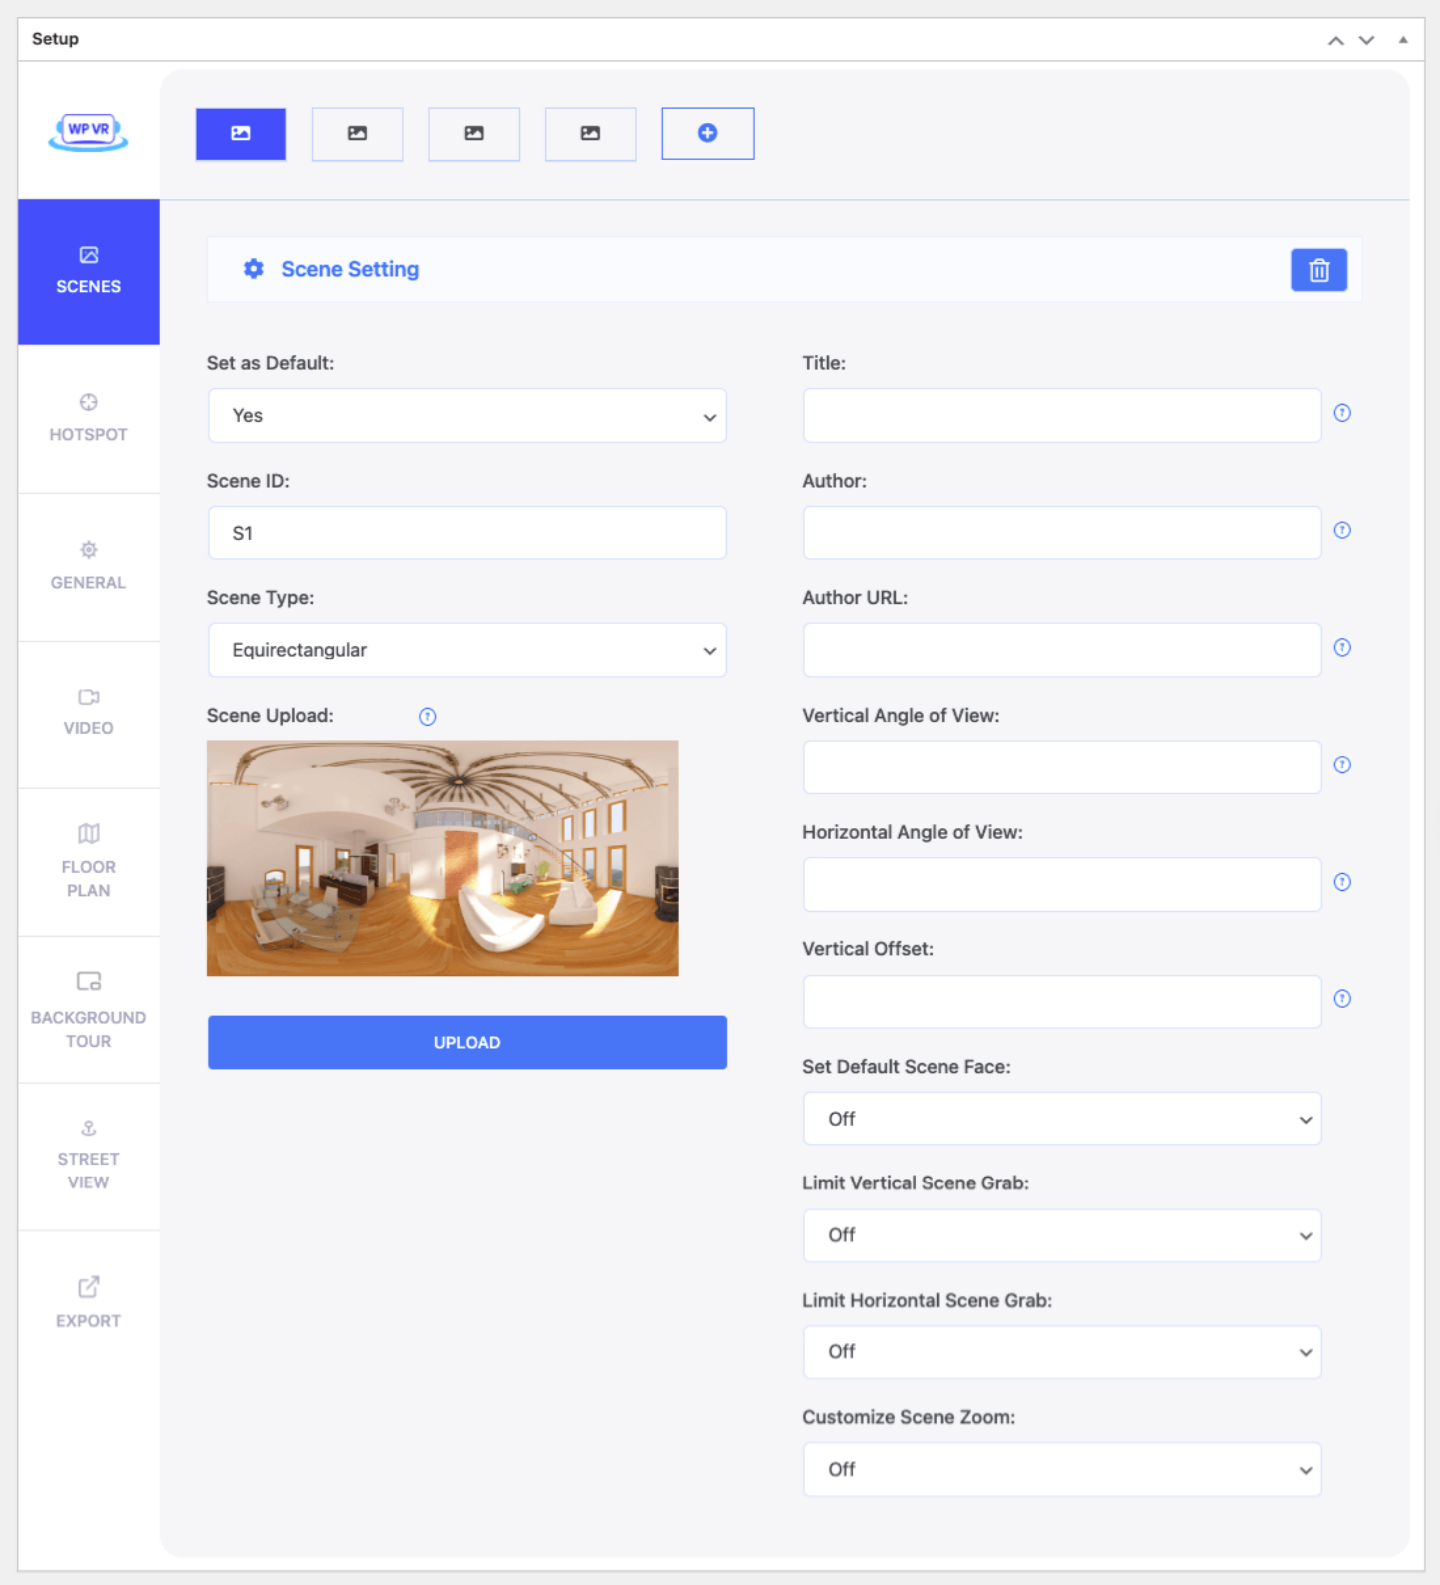

Features Used

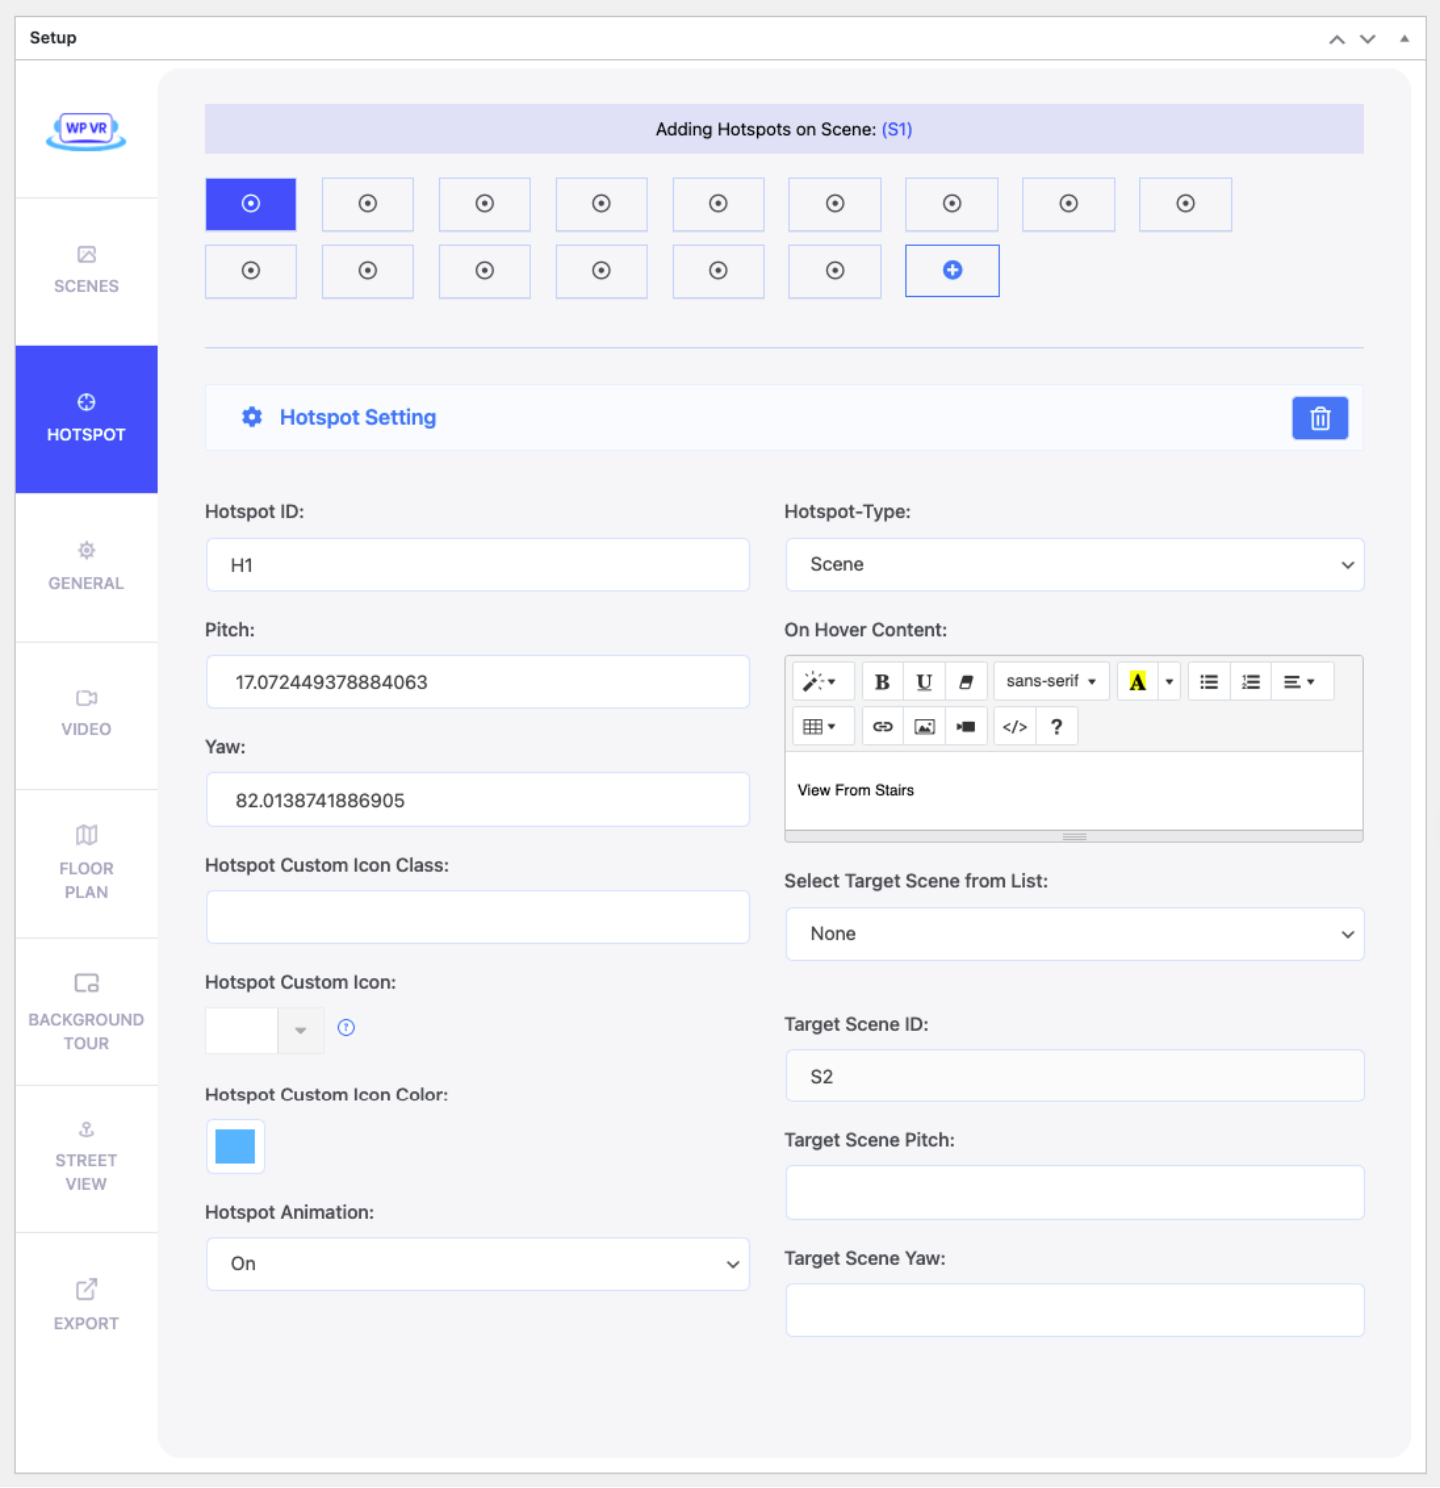

- **Tour Auto Rotation**
- **Show Controls**
- **Scene Title and Author Information**
- **Custom Hotspot Icon**
- **Hotspot Animation**

General Settings

Scenes & Hotspots

Shortcode used

Each scene is connected with scene type of hotspot. The Hotspot icon and color are selected from the hotspot tab. No info-type hotspot is used in this tour. Hotspot animation is turned on to show blink animation.

```
[wpvr id = "00000" width = "10%" height = "400px" radius = "0px" ]
```

That's it, please check the demo tour above to see the front view of this setting. Thank you.
