If you are new to **Dynamic Discounts for WooCommerce**, the first thing to do is to learn to create a Discount Rule for your WooCommerce store.

Here, you will learn how to create a discount rule to understand how it works.

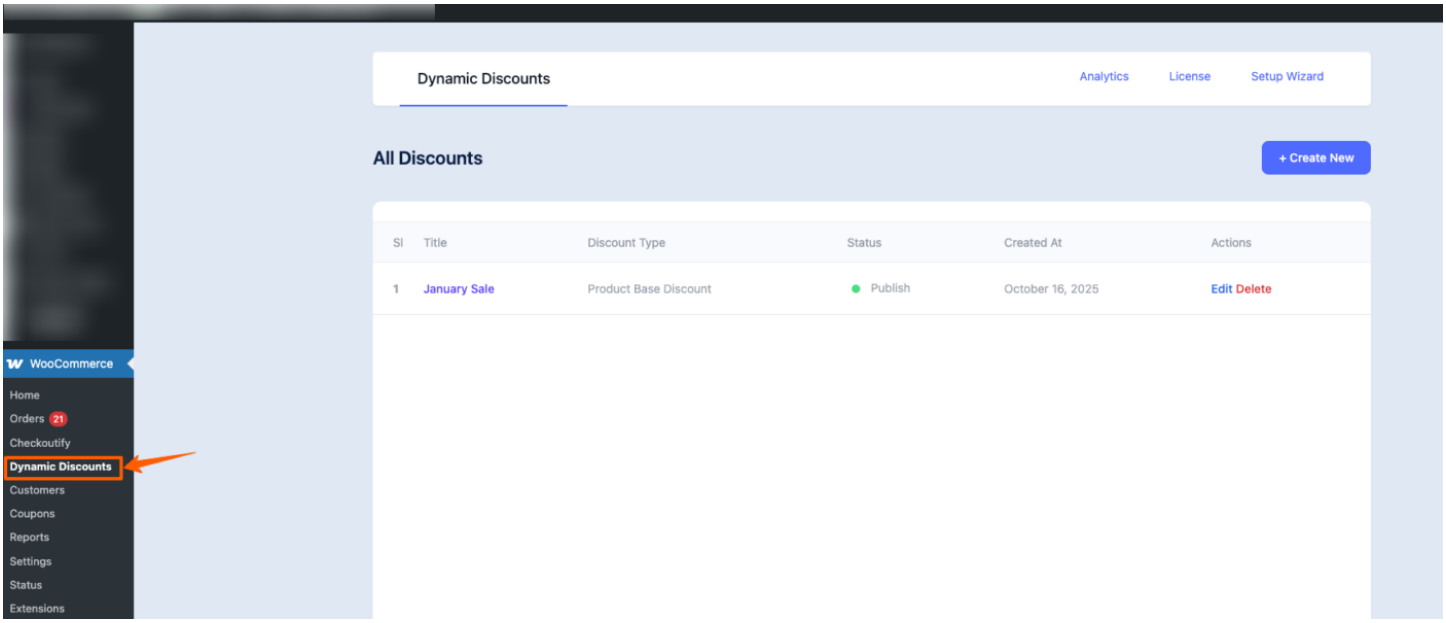
In the Plugin Overview documentation, you will get instructions on using all the other exclusive features.

So let’s take the first step.

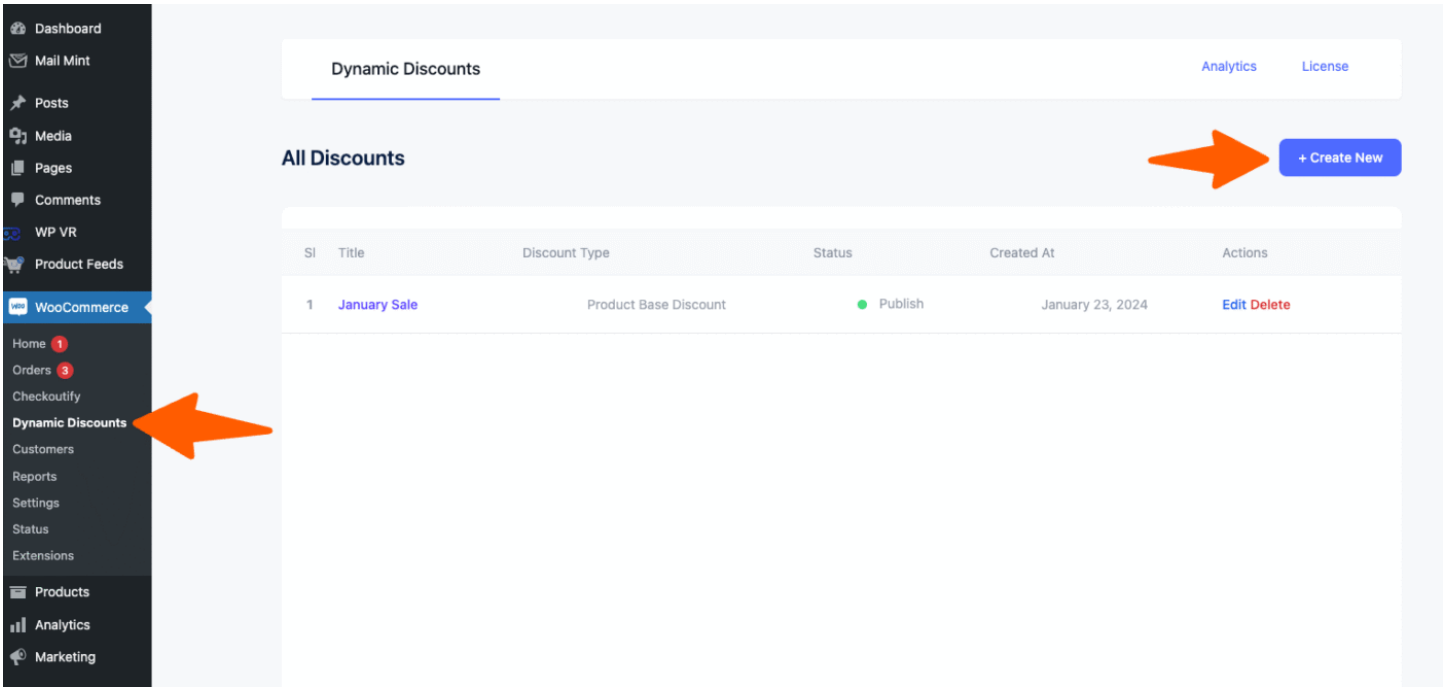
Learn to Create a Discount Rule for WooCommerce Store

Before starting, make sure your license is activated.
Then follow these steps below to create your first Discount rule.

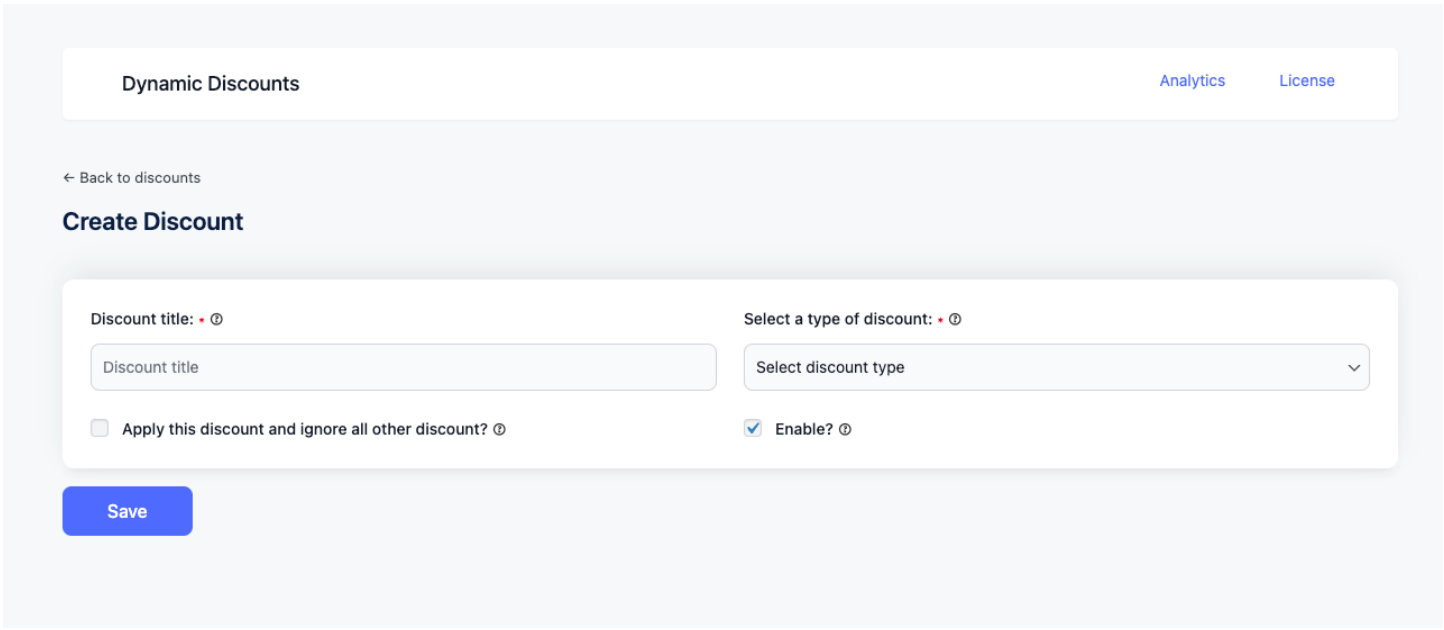
1. Hover on **WooCommerce dashboard** > **Dynamic Discounts**



2. As you can see, it will take you to the page where you can create a discount rule. On top, you will see a Button **+ Create New.**



3. Press it to take you to the Create Discount Page.



4. In the **Discount title**, give a title for the discount.

5. From the Discount Type dropdown Select your preferred type.

Currently there are 11 Discount Types in **Dynamic Discounts for WooCommerce**

- Product Based Discount

- Cart Based Discount

- Bulk Product Discount

- Stock Based Discount

- Bundle (Set) Discount

- Buy X Get X Discount

- Buy X Get Y Discount

- Apply Discount to Nth Quantity

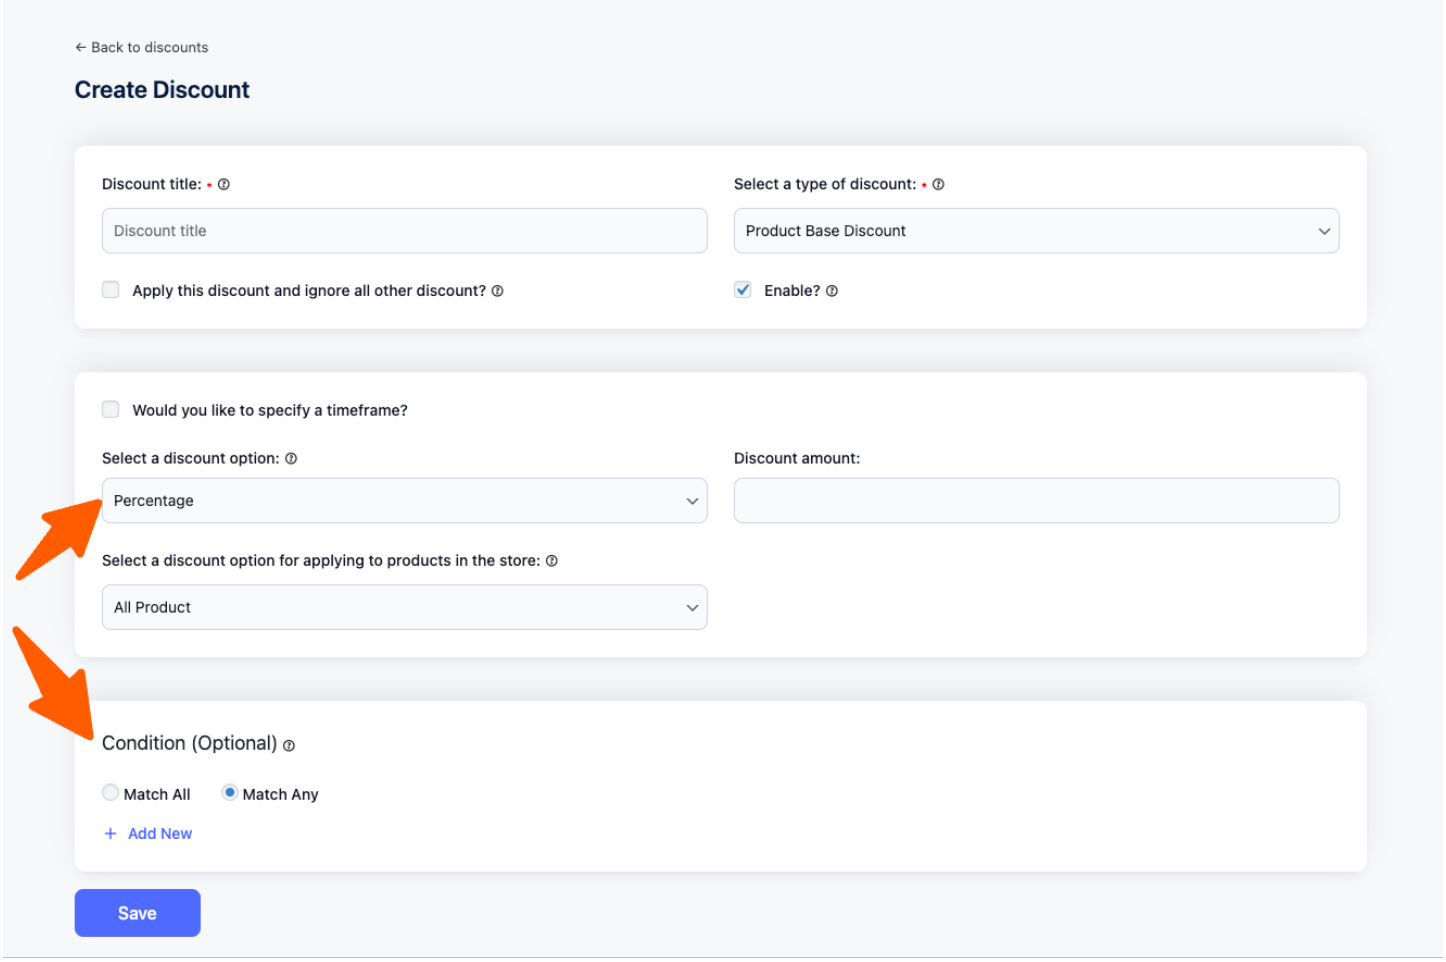
- Cheapest Product on Cart

- Offer One or More Free Products

- Attribute Specific Discount

We will elaborately discuss the Discount Types in our other documents

After selecting your preferred Discount Type, new sections will be added below.

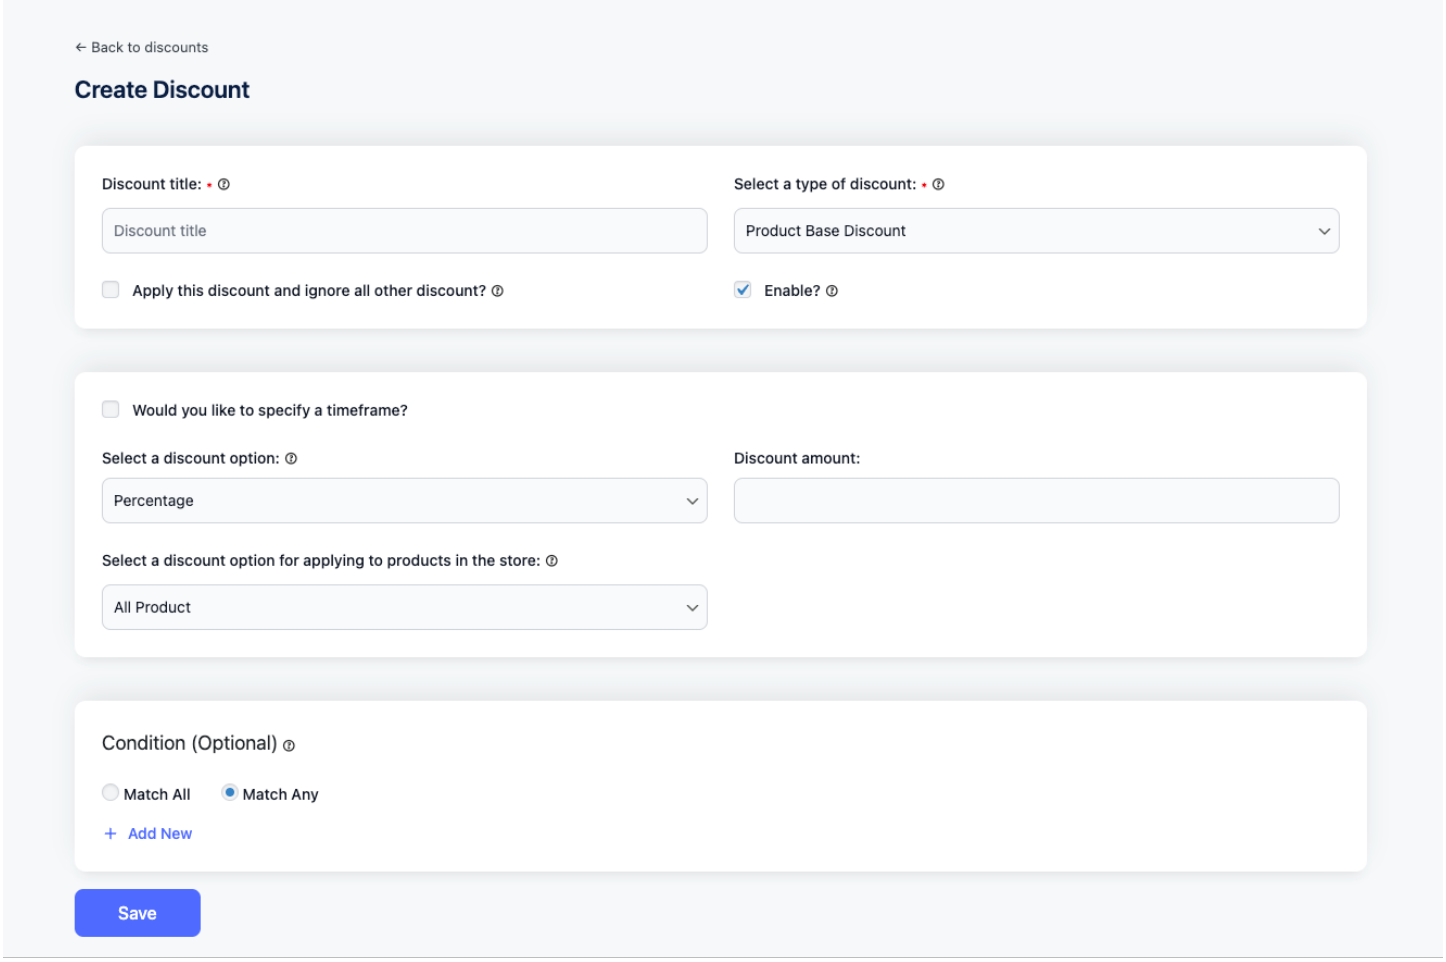


6. Now select a discount option from the dropdown, a discount amount, and Select a discount option for applying to products in the store from the dropdown.

There are two types of Discount Options:

- **Percentage:** Apply percentage discount to the product price
- **Fixed:** Apply a fixed discount to the product price

For this guide let's select the discount option as **Percentage**, Discount amount **10%**, and apply to **All products**.



7. Now click on the **Save** button.

That's it Discount Rule is created.

Now that you are familiar with how the **Dynamic Discounts for WooCommerce** plugin works, in the upcoming documentation you'll learn about more useful features.
