How to Replace Your WooCommerce Checkout Using Checkoutify – Checkout Customizer

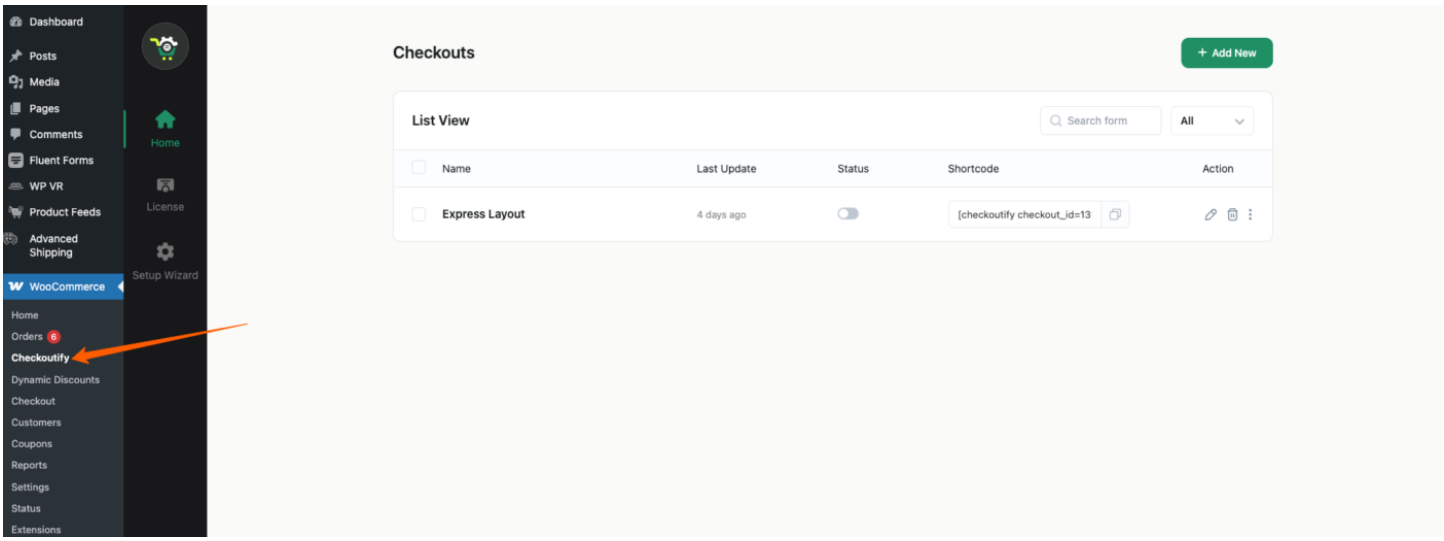

Getting Started · https://rextheme.com/docs/replace-woocommerce-checkout-using-checkoutify/

You can customize your WooCommerce checkout page easily with the help of Checkoutify - Checkout Customizer.

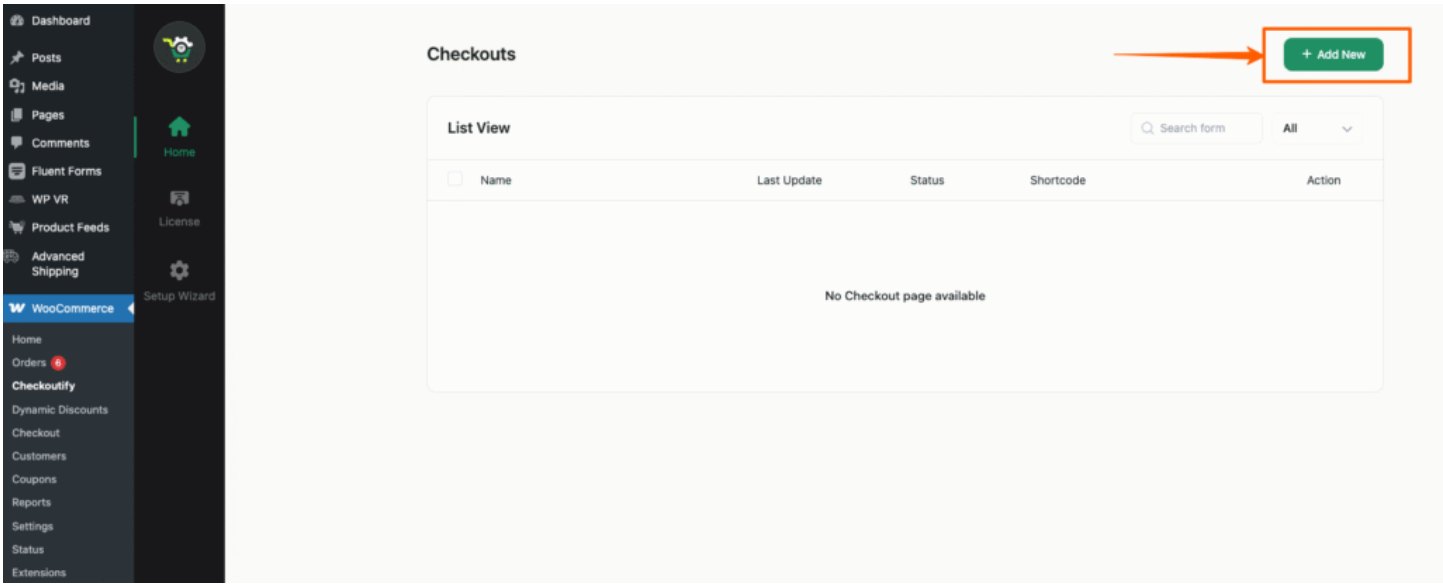

In this guide, you'll learn how to do that. Before starting make sure your WooCommerce is installed and activated.

Customize WooCommerce Checkout Page Using Checkoutify - Checkout Customizer

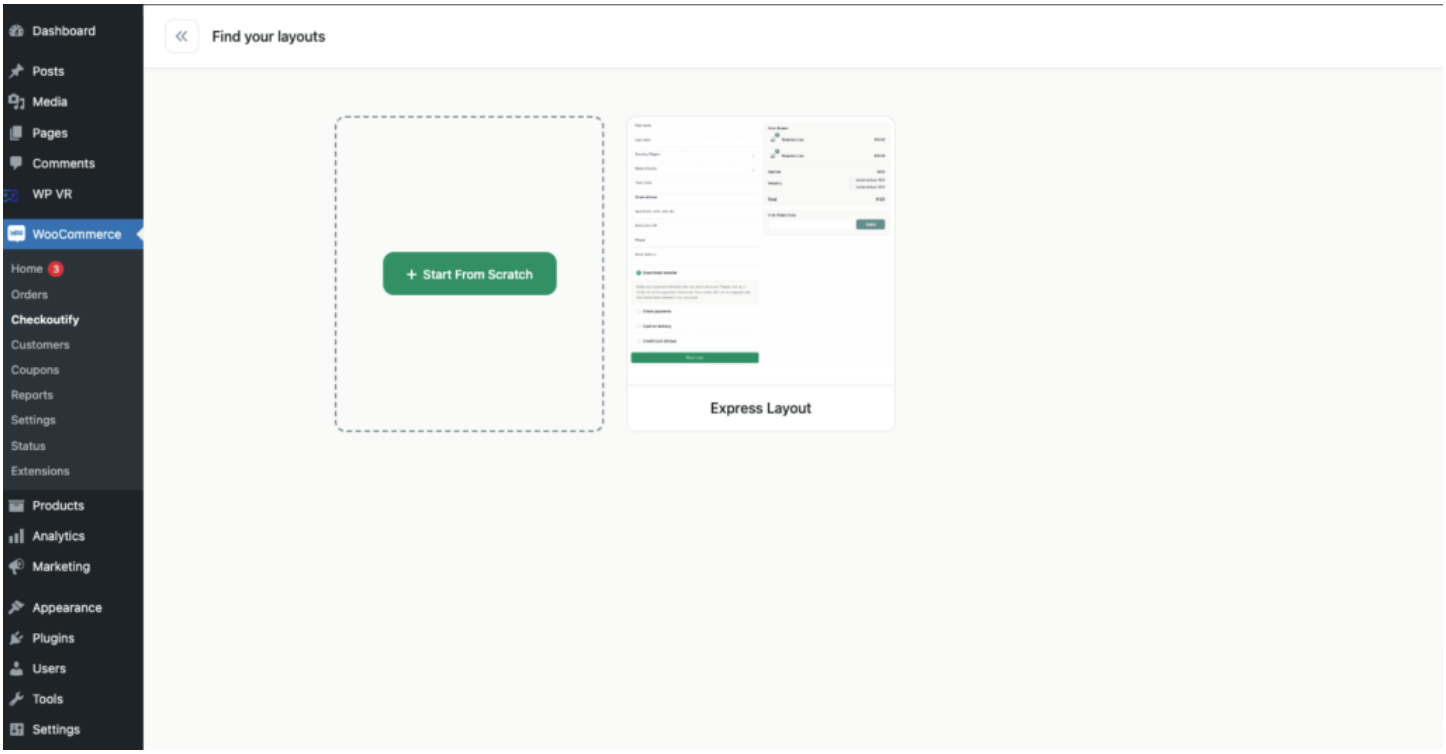

Step 1. Once Checkoutify Pro is activated, hover on WooCommerce in your WordPress dashboard and click on the Checkoutify tab. It will take you to the Checkoutify Dashboard.

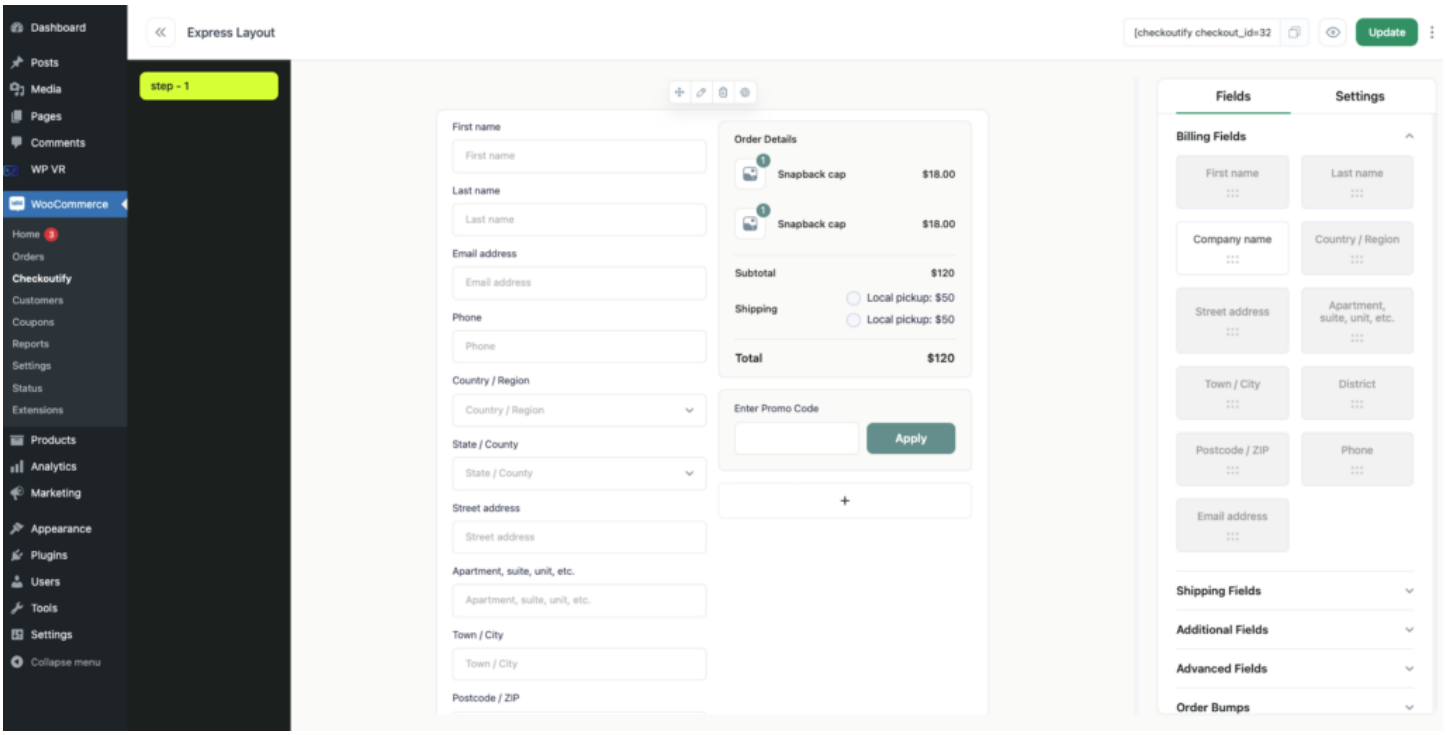

Step 2. Click on the **+ Add New** button.

Step 3. You'll be redirected to the **Find Your Layouts** page where you can choose the Layout.

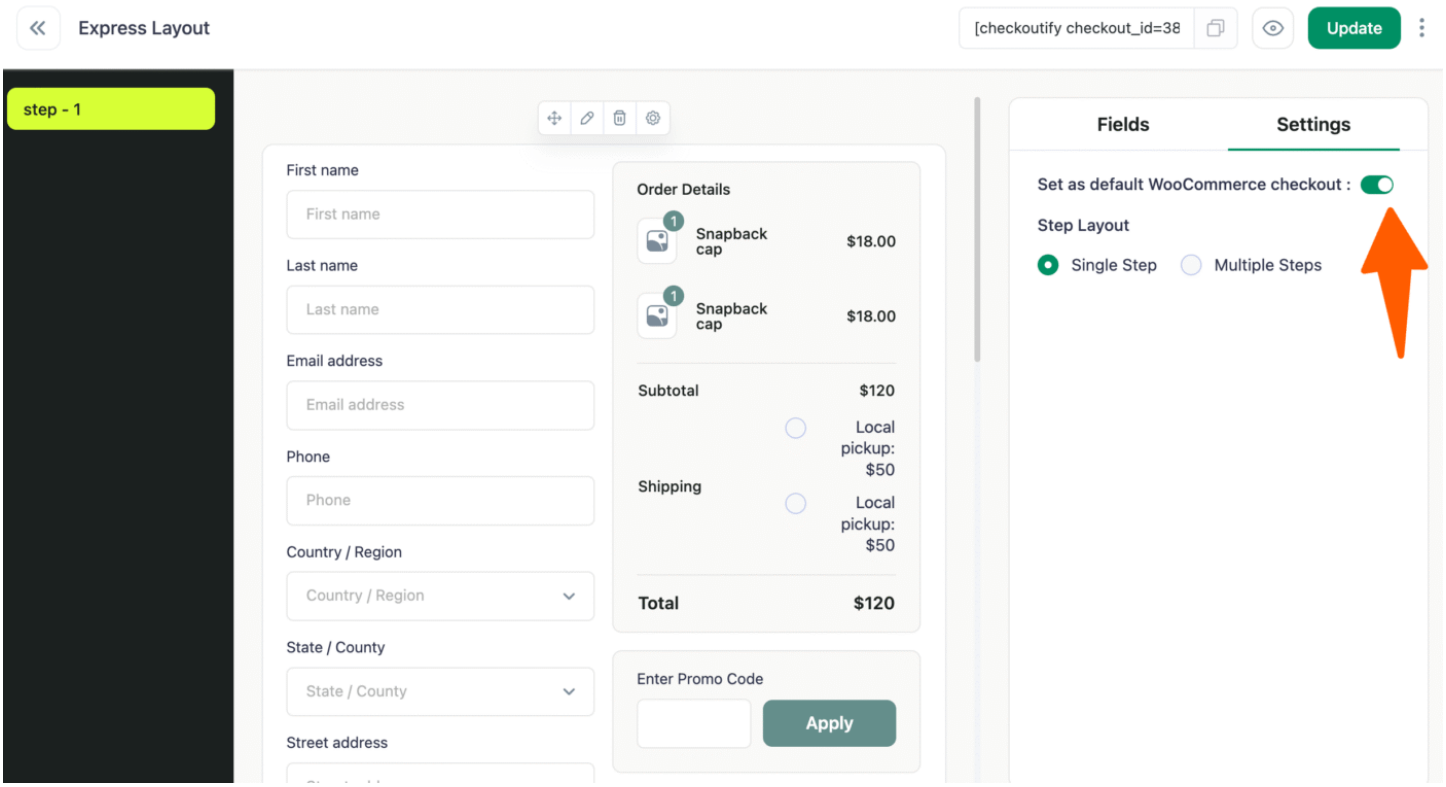

Step 4: Either you can **Start from Scratch** or **Select Layout**. Let's select **Express Layout** for now in this guide. After importing the **Express Layout** it will take you to edit the checkout page.

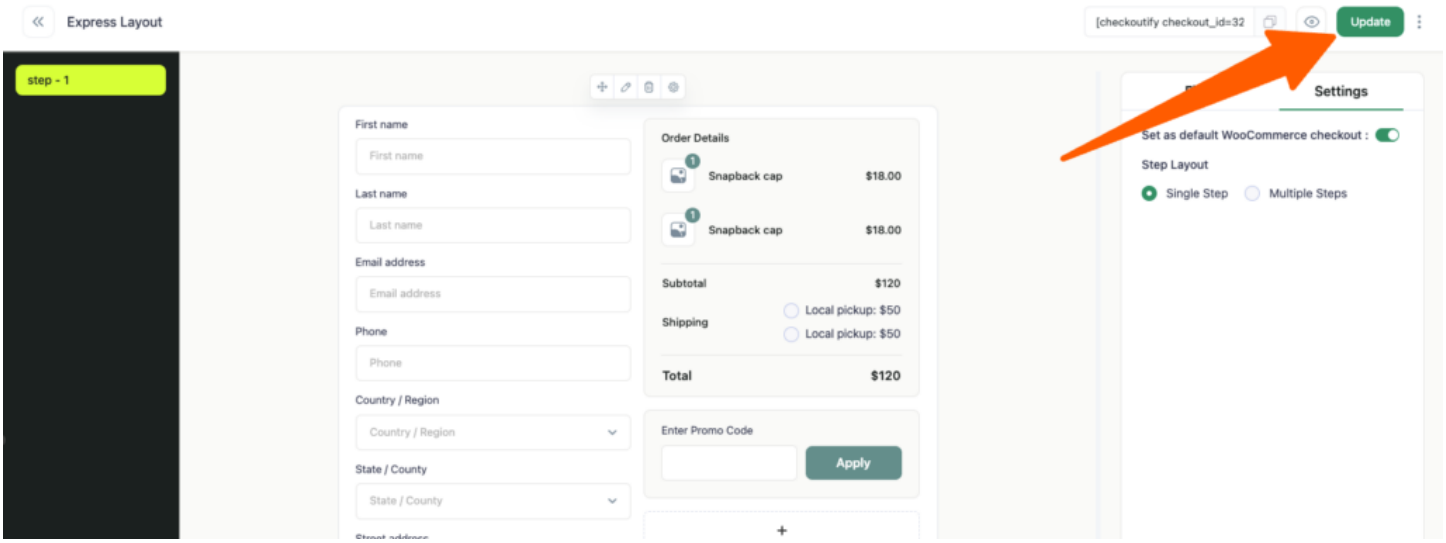

From here you can customize the checkout page as per your need.

Step 5: Once the editing is completed go to the **Settings** tab and enable the option 'Set as default WooCommerce checkout'.

Step 6: Now click on the **Update** button and that's it.

Now if you go to the WooCommerce **Checkout page** you'll see that your customized checkout has been added.
