Reward customers who buy in larger quantities by offering a special discount on a specific item in the order.

With the **Dynamic Discount for WooCommerce** plugin by RexTheme, you can automatically apply a discount to the Nth product — for example, “Get $10 off on every 5th product.”

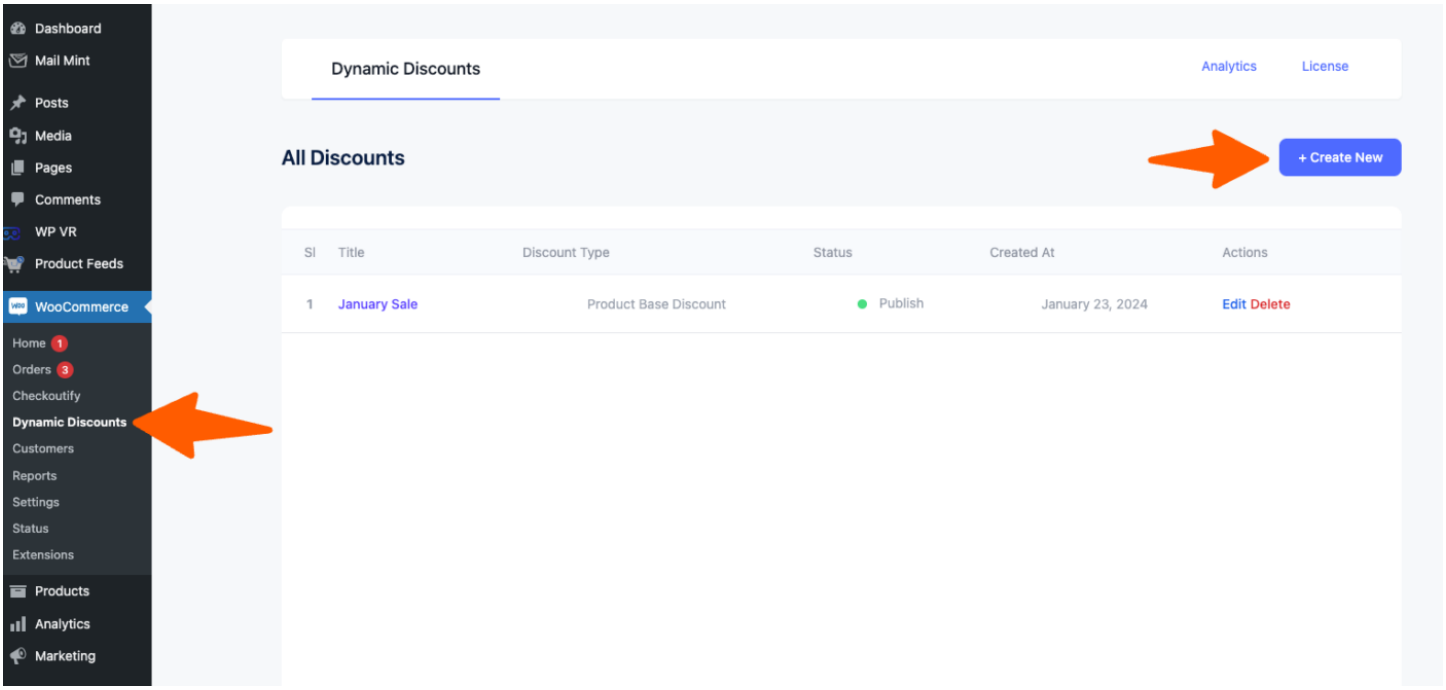

This guide will walk you through how to:

- Set a discount that applies only to a specific item in the purchase sequence (e.g., 5th, 10th, etc.).
- Choose between fixed or percentage-based discounts for that Nth quantity.

Before starting, make sure your license is activated.

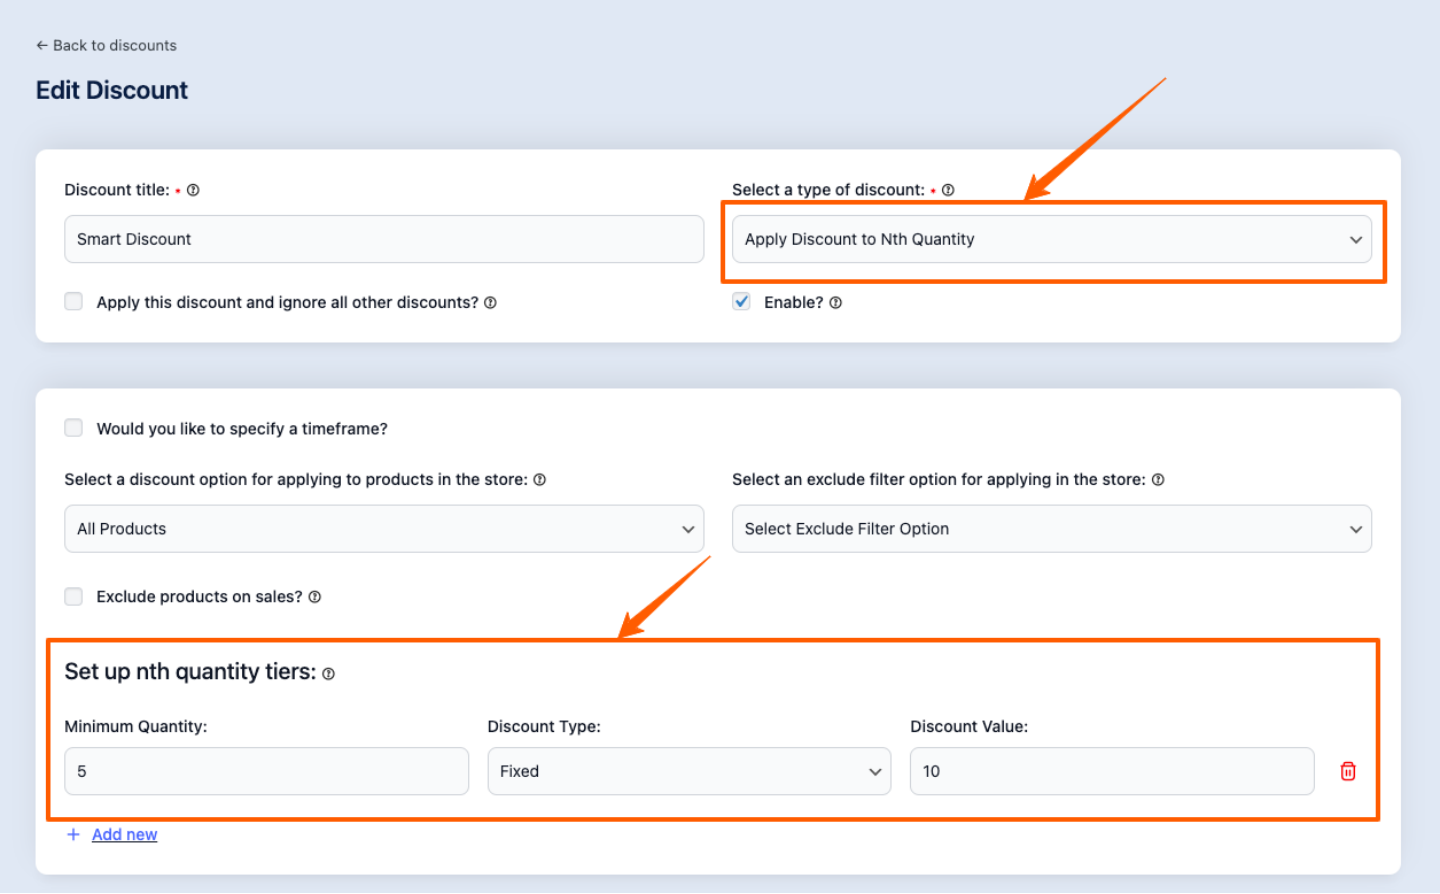

Follow the steps below to navigate to the Dynamic Discount Dashboard:

Hover on **WooCommerce dashboard** > **Dynamic Discounts**. As you can see, it will take you to the page where you can create a discount rule. On top, you will see a Button **+ Create New.**
