How To Set A Bundle Discount

Discount Conditions · https://rextheme.com/docs/how-to-set-a-bundle-discount/

Encouraging customers to buy related or complementary products together is a proven way to increase average order value.

With the **Dynamic Discount for WooCommerce** plugin by RexTheme, you can easily create bundles or set discounts that reward customers when they purchase specific product combinations.

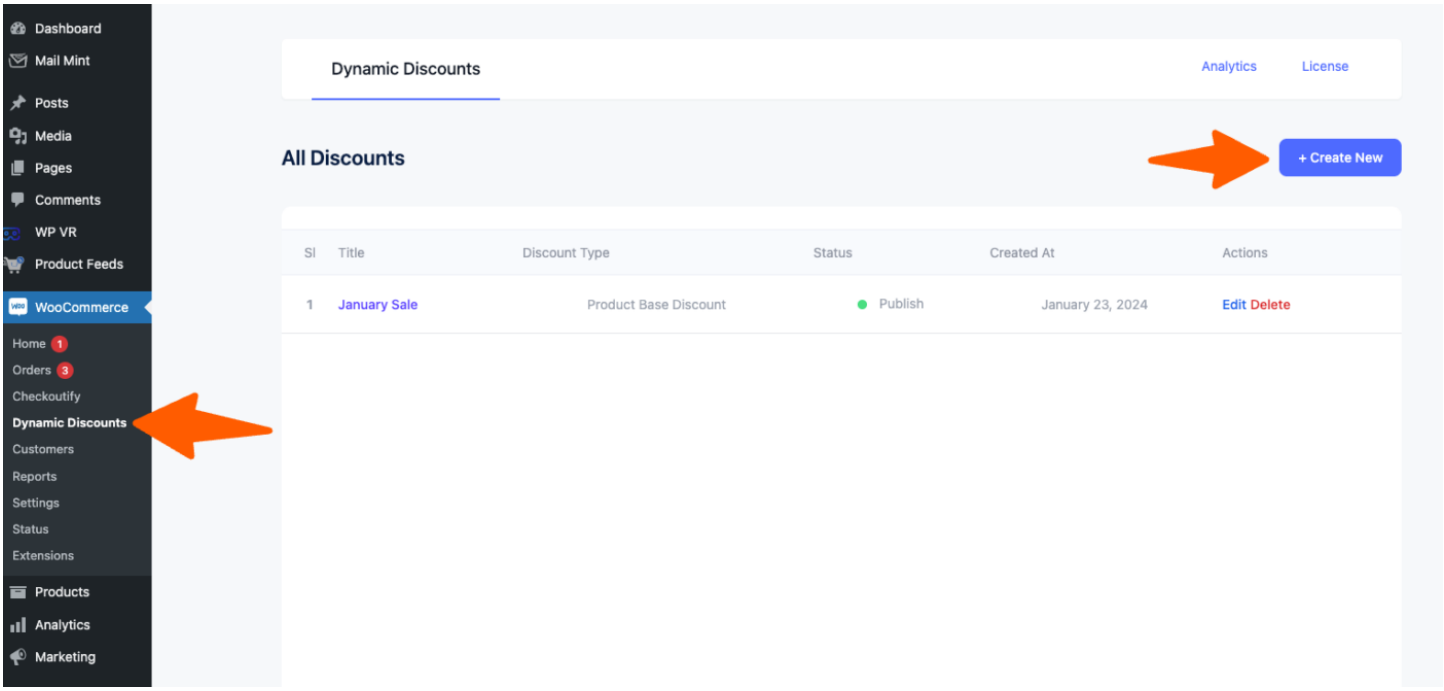

This guide will walk you through how to:

- Create bundle-based discounts that apply when customers purchase selected sets of products together.
- Encourage product pairing (e.g, “Buy a Laptop and a Mouse together to get 10% off”).

Before starting, make sure your license is activated.

Follow the steps below to Navigate to Dynamic Discount Dashboard:

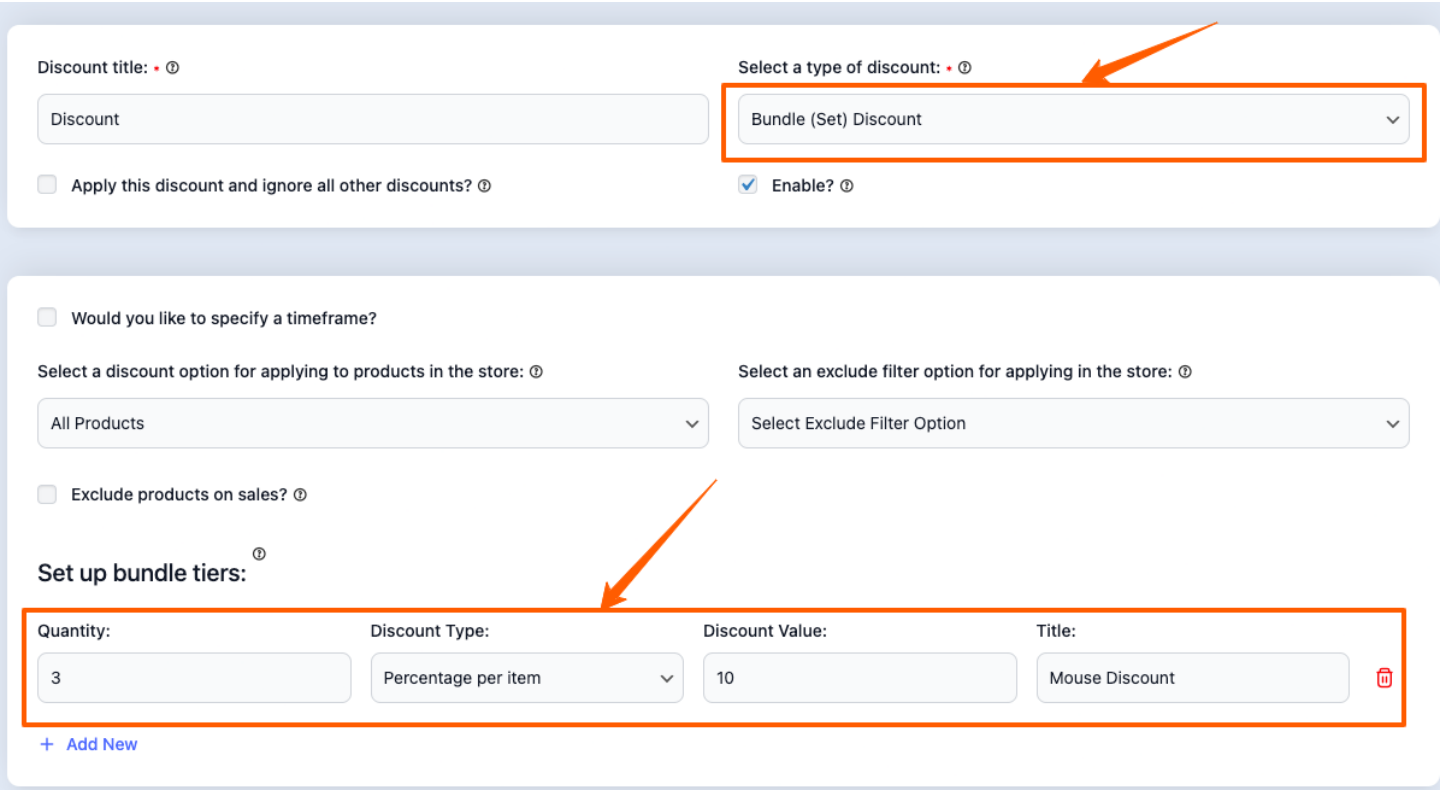

Hover on **WooCommerce dashboard** > **Dynamic Discounts**. As you can see, it will take you to the page where you can create a discount rule. On top, you will see a Button **+ Create New.**

Creating Bundle (Set) Discount

1. Give your Discount a Title

From the Discount type dropdown, select **Bundle (Set) Discount** and 2 new sections will be added below.

2. Select the Discount Rule

From the **"Select the Discount option for applying to products in the store"**, select where the discount rule will be applied to:

Currently Discount Rule can be applied to:

- All Products
- Specific Products
- Specific Category
- Specific Tag

You can also exclude products based on:

- Product
- Category
- Tag

3. Set up bundle tiers

Select the Quantity for the product

Select the Discount Type:

- **Percentage Per Item** - Percentage Discount applied to each product
(Example buy 3 mouse and get discount of 10% on each mouse)
- **Fixed Per Item** - Fixed Amount of Discount applied to each product
(Example buy 3 mouse and get a discount of $10 on each mouse)
- **Fixed For Set/Bundle** - Fixed amount for the bundle
(Example: 3 mouse for only $10, here the $10 is set for the bundle of 3 mouse)

Select the Discount Value

Give a Title for your Discount

4. Click on the Save button.

That’s it, **Bundle (Set) Discount** Rule is created.

Now that you are familiar with how the **Dynamic Discounts for WooCommerce** plugin works, in the upcoming documentation you’ll learn about the other discount types
