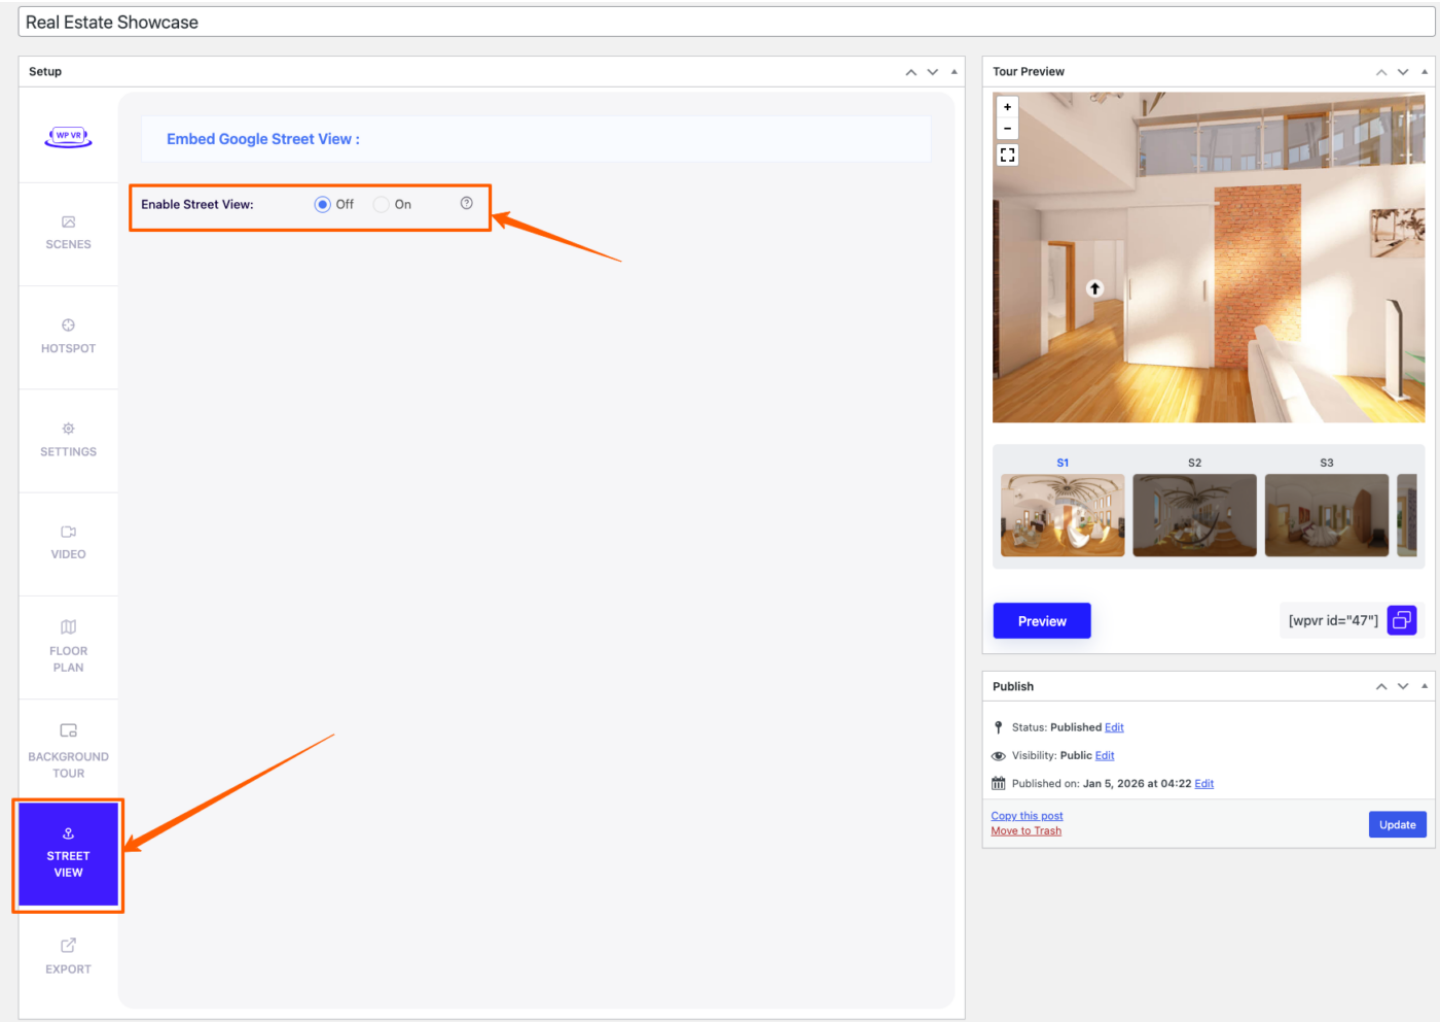
This is a **Google Street View** that was tour created using **WPVR Pro**.

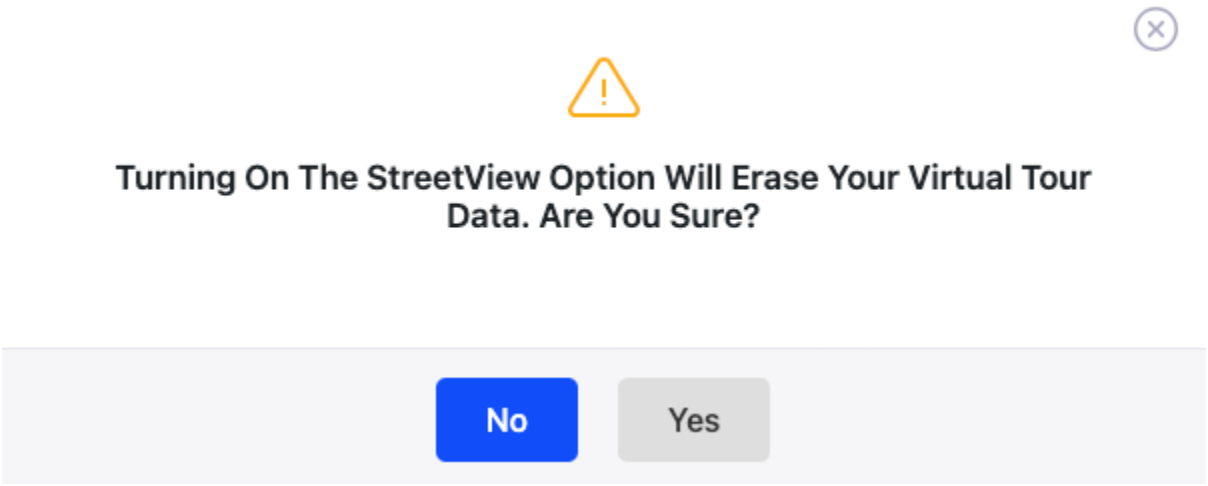
## Embedding Google Street View:

Here are the steps for embedding Street Views on your WordPress site:

- Go to **Setup**, then **Embed Google Street View**.
- Choose **On** for the **Enable Street View** option.

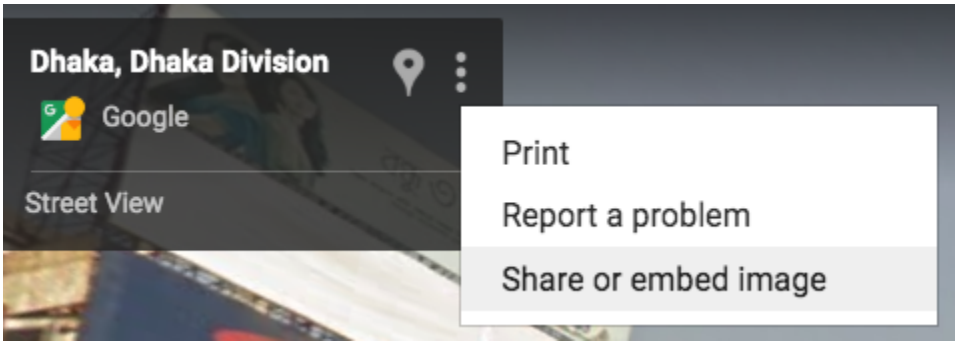


- After enabling it, there will be a warning

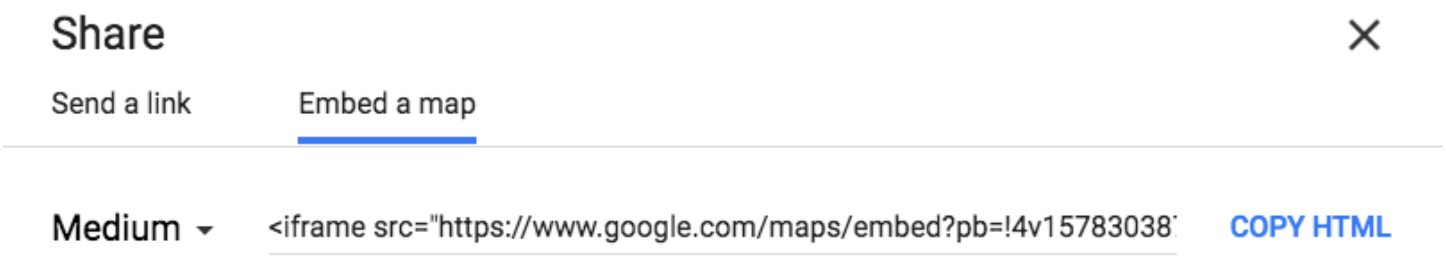


- Click **Yes** to continue.
- Go to the **Street view**, and click on the arrow pointing option.

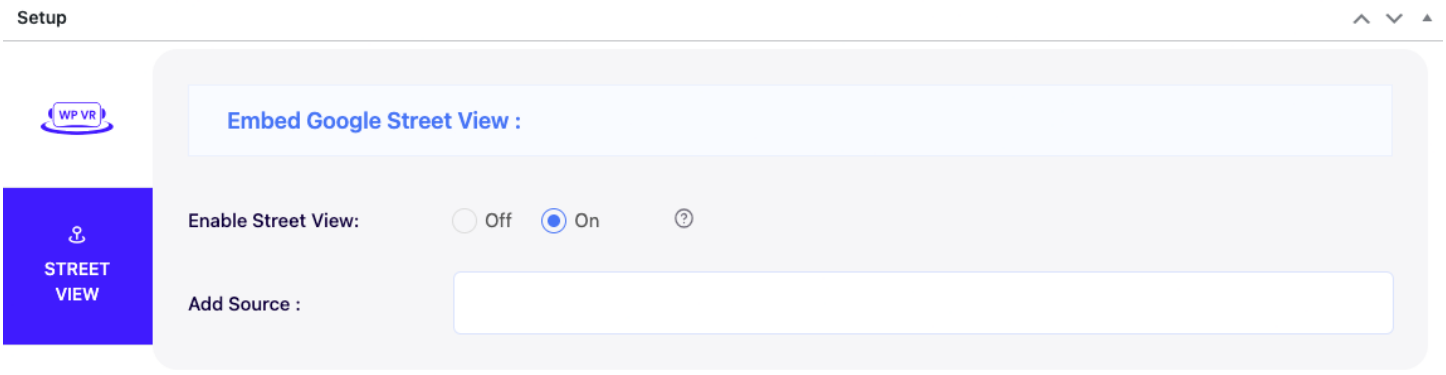
- Choose **Share or embed image** option.



- Click on **Embed a map**.
- Click on **Copy HTML**.



- On the **Add Source** field, paste the copied HTML and only keep the web address of the Street View.



Then you can simply preview and publish the street view.

Follow this documentation to learn more about embedding street views on your WordPress website.

For information about the Street View tool, view details here.
