How To Set Stock-Based Discount

Discount Conditions · https://rextheme.com/docs/how-to-set-stock-based-discount/

Managing your inventory effectively can directly boost sales—and offering discounts based on stock levels is a smart way to clear excess inventory or promote overstocked items.

With the **Dynamic Discount for WooCommerce** plugin by RexTheme, you can automate discounts for products that have higher stock quantities, encouraging faster sales and inventory balance.

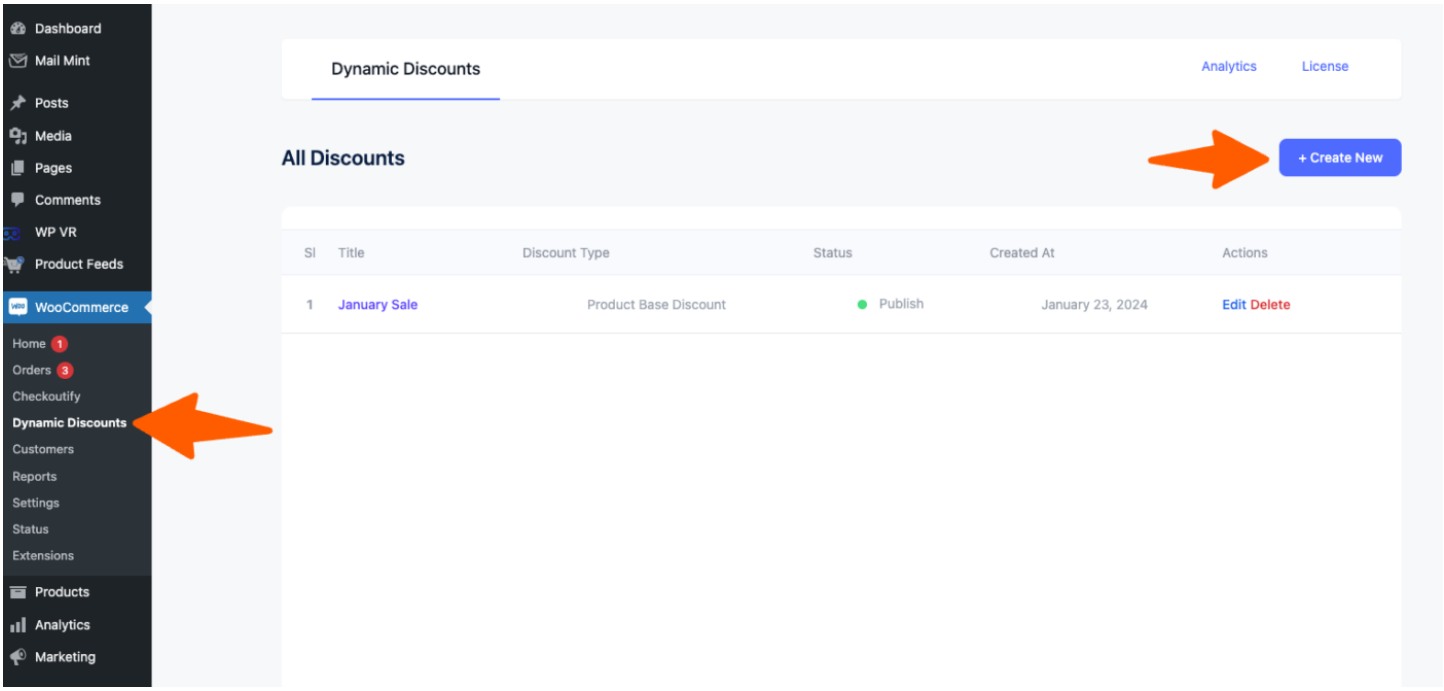

This guide will walk you through how to:

- Automatically apply discounts to products based on their available stock quantity using the Dynamic Discount for WooCommerce plugin.
- Set flexible discount conditions that trigger when stock levels meet your chosen threshold.

Before starting, make sure your license is activated

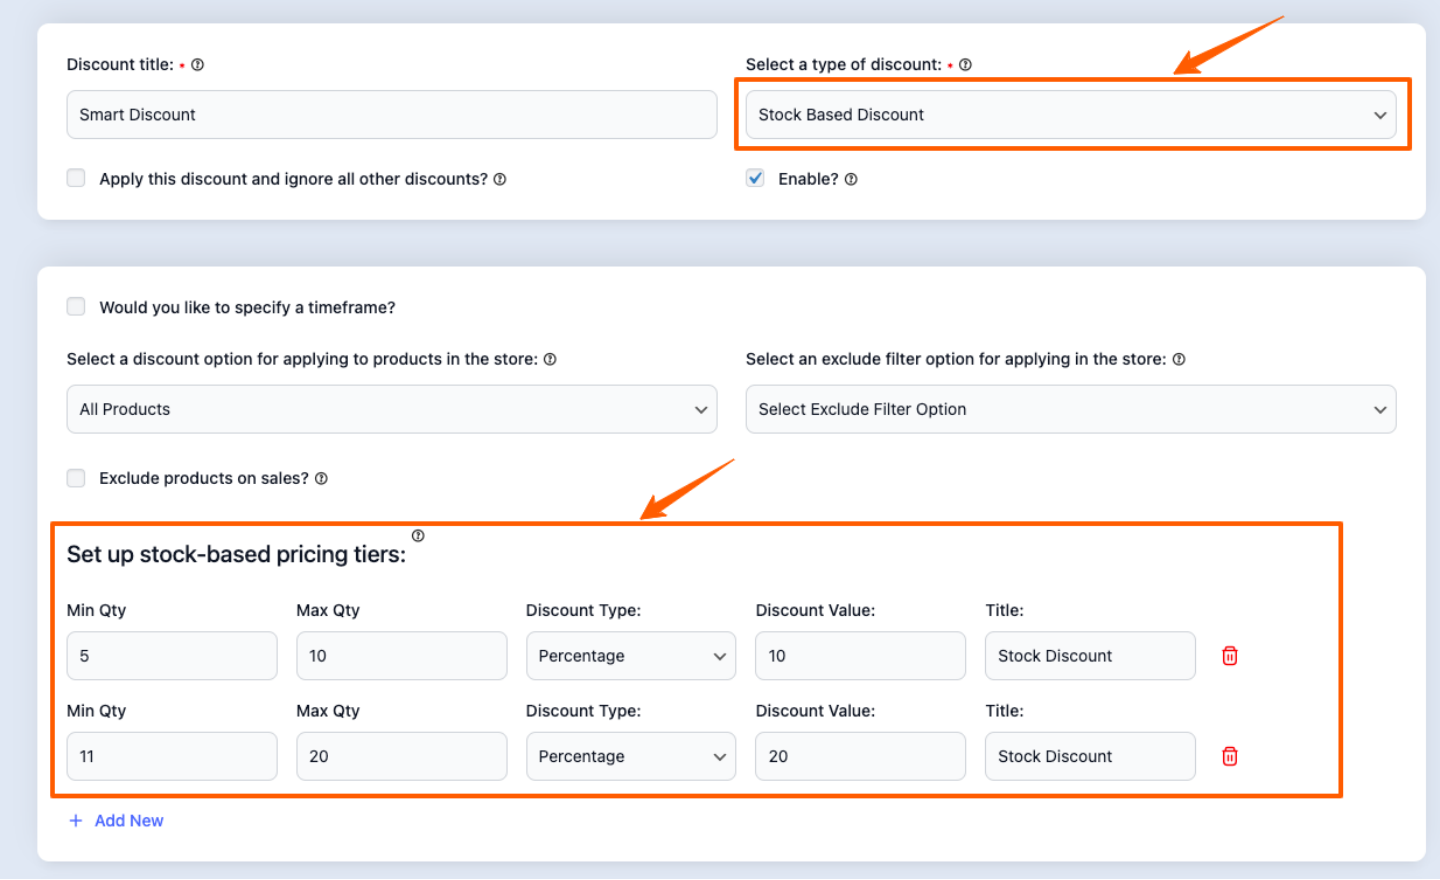

Follow the steps below to Navigate to Dynamic Discount Dashboard:

Hover on **WooCommerce dashboard** > **Dynamic Discounts**. As you can see, it will take you to the page where you can create a discount rule. On top, you will see a Button **+ Create New.**

Creating Stock-Based Discounts

1. Give your discount a title. Now, from the Discount type dropdown, select **Stock Based Discount**, and 2 new sections will be added below.

2. Now **"Select the Discount option for applying to products in the store"**. You select the Discount Rule for

- All Products
- Specific Products
- Specific Category
- Specific Tag

You can also exclude products based on:

- Product
- Category
- Tag

3. Now for **Set up Stock - Based Pricing Tiers**

Select the Minimum Quantity and Maximum Quantity

Select the Discount Type: Percentage or Fixed Discount

Select the Discount Value

Give a Title for your Discount

Example:

If there are products with stock between 5-10, a discount of 10% will be applied on those products

If there are products with stock between 11-15, a discount of 20% will be applied on those products

4. Now click on the **Save** button.

That’s it, **Stock based** Discount Rule is created.

Now that you are familiar with how the **Dynamic Discounts for WooCommerce** plugin works, in the upcoming documentation you’ll learn about the other discount types
