How to Set Zone Based Shipping Conditions in Advanced Shipping

Shipping Conditions · https://rextheme.com/docs/how-to-set-zone-based-shipping-conditions-in-advanced-shipping/

In this guide, I'll explain how to set up **zone-based shipping conditions** in **Advanced Shipping for WooCommerce** plugin by RexTheme.
You can control shipping costs based on **predefined zones**, which are useful if you want to group multiple locations under a single shipping rate.

For example:

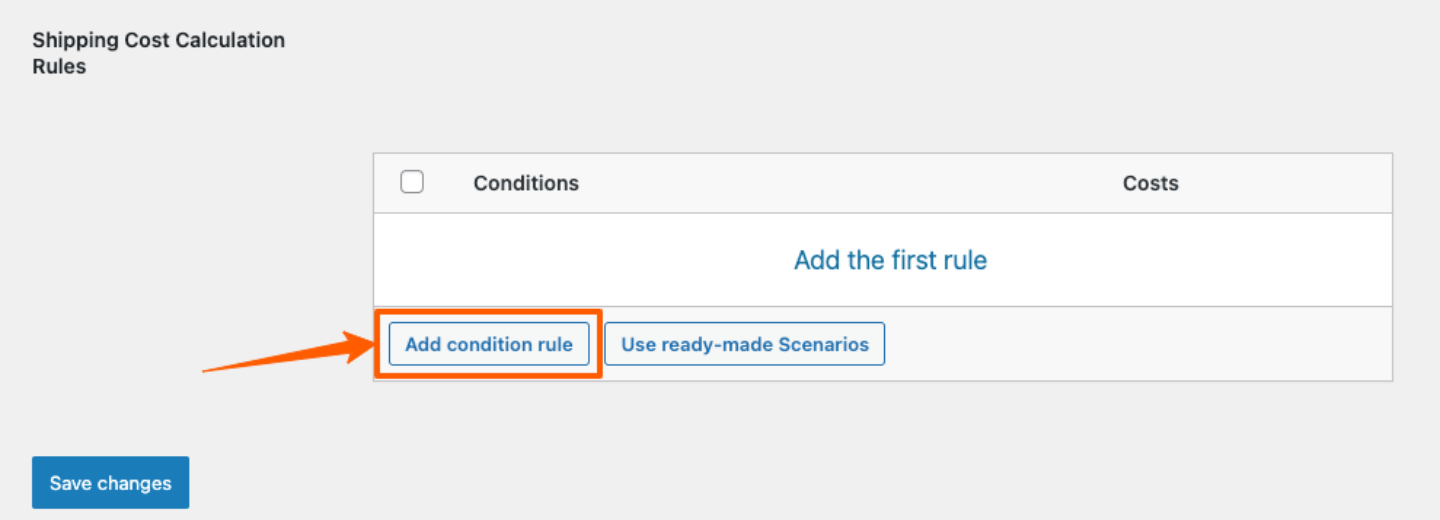

- Charge **$5 shipping** for orders in **Bangladesh, Zone number 13.**
- Charge a different shipping fee if the order **is not from Bangladesh, Zone number 13.**

Zone Based Shipping Condition

1. Go to Advanced Shipping Method Settings

Scroll down and you will get this option to add shipping cost calculation rules.

Click on the **Add condition rule** to set the price shipping condition for your WooCommerce store.

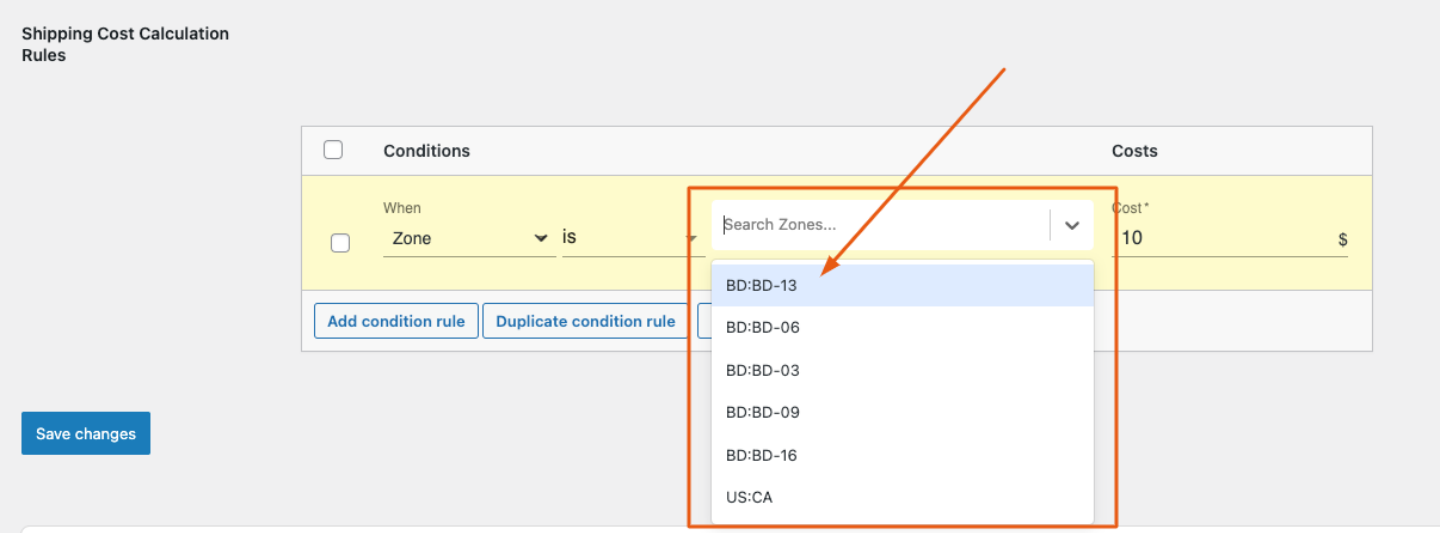

2. Now you can select "Zone" condition by clicking on "When" field.

Select “**is**” to meet the condition.

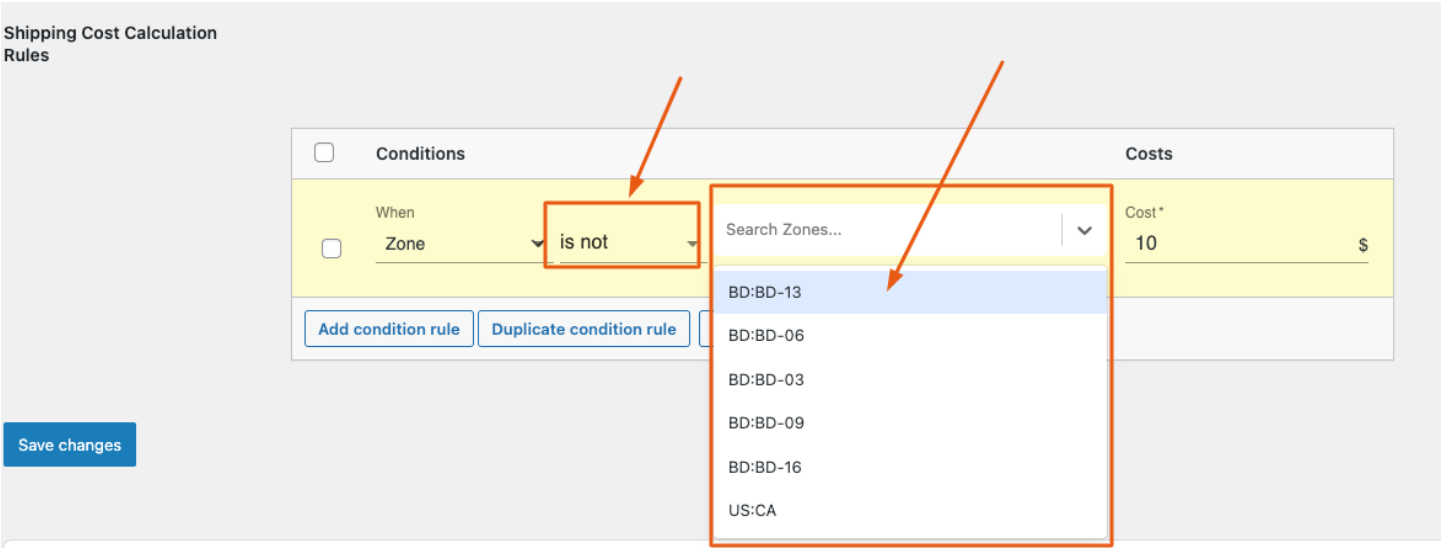

Now Select the **Zone** from the **Search Zones** dropdown and set the **Shipping Cost**

> ***Example 1:*** Lets set a Shipping Condition such that if there are any order to be delivered to **Bangladesh, Zone number 13**, there will be an additional $10 Shipping Charge added.

> ***Example 2:*** Lets set a Shipping Condition such that if there are any order to be delivered outside of **Bangladesh, Zone number 13**, there is will be an additional $20 Shipping Charge added.

Select “**Zone**“ condition by clicking on **When** field. Select “**is not**” to meet the condition. Select the **Zone** from the **Search Zones** dropdown and set the **Shipping Cost**

So, this is how easily you can set your zone based shipping conditions for your WooCommerce Stores.
