How To Install And Activate Product Feed Manager

Getting Started · https://rextheme.com/docs/wpfm-install-and-activate/

Using **Product Feed Manager For WooCommerce** (PFM), you can easily generate flawless product feeds for tons of large marketplaces.

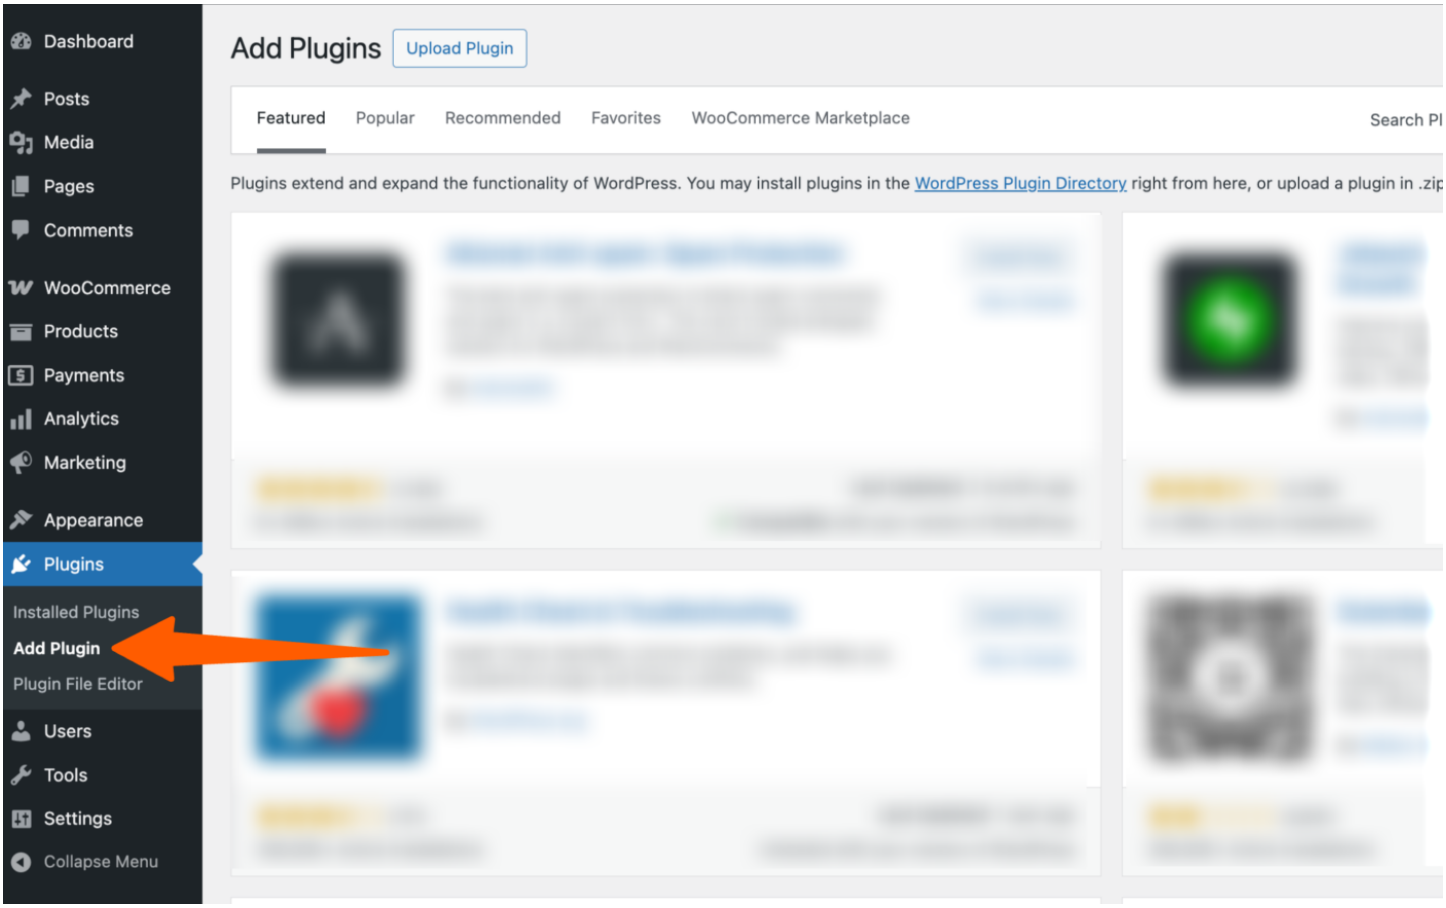

Today, we will show you how to install and activate **Product Feed Manager For WooCommerce**

Step 1: Install And Activate PFM

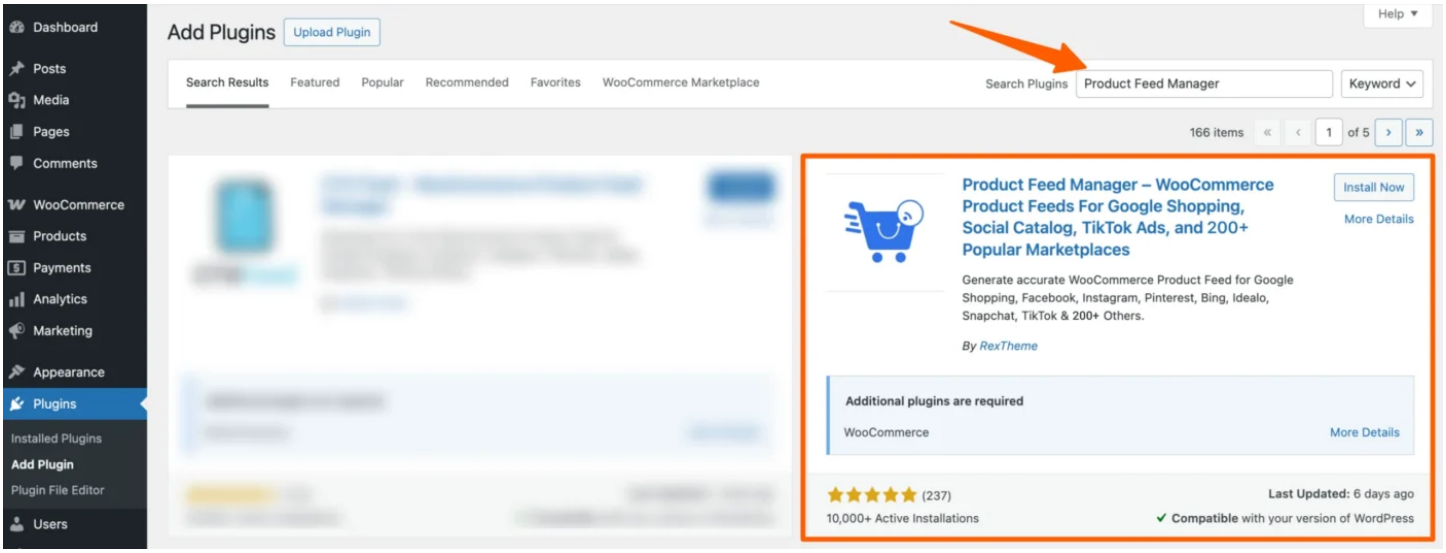

Follow the simple steps below to install and activate the free version of PFM.

Make sure you have the latest version of **WooCommerce installed on your site.

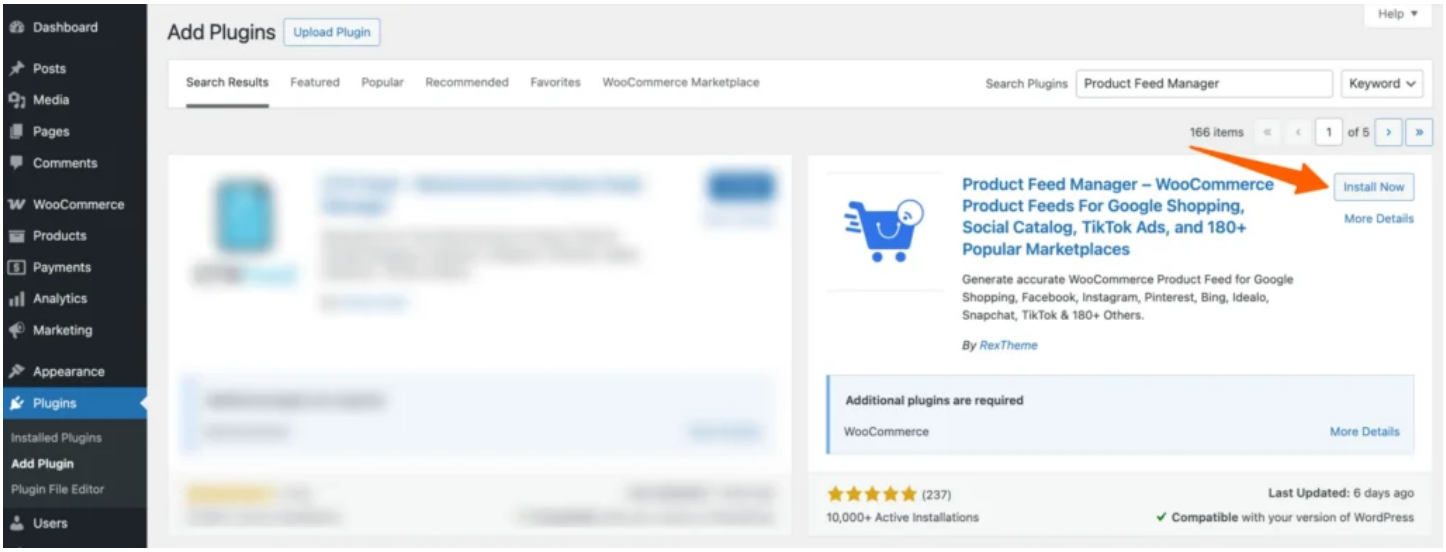

1. Go to your WordPress Dashboard and select **Plugins**. Click on the **Add New** button.

2. On the **Keyword** field, search for '**Product Feed Manager For WooCommerce**', and the plugin will appear on the search results.

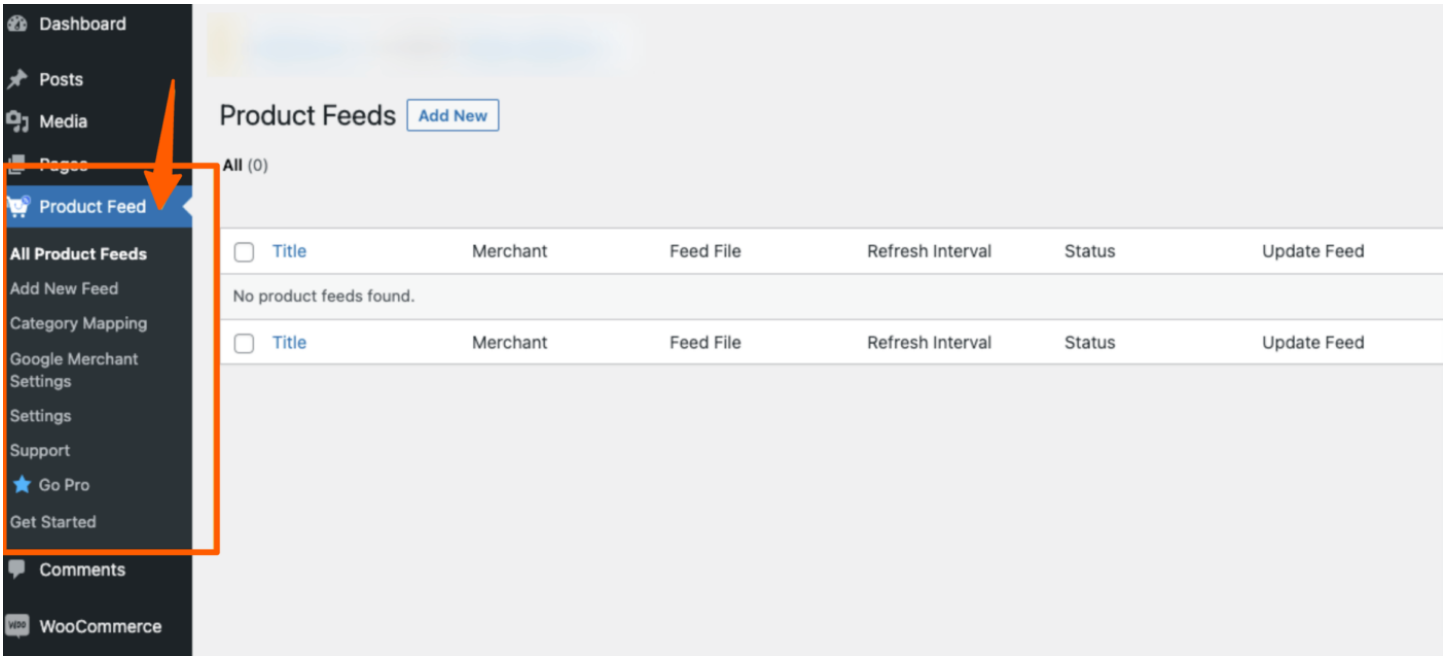

3. Click on the **Install Now** button.

Once the plugin is installed, the **Activate** button will appear.

4. Click on it to activate the plugin on your site. Once the plugin is activated, a **Product Feed** menu will appear on the left side.

That’s it. You now have **Product Feed Manager For WooCommerce** installed on your site.

You can also get **Product Feed Manager For WooCommerce** in the following ways:

- The free version in the WordPress repository at: https://wordpress.org/plugins/best-woocommerce-feed/

- Both the free and the premium versions are here: https://rextheme.com/best-woocommerce-product-feed/

If you download from the WordPress repository or the RexTheme website, then go to **Dashboard > Plugins > Add New** and on the top left side, you will see an 'Upload' button. Click on it. Then upload the plugin file, Install and Activate it.

Step 2: Install And Activate PFM Pro

After using the PFM free version, chances are, you will want to upgrade to Pro to be able to generate a feed for unlimited products.

Now, let us learn how you can install and activate PFM PRo.

1. If you haven't got PFM Pro yet, then first Upgrade to Pro. Here's how.

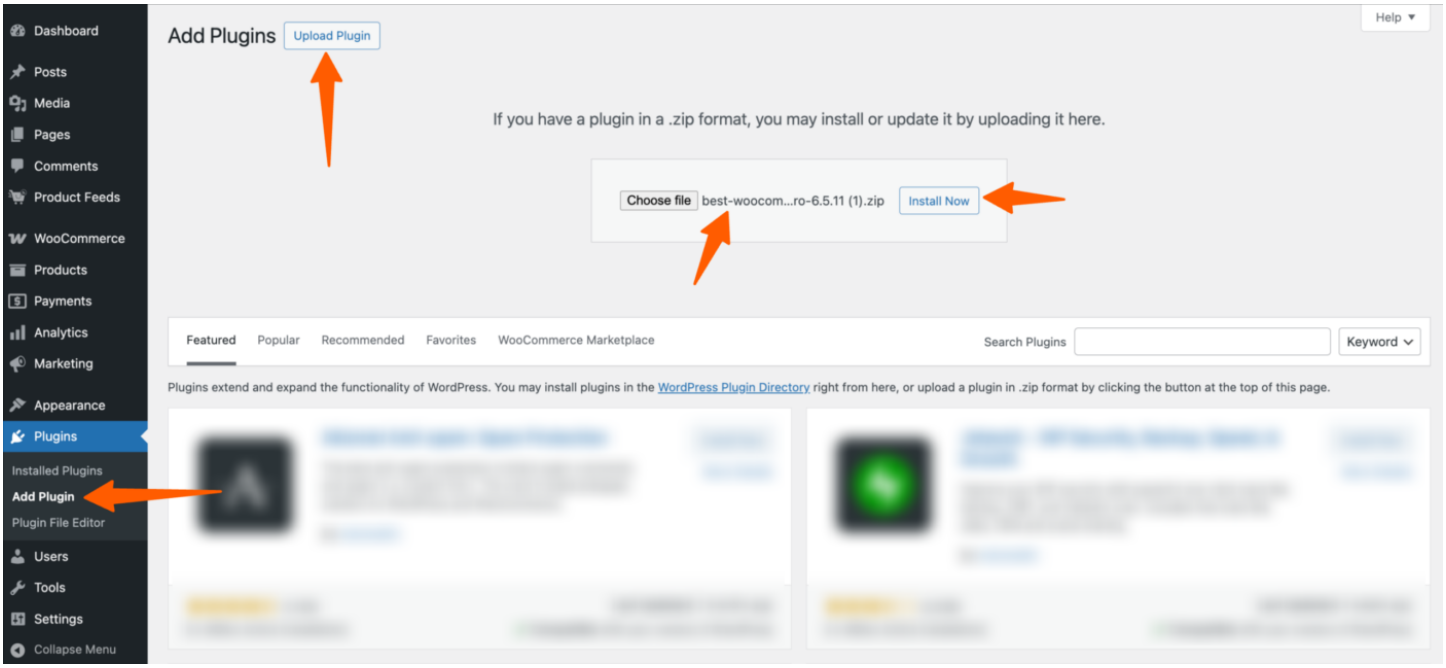

Also, make sure you have the free version installed and activated before you install the pro version. You will need both versions for the plugin to work.

2. Once you upgrade to PFM Pro, you will have to collect your license key and download the latest Pro plugin from your RexTheme Account.

3. Go to **Dashboard** > **Plugins** > **Add New** and click on the **Upload Plugin** button.

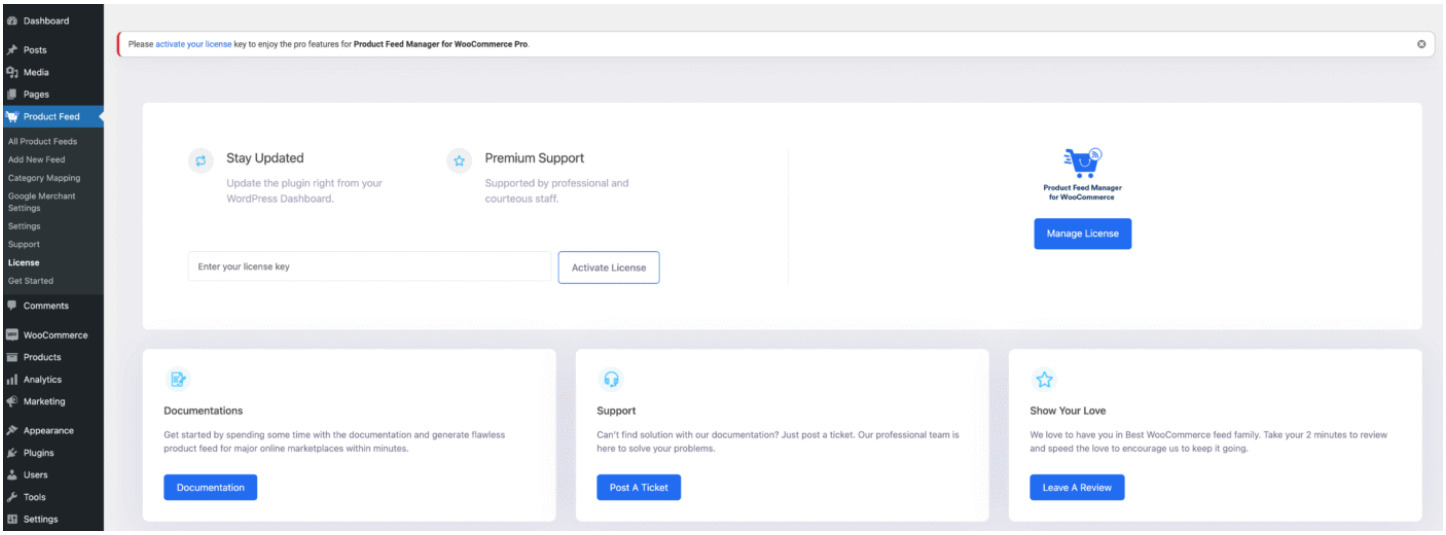

4. Upload the downloaded PFM Pro plugin zip file that you just downloaded.

Then click on **Install Now**.

5. Once installed, click on the **Activate Plugin** button.

6. You will see there is a new menu under **Dashboard** > **Product feed** called **License**.

On the License menu, you need to input the license key you collected earlier after upgrading to Pro.

Input the License key in the field, then Click on **Activate License** button, and the license will be activated.

That’s it. Now you will be able to access all the Pro features of PFM.

Now that you have the plugin installed, now, let’s start by creating a simple product feed real quick.
