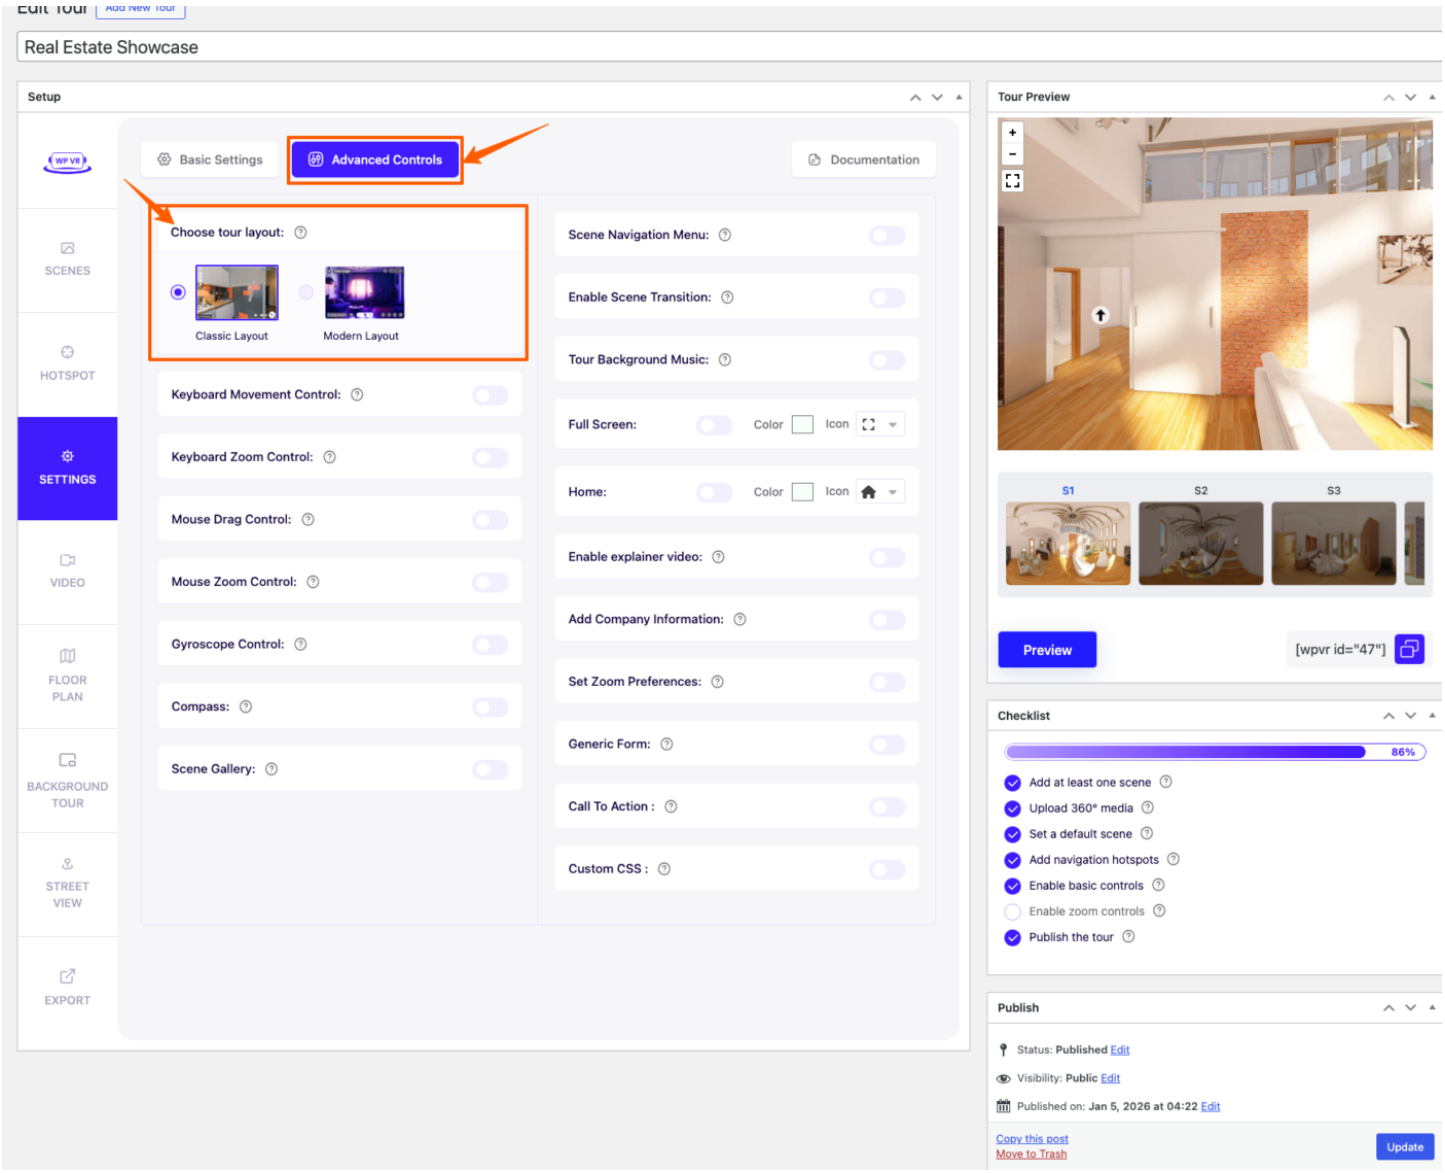
# How to Customize the Tour Layout

You can now choose between two styles for your tour: the **Classic** look or the new **Modern** look introduced in the latest version.

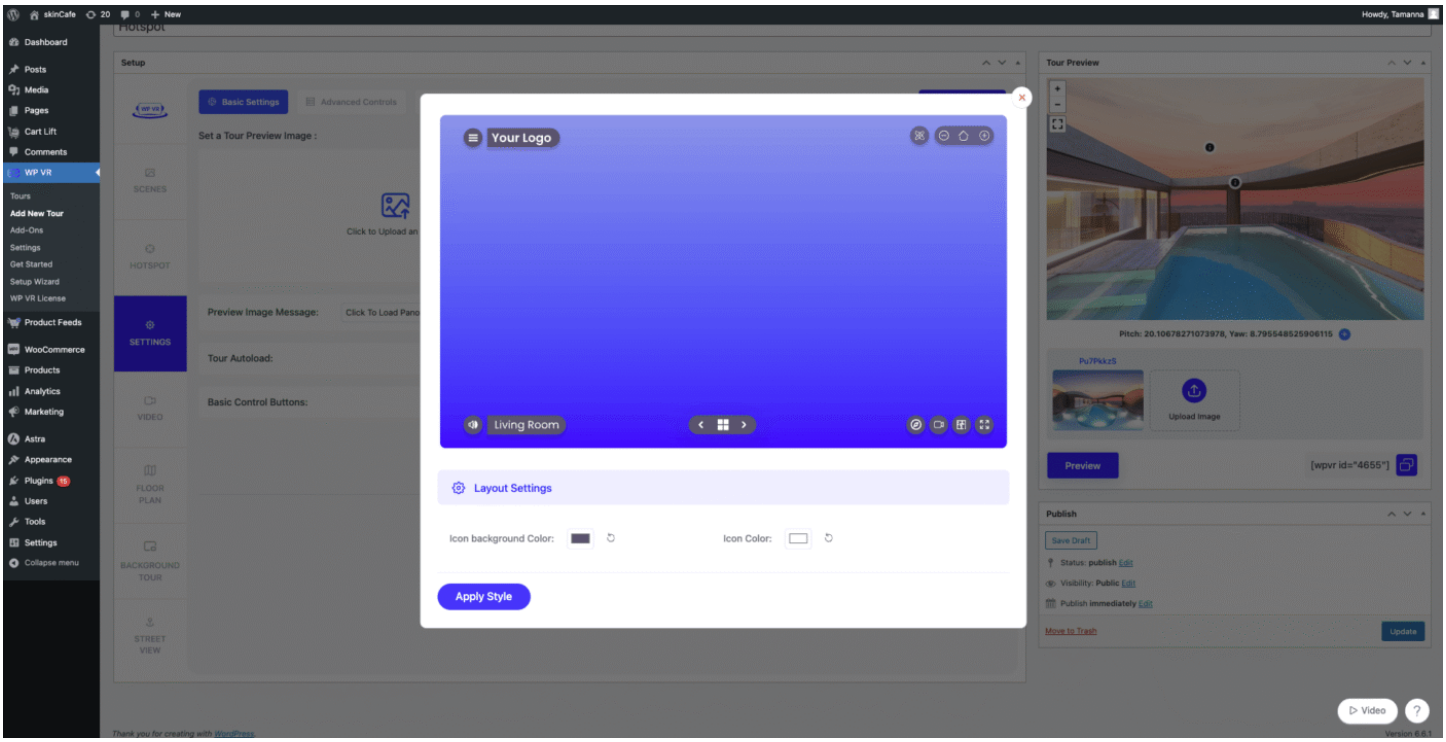
To use the **Modern layout**, ensure you're using **WP VR version 8.5.0 or higher**, and **WP VR Pro version 6.5.0 or higher**.

## Modern Tour Layout

**1.** Go to **Dashboard > WPVR** and click on **Add New Tour.** And assign the tour a suitable name. Now on the left, click on the **Settings** tab. Here you will find the **Basic Controls** and **Advanced Controls** for the tour. **Click on Advanced Controls**. Here you will get the option to choose a layout. Currently we have 2 layouts: **Classic Layout** and **Modern Layout**.



**2.** Let's choose the **Modern Layout**. Hover on the Modern Layout and you will see a **"Preview"** option. Click on the **"Preview"** and window will pop up where you can customize the layout further.



**3.** You can change the **Icon Background Color** and **Icon Color** from this window. After that press the button **"Apply Style"** and the changes will be applied to your tour.

**4.** Now, these customizations cannot be viewed on the tour preview. So, publish the tour and embed it on a page/post. Then preview the page/post and you will be able to see how it looks.

That's how easily you can change the layout of your tour.
