License Renewal for Product Feed Manager Pro

Upgrade To PFM Pro · https://rextheme.com/docs/renewal-and-upgrade-product-feed-manager-pro/

License keys are essential for activating and using the Product Feed Manager Pro plugin. This guide outlines the processes for renewing licenses and upgrading to different plans.

License Renewal Process:

We prioritize your experience by sending automated email reminders 30 days before your license expiration date. These notifications serve as a reminder of the auto-renewal of your license.

You can always renew your expired license, there is no hassle of activating your license key again. It will simply carry forward the old license.

To renew your expired license:

- Log in to Rextheme user account.
- Scroll down to 'Manage Your Subscription'.
- Click the 'Renew' button.
- It will take you to the checkout page.
- Pay the renewal amount and your subscription will be renewed.

That's how straightforward it is to renew your license.
