How To Exclude Assets of WPVR From Autoptimize

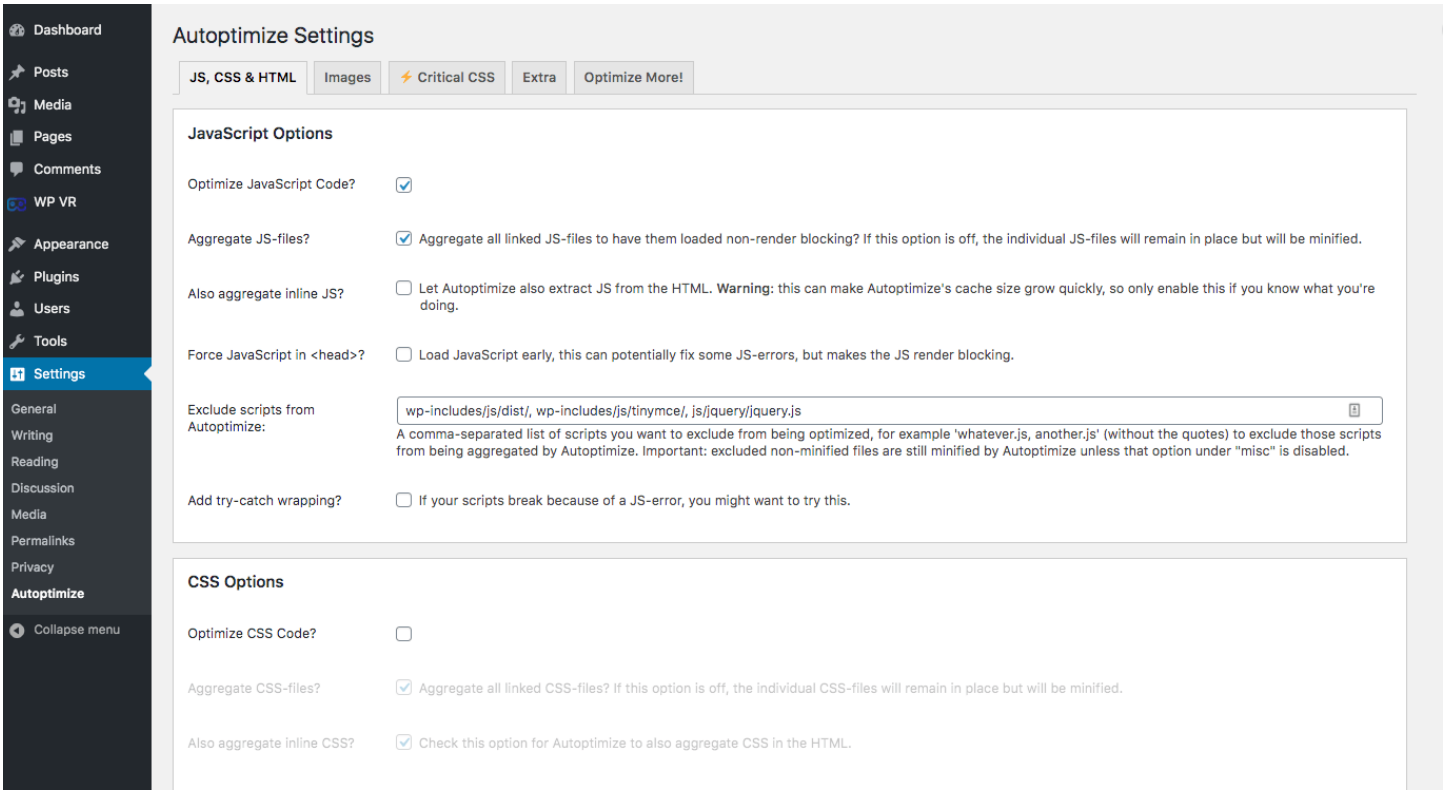

Troubleshooting - Solve Common Issues · https://rextheme.com/docs/wp-vr-exclude-assets-from-autoptimize/

If you're using the **Autoptimize** plugin on your website, it may minify the JS files of **WPVR** and the tour won't show up on your webpage.

Follow these steps to exclude **WPVR JS** files from Autoptimize.

Exclude Assets of WPVR From Autoptimize

1. Go to your WordPress **Dashboard** > **Autoptimize**.

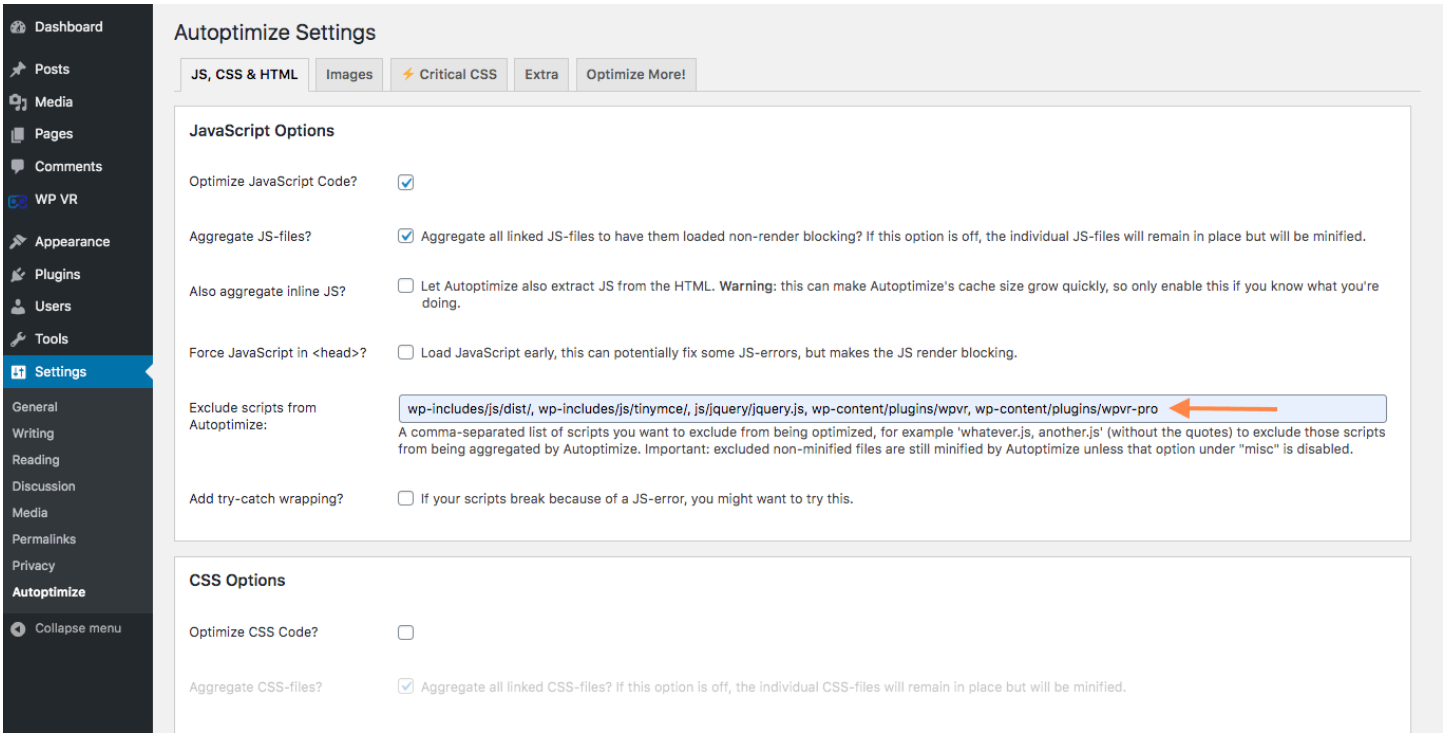

2. Under the **JS, CSS & HTML** tab, you'll find the section for **JavaScript Options**.

Here, you'll see the field for **'Exclude scripts from Autoptimize'.**

3. If you're using the free version of **WPVR**, add a comma (,) and include **wp-content/plugins/wpvr**

.

If you're using the pro version of **WPVR**, add a comma (,) and include **wp-content/plugins/wpvr, wp-content/plugins/wpvr-pro**.

4. Now scroll down and click on the **Save Changes and Empty Cache** button.

5. Go to the webpage, clear the browser cache, and reload the page.

The virtual tour should appear now on your webpage.
