How To Publish A Virtual Tour Using WPVR Panorama Module for Divi

WP VR Plugin Integrations · https://rextheme.com/docs/publish-virtual-tour-using-wpvr-module-for-divi/

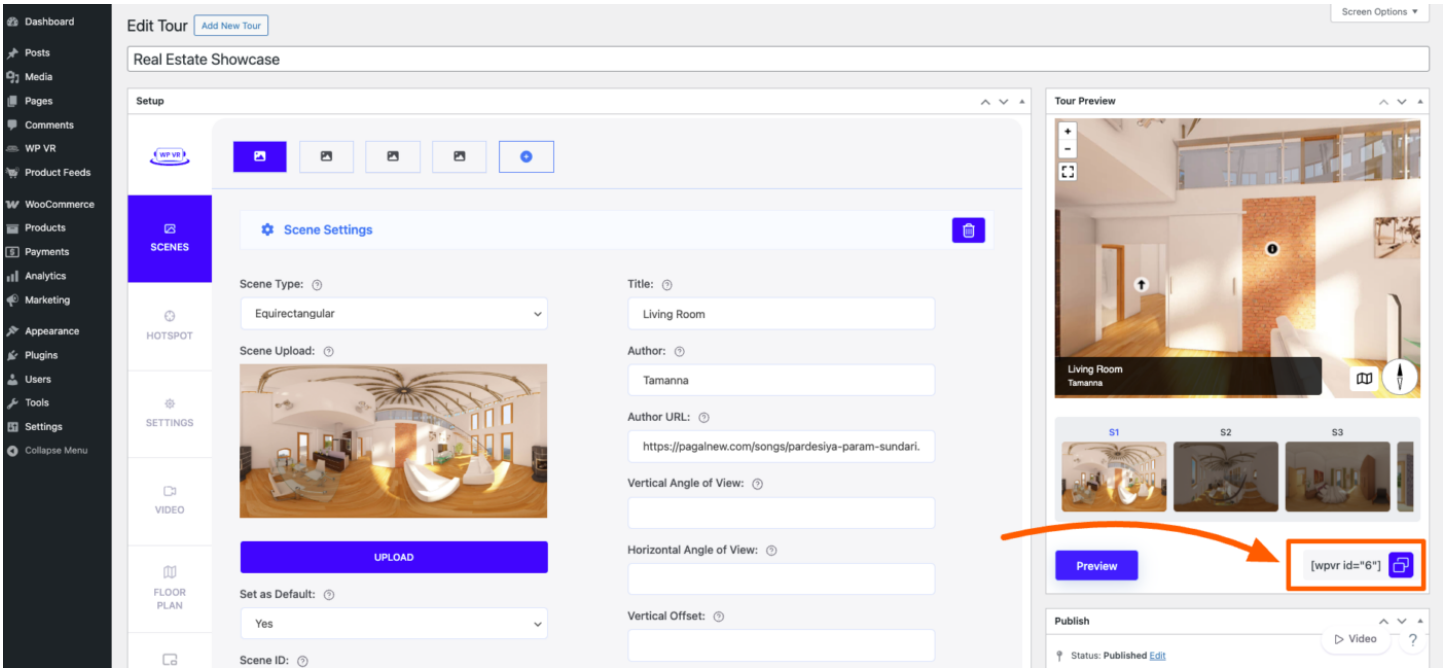

If you're a **Divi Theme** user, you can easily publish virtual tours and panorama images on your website using the WPVR Panorama Module for Divi.

Let's have a look at how you can do it.

Publish A Virtual Tour Using WPVR Panorama Module for Divi

Follow these simple steps:

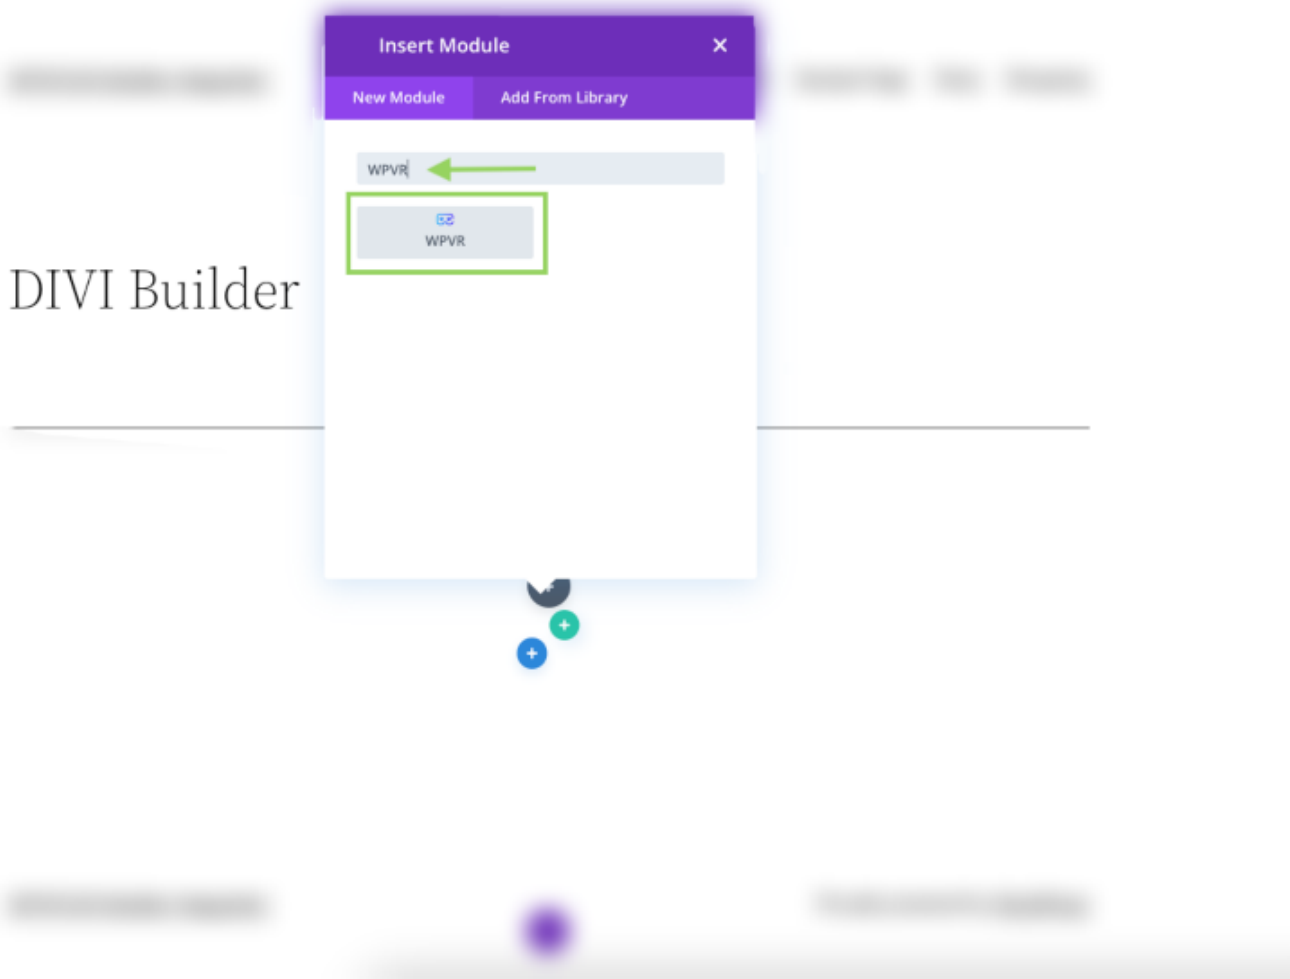

Step 1: Create tour virtual tour using **WP VR** and publish it. After that, copy the **shortcode** for that tour.

Step 2: Go to the page where you want to publish your virtual tour.

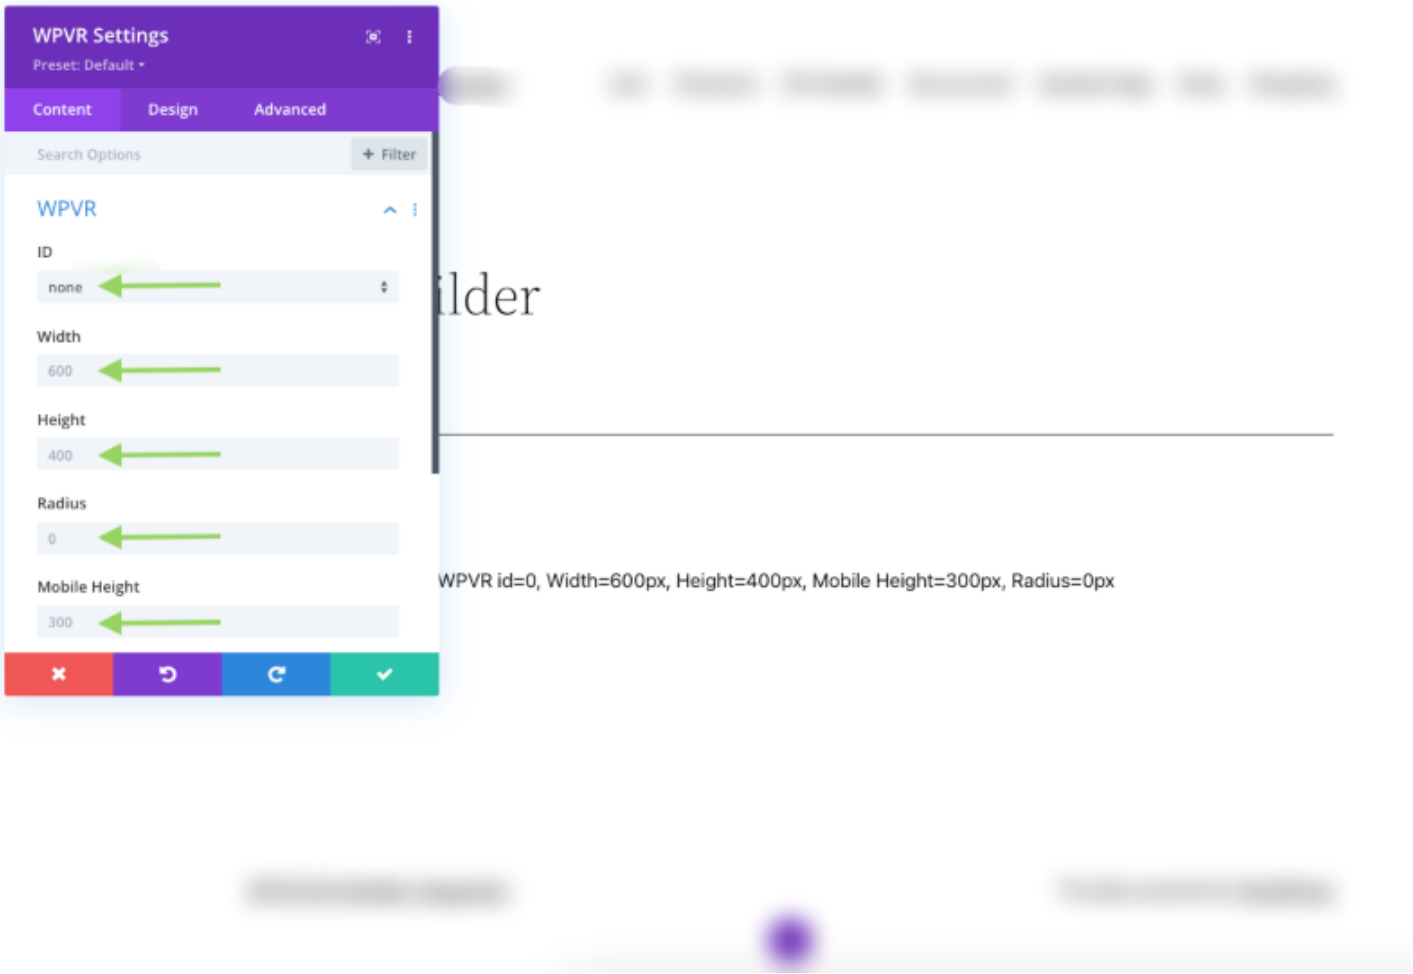

In the Module section, search for **WPVR** and you'll find a module dedicated to your virtual tours.

Select it.

Step 3: Once you select this module, it'll show you five options:

- **ID**,
- **Width**,
- **Height**,
- **Radius** and,
- **Mobile Height**.

ID:

Here, you have to place the ID of the tour that you want to embed into the page.

You'll be able to select the Tour ID from the Drop Down Menu.

Width:

Assign a positive pixel value to fit the width of the page. Example: 1200 px.

Or, Specify a percentage. Example: 90%.

Enter the text "100vw" if you want the tour to fill the entire page's width.

Height:

Only use a positive pixel value. Example: 600px.

Don't use any percentage.

Radius:

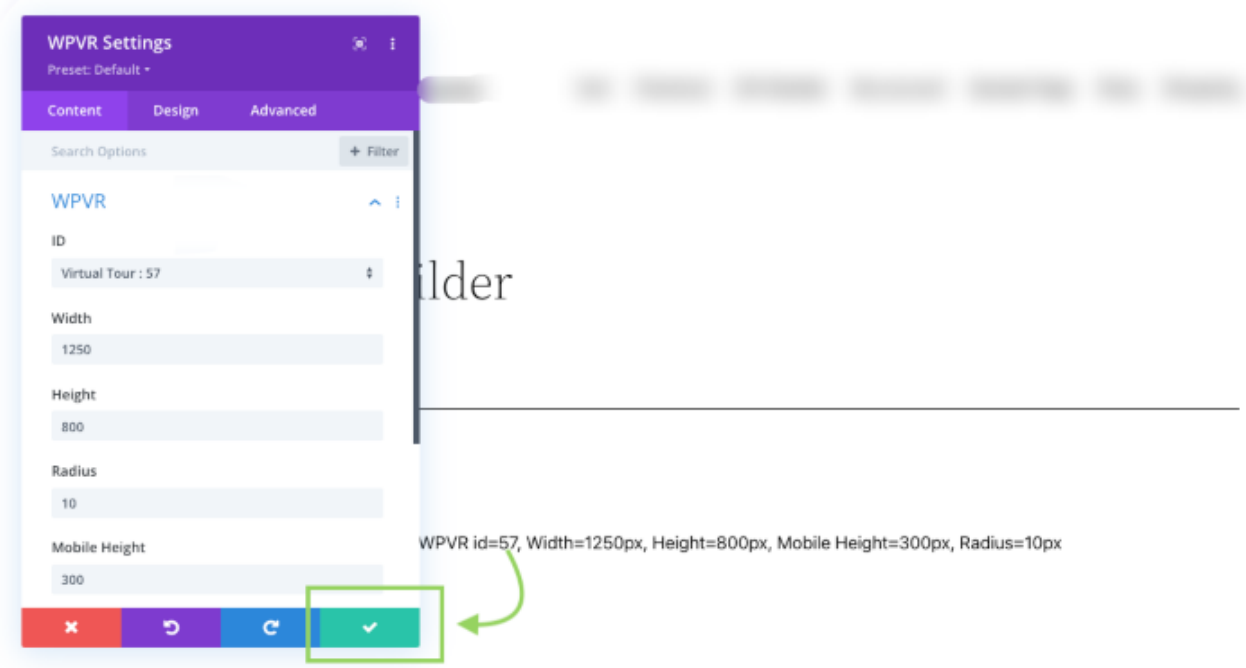

Give each pixel in the radius a positive numerical value. Example: 10px

Or, Use a percentage. Example: 10%.

Mobile Height:

The height is by default set to 300px.

But if you want to add a custom height for mobile devices, you can change it.

Once you've added all the necessary data on the field, preview to see how the tour looks, and then publish it on your website.

And that's it, you can now publish more virtual tours using this Divi Panorama Module.
