How To Embed Youtube Videos Inside Virtual Tours Using WPVR

Use Hotspots for Navigation & Information · https://rextheme.com/docs/wp-vr-embed-youtube-video/

Once you've created a virtual tour of your property or business using **WPVR**, you can easily embed **YouTube** videos inside your virtual tour.

Especially, if the video is related to your property or business, you can provide your viewers some additional information.

So, you're giving them interactive content to checkout and make them spend more time inside your already interesting virtual tour.

Both **WPVR Free** and **WPVR Pro** plugins will allow you to embed **Youtube** videos inside virtual tours.

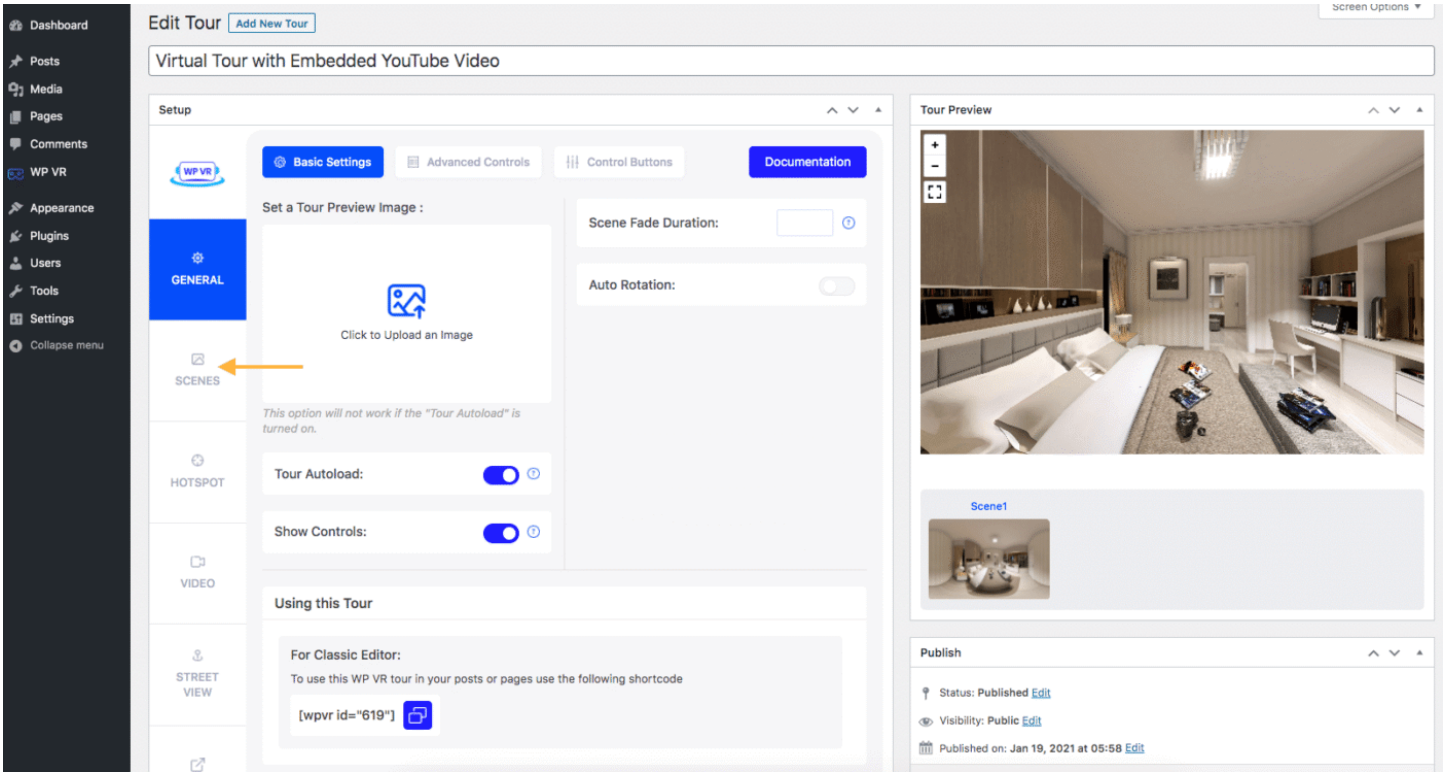
Today, you'll learn how to embed **Youtube Videos** inside virtual tours using WPVR.

Let's get started.

Embed YouTube Videos Inside Virtual Tours Using WPVR

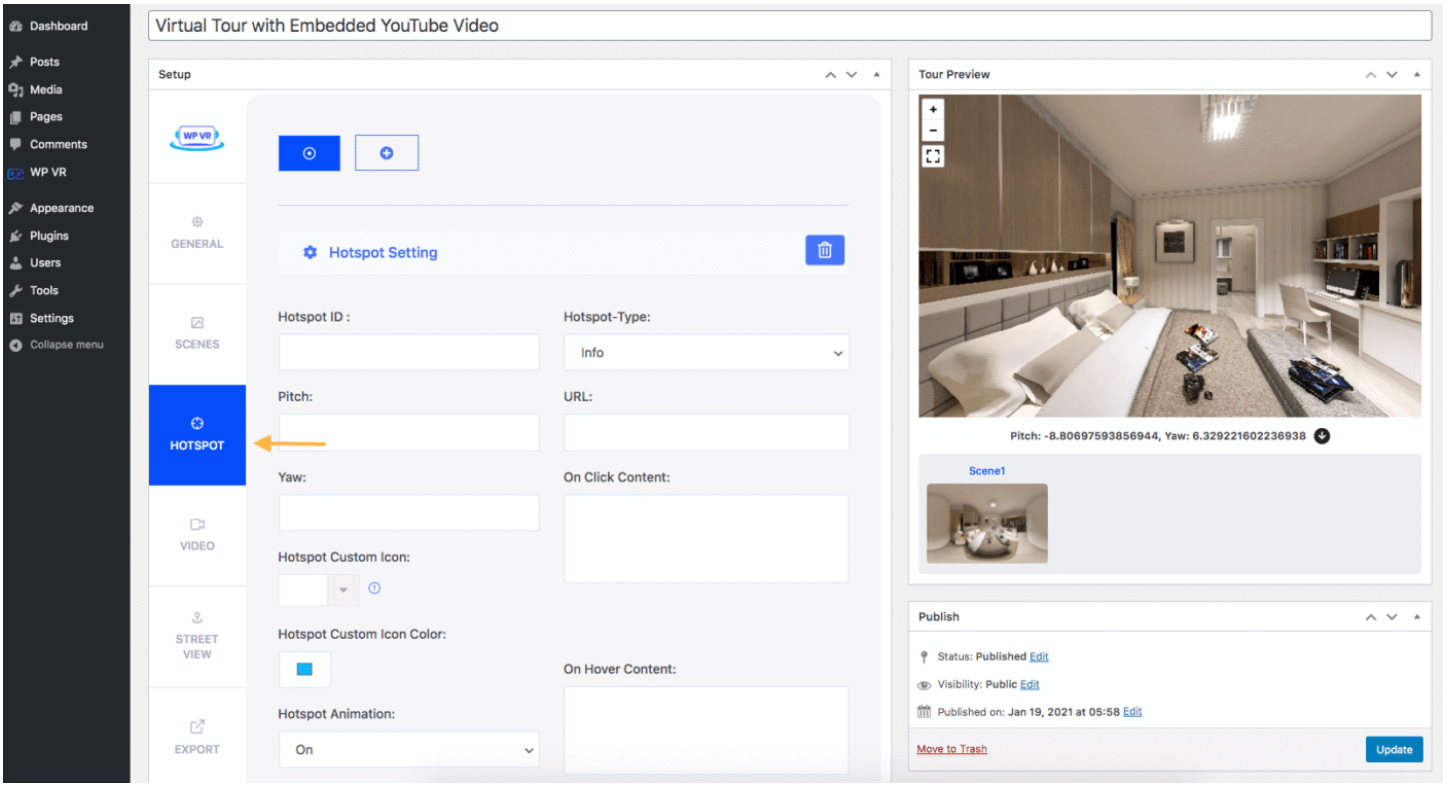
Follow these simple steps to embed YouTube videos into your virtual tour:

1. Go to the edit mode of the virtual tour where you want to embed a YouTube Video.

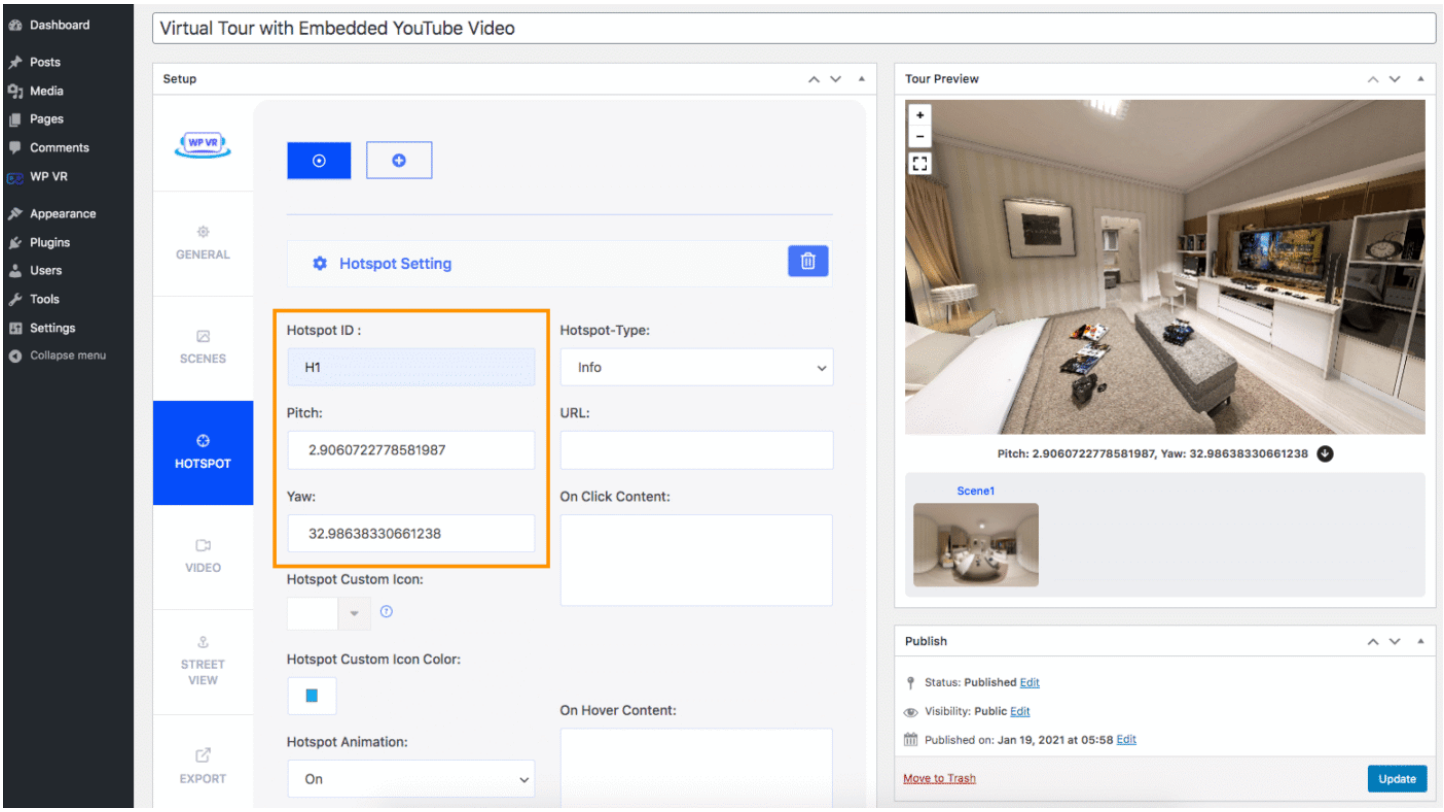


2. Click on the **Scenes** tab and choose the scene in which you want to embed he YouTube video.

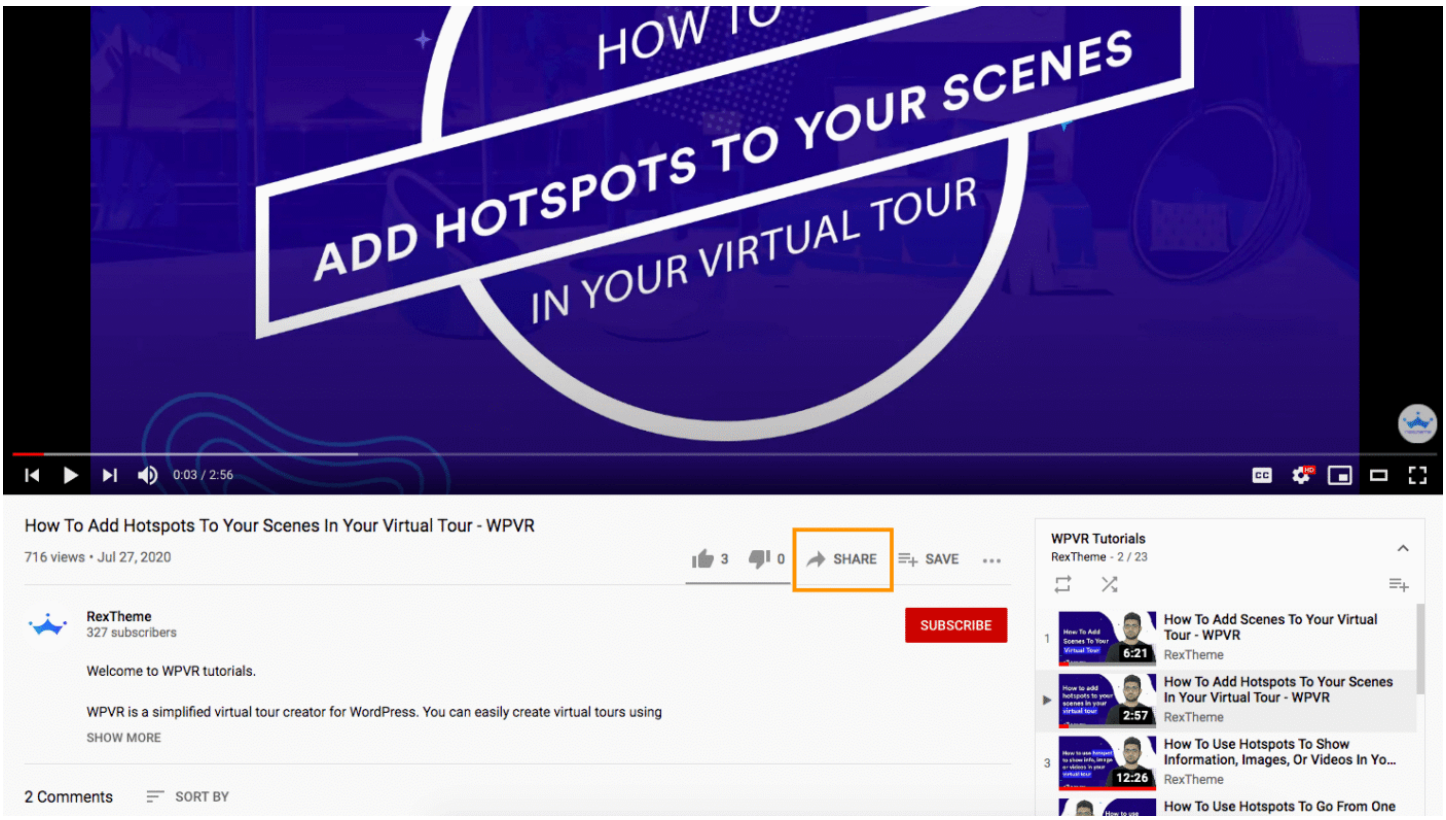
3. Go to the **Hotspot tab** for that scene.



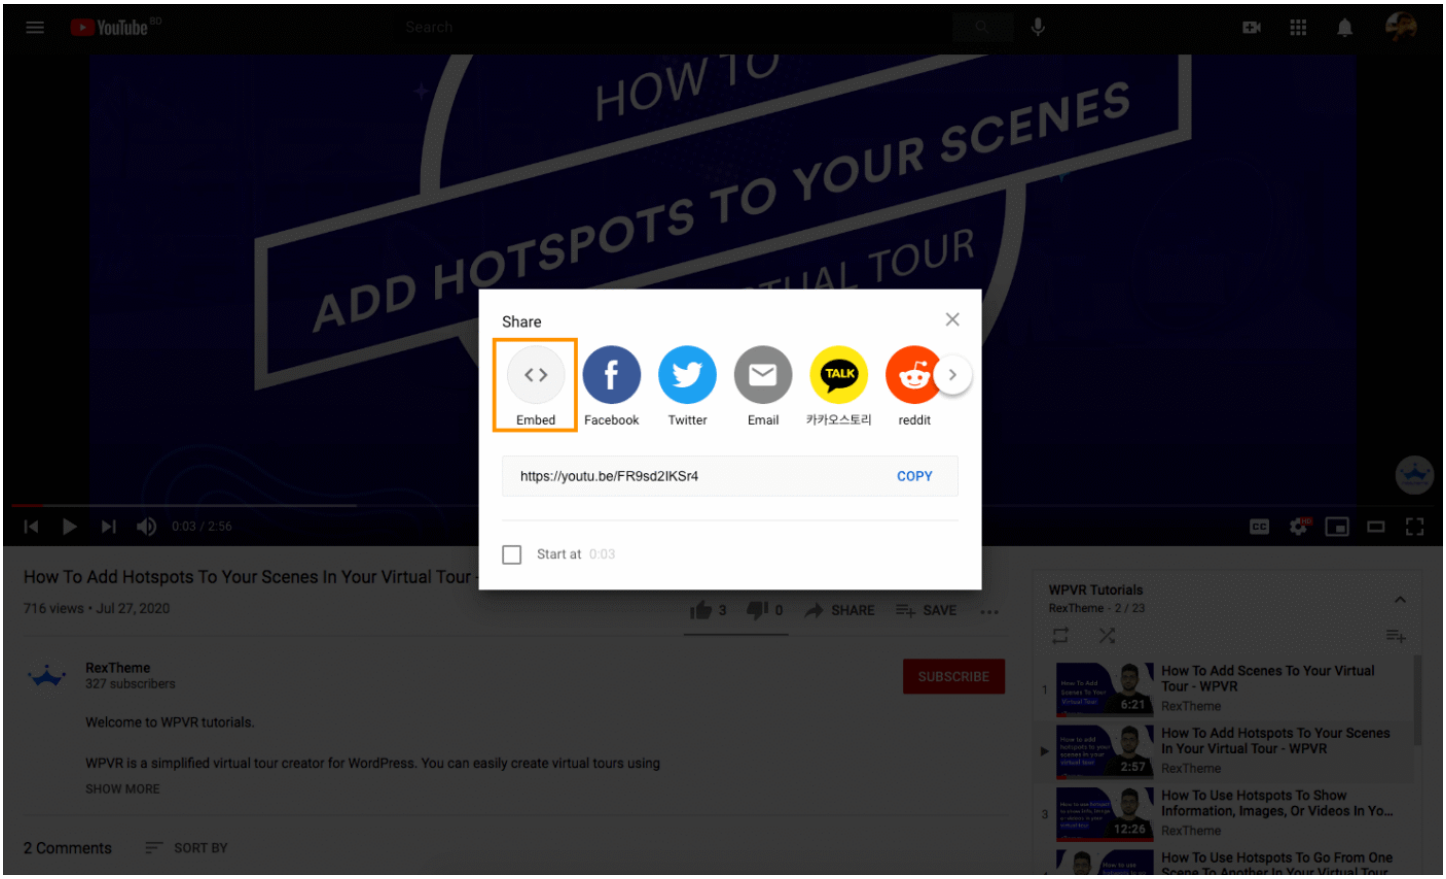
4. Set **Hotspot ID**, **Pitch**, and **Yaw** value for your hotspot.



5. Go to Youtube, find your desired video and click on the **Share Icon** under the video.

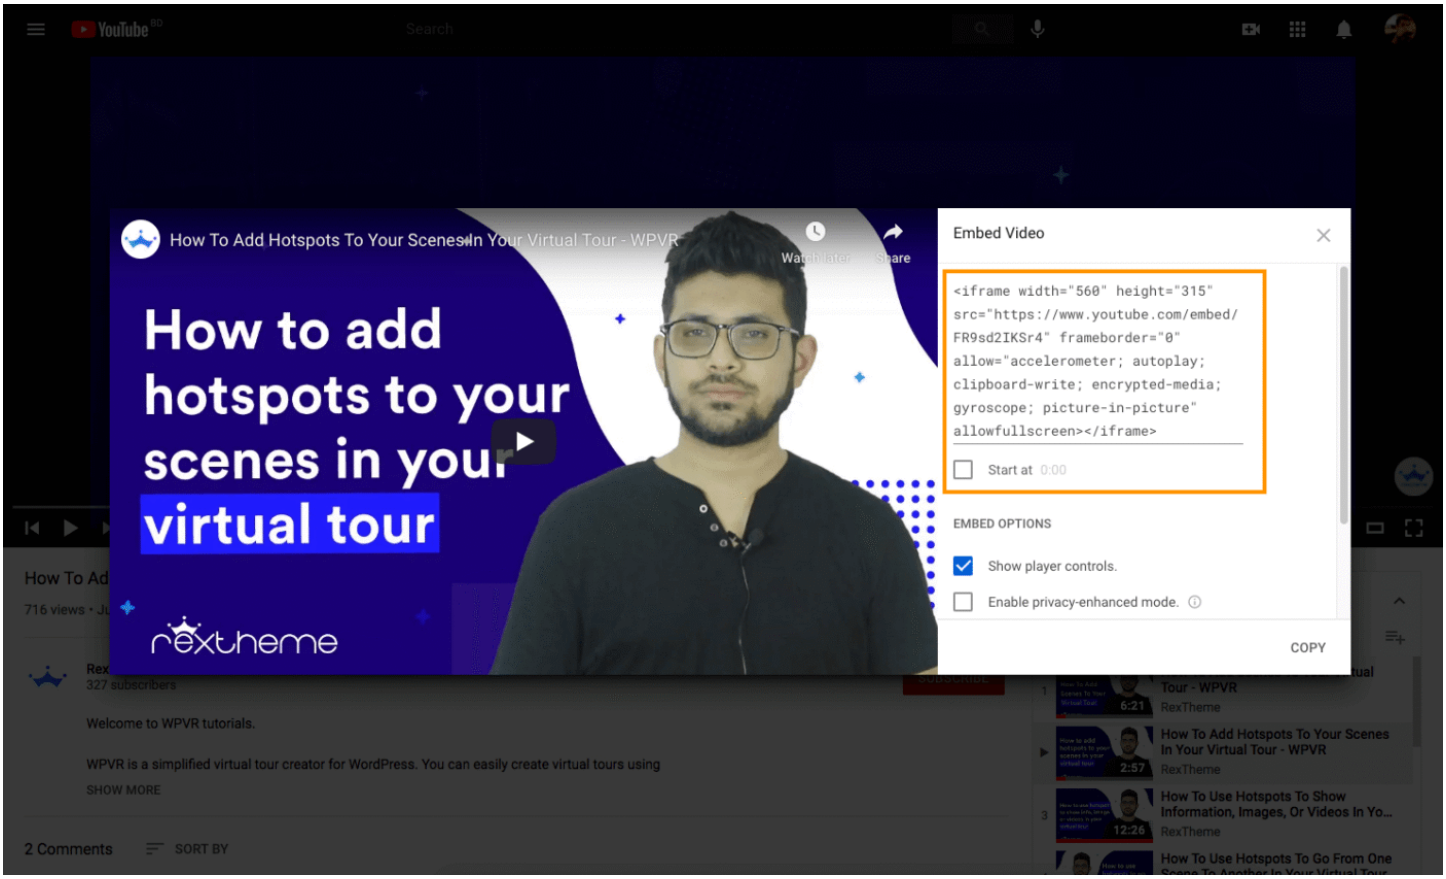


6. A pop-up for share options will appear. Click on the **Embed** option.

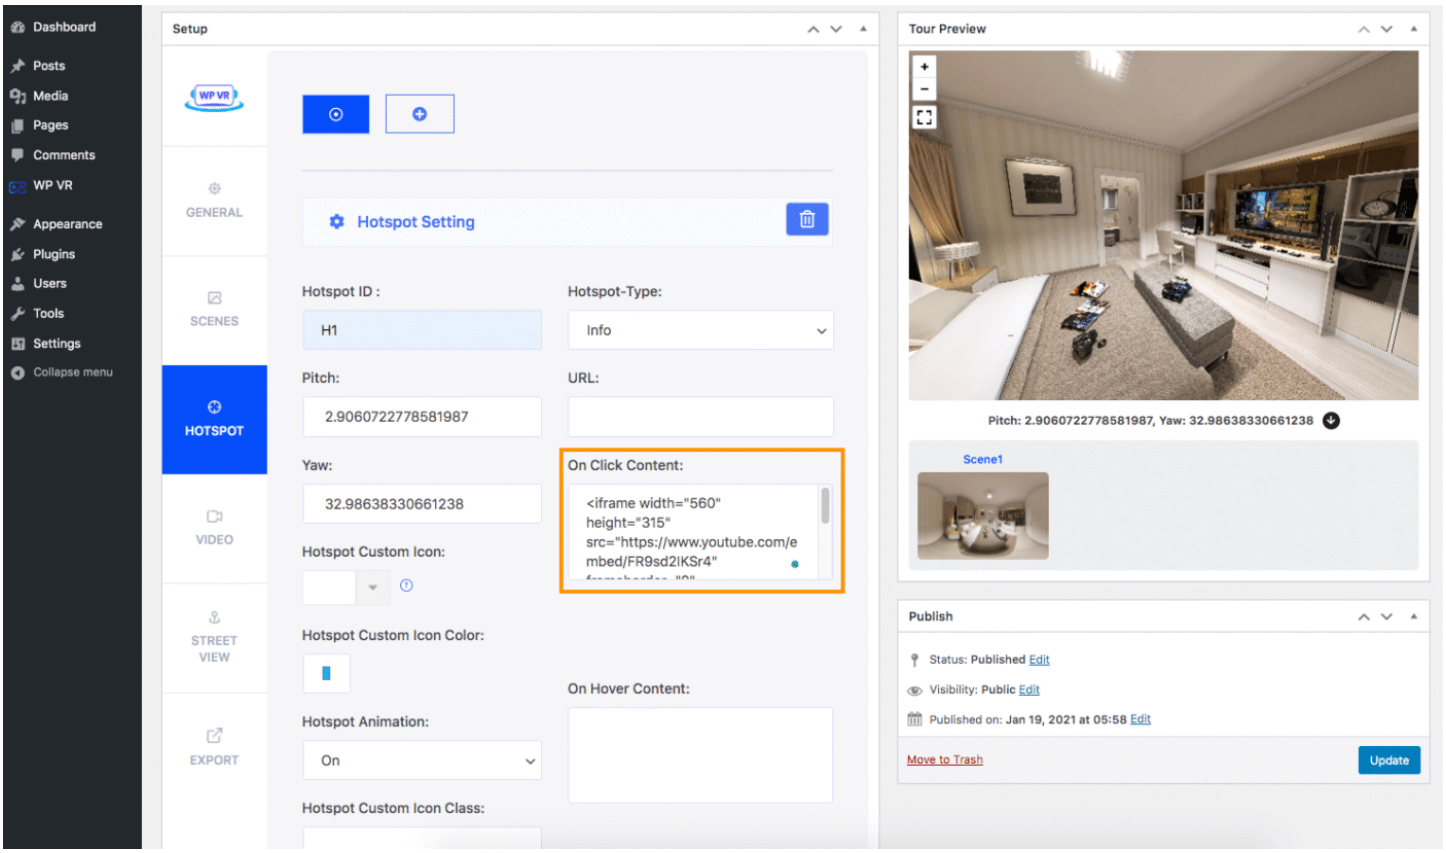


7. You'll get the embed code, copy this code.

***Make sure that the **Start At** option is set at 0:00*



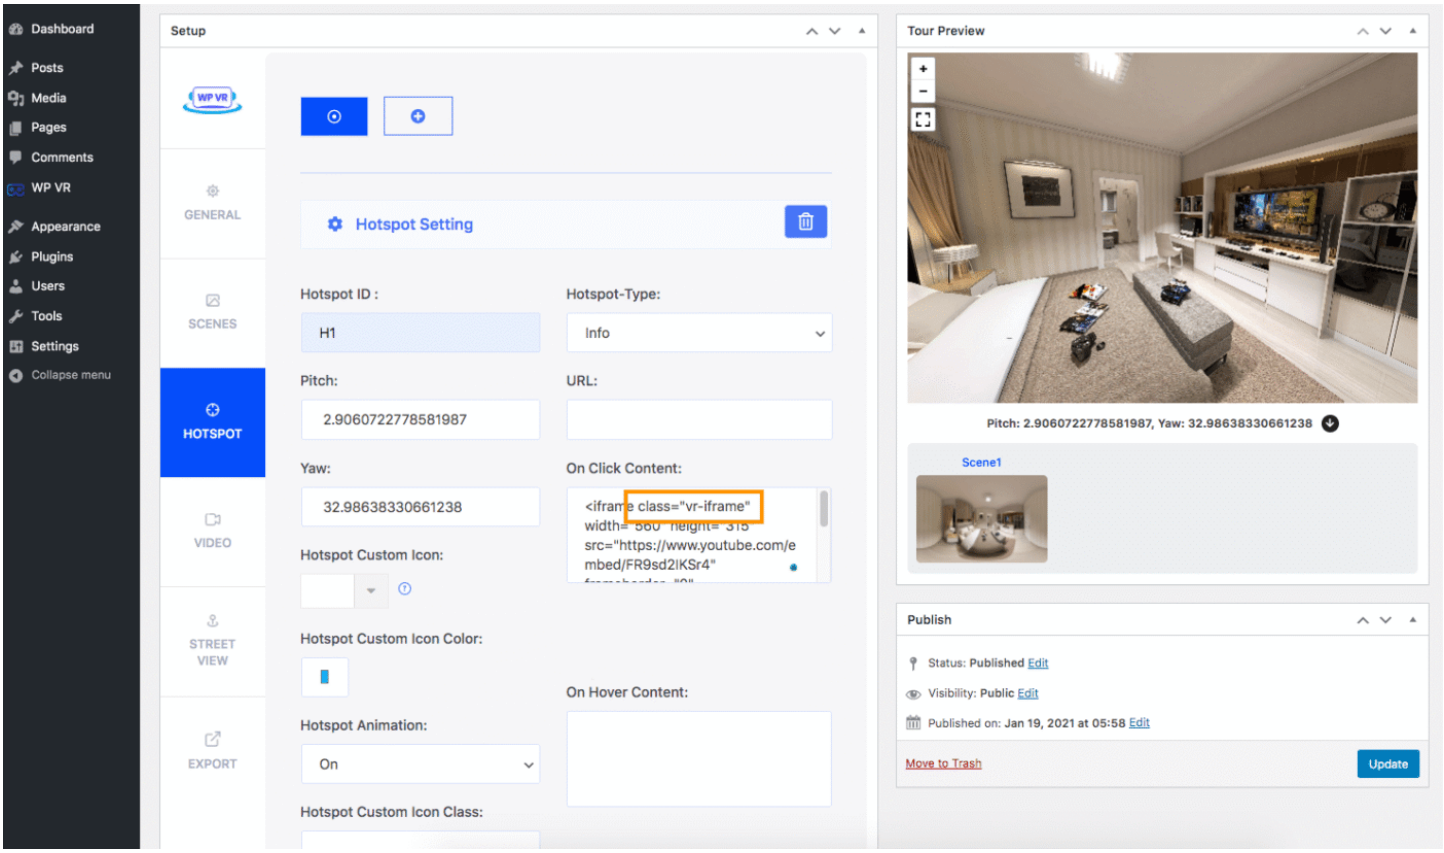
8. Paste the code in the **On Click Content** field of your hotspot.



9. Now, copy this:

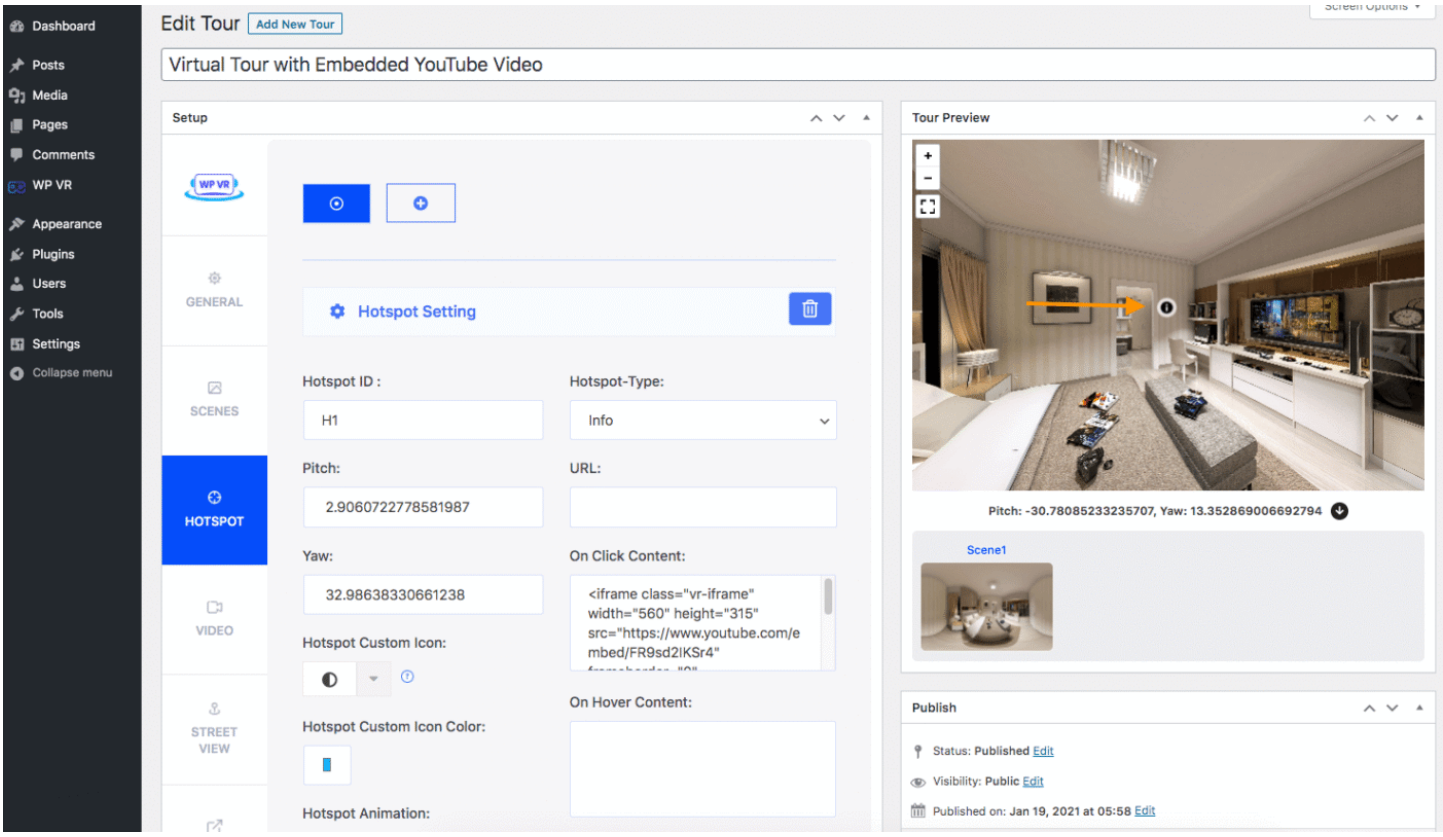
```
class="vr-iframe"
```

Paste this just after <iframe part of the code like this:

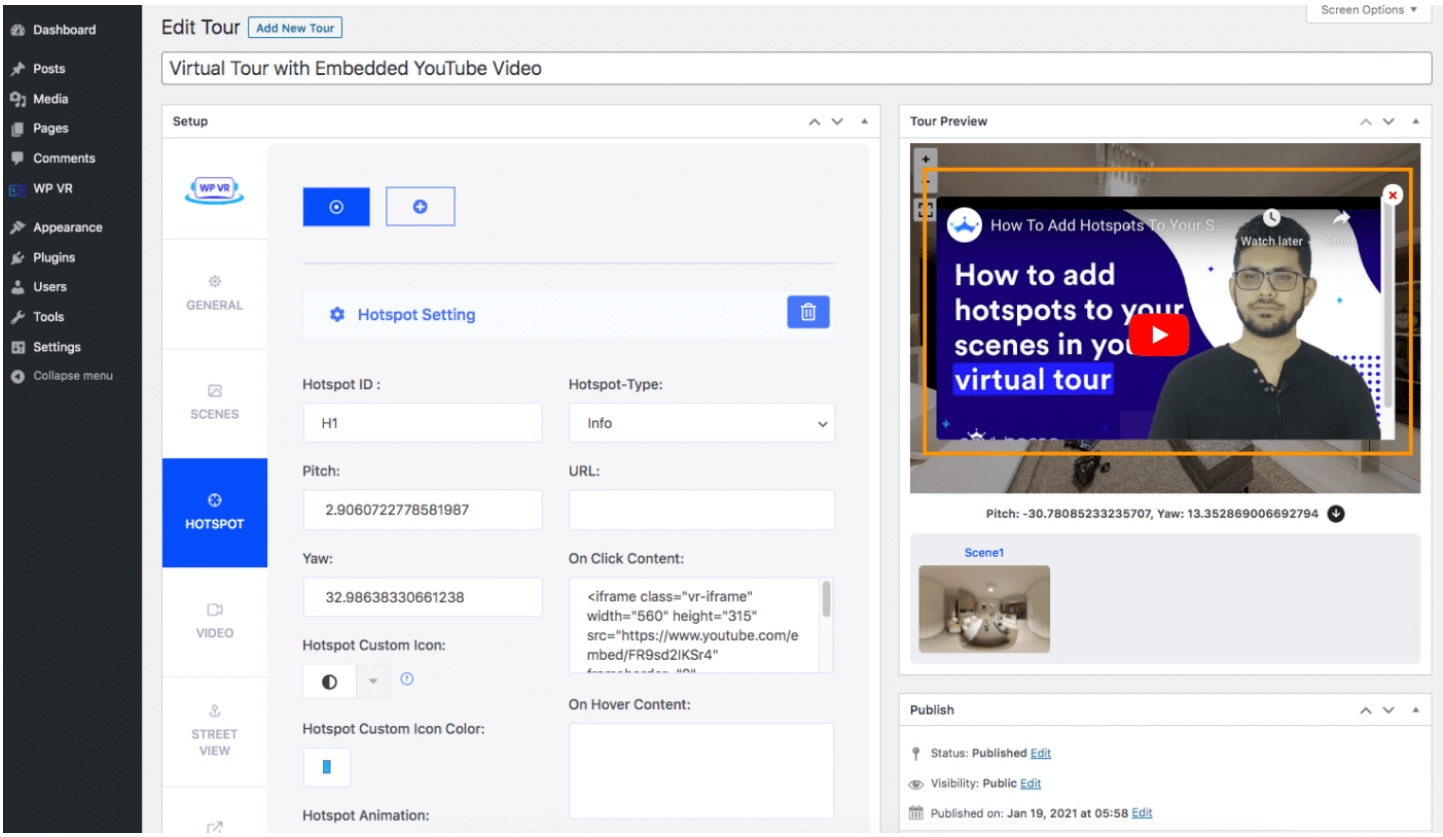


Publish or **Update** the tour.

10. Now, on the preview, you'll see the hotspot has appeared.



Click on it and your **Youtube Video** will appear.



That's it, you've successfully embedded a YouTube video inside your virtual tour using **WPVR**.

Now you can publish the tour on your website and the video will work there too.

To customize your hotspots even more, follow this guide to customize hotspot icons and colors.
