Not all abandoned carts are ideal candidates for recovery campaigns. In some cases, you may want to exclude certain carts based on specific conditions. By excluding these carts, you can optimize your recovery efforts, focusing only on high-value opportunities and improving overall campaign effectiveness.

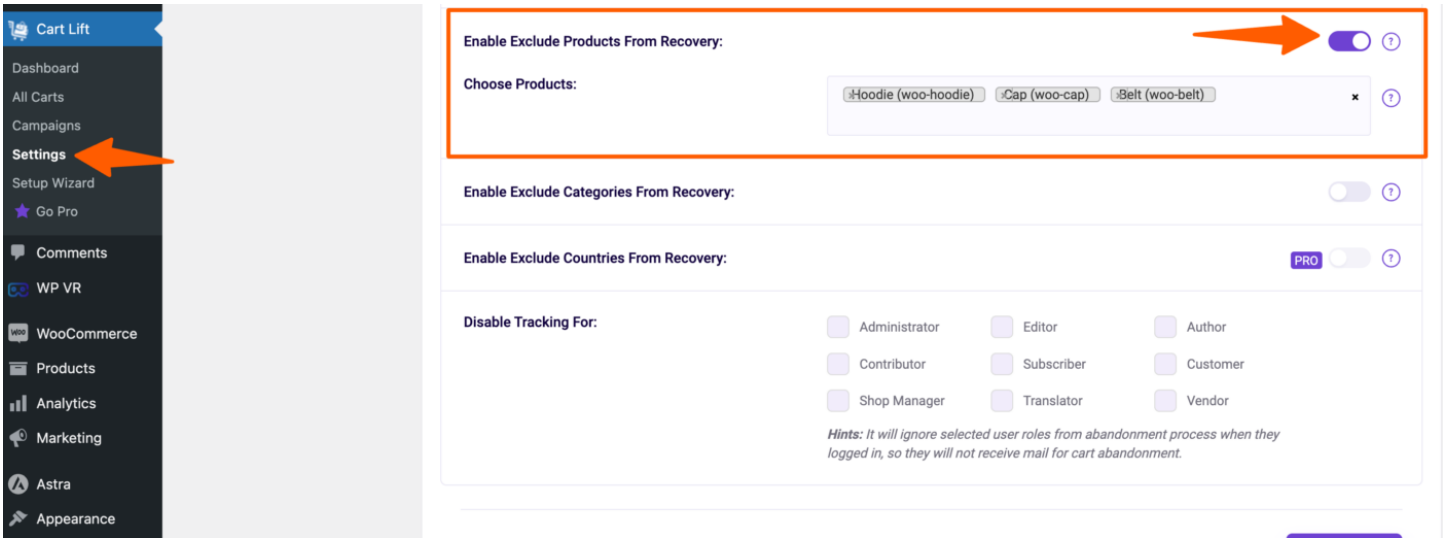

Cart Lift offers three new conditions for that.

1. Exclude specific products from recovery
2. Exclude categories from recovery
3. Exclude countries from recovery

This guide will show you how to set conditions to automatically exclude certain carts from abandoned cart recovery campaigns, giving you greater control over your marketing strategy and ensuring more targeted, relevant outreach.

Enable Exclude Products From Recovery Option

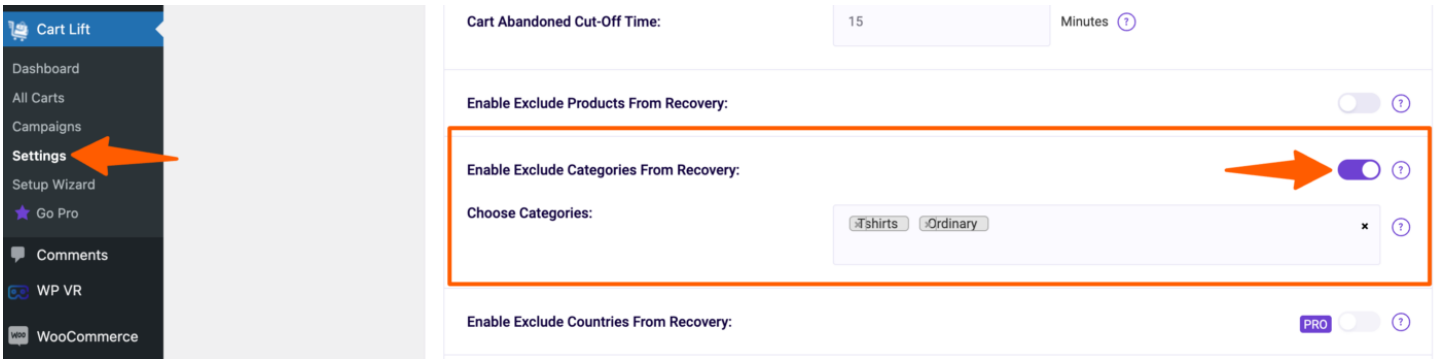

Go to **Settings > General**, then scroll down a bit and you'll find the option '**Enable exclude products from recovery**'. After enabling this option you'll be able to see additional fields to select products.
