How To Add Background Music To Virtual Tours

Advanced Settings for Virtual Tours · https://rextheme.com/docs/wp-vr-add-background-music-virtual-tours/

Adding background music to a virtual tour is a great way to let visitors enjoy the tour.

You may play soothing background music or play informative audio about the place while a person takes the tour.

This is a great way to connect with the visitor and often create more engagements.

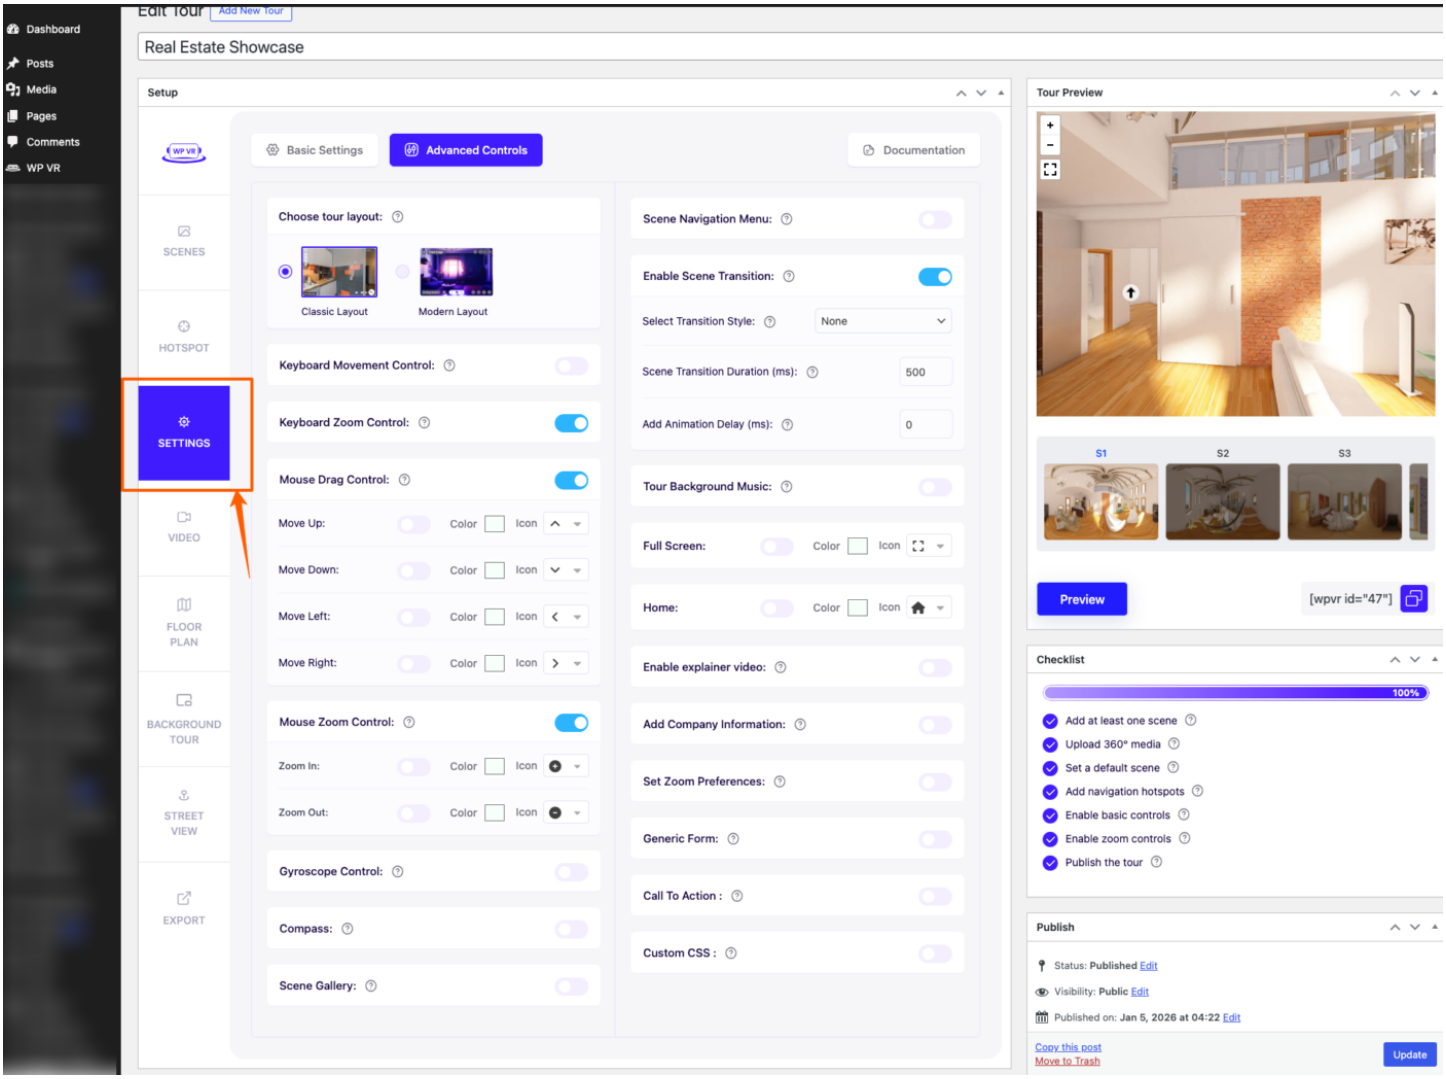

Here’s an example of a demo tour with background music:

Embedded media: https://showcase.rextheme.com/?embed_page=243

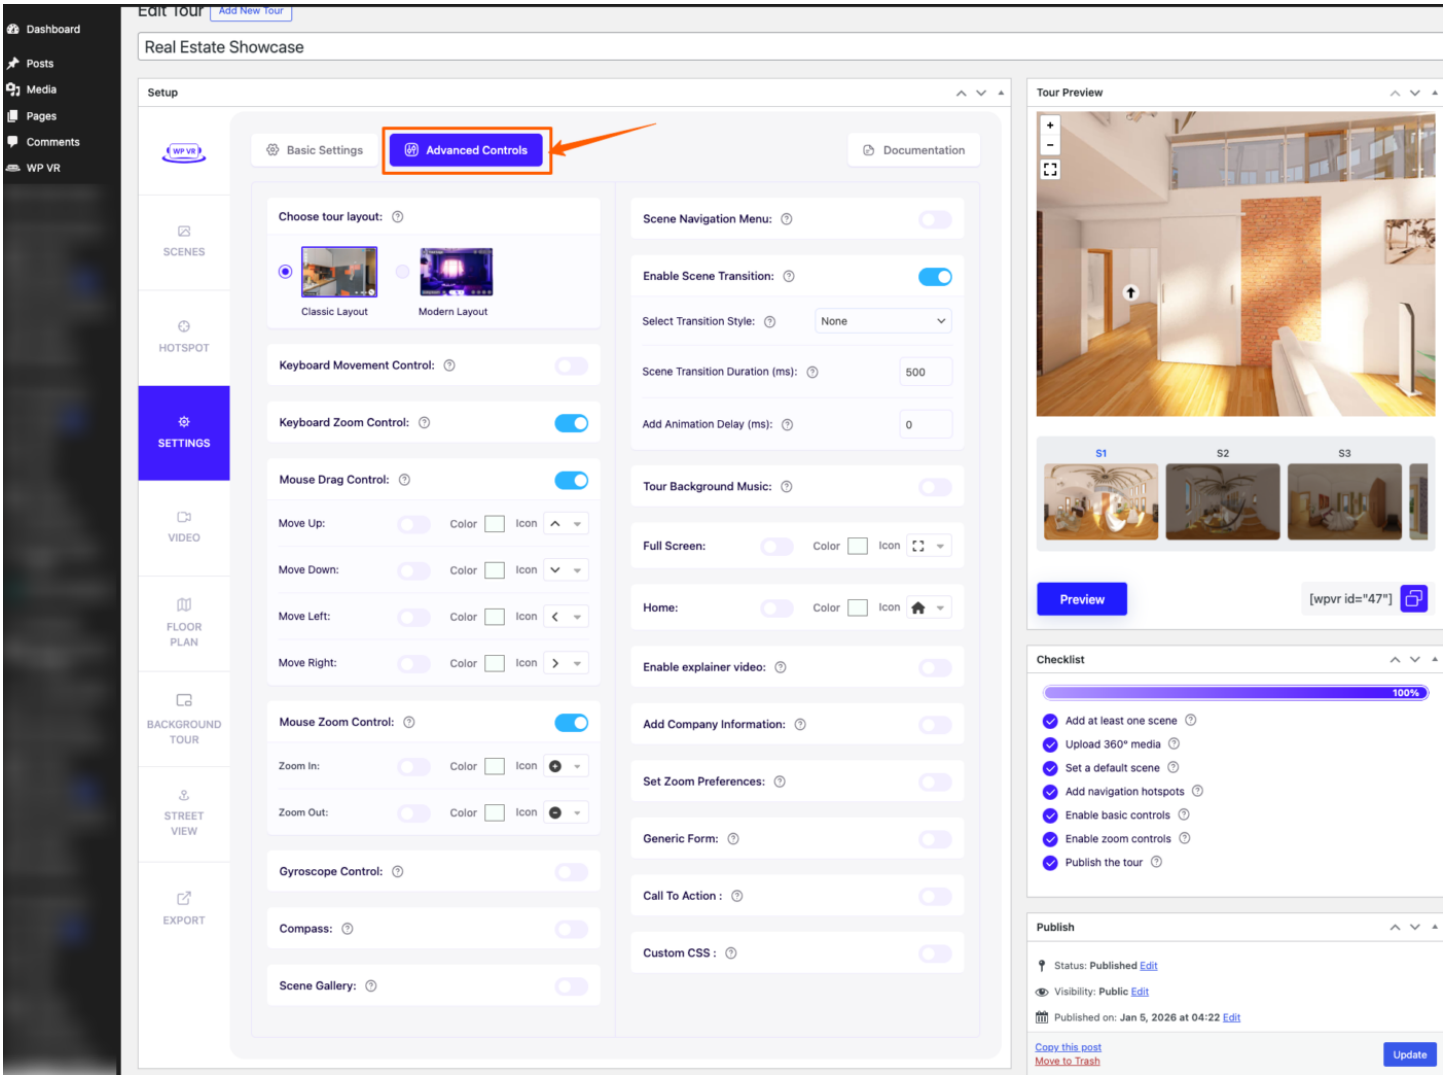

Here are the steps to follow to add background audio to your virtual tour using WPVR.

Adding A Background Music To A Virtual Tour

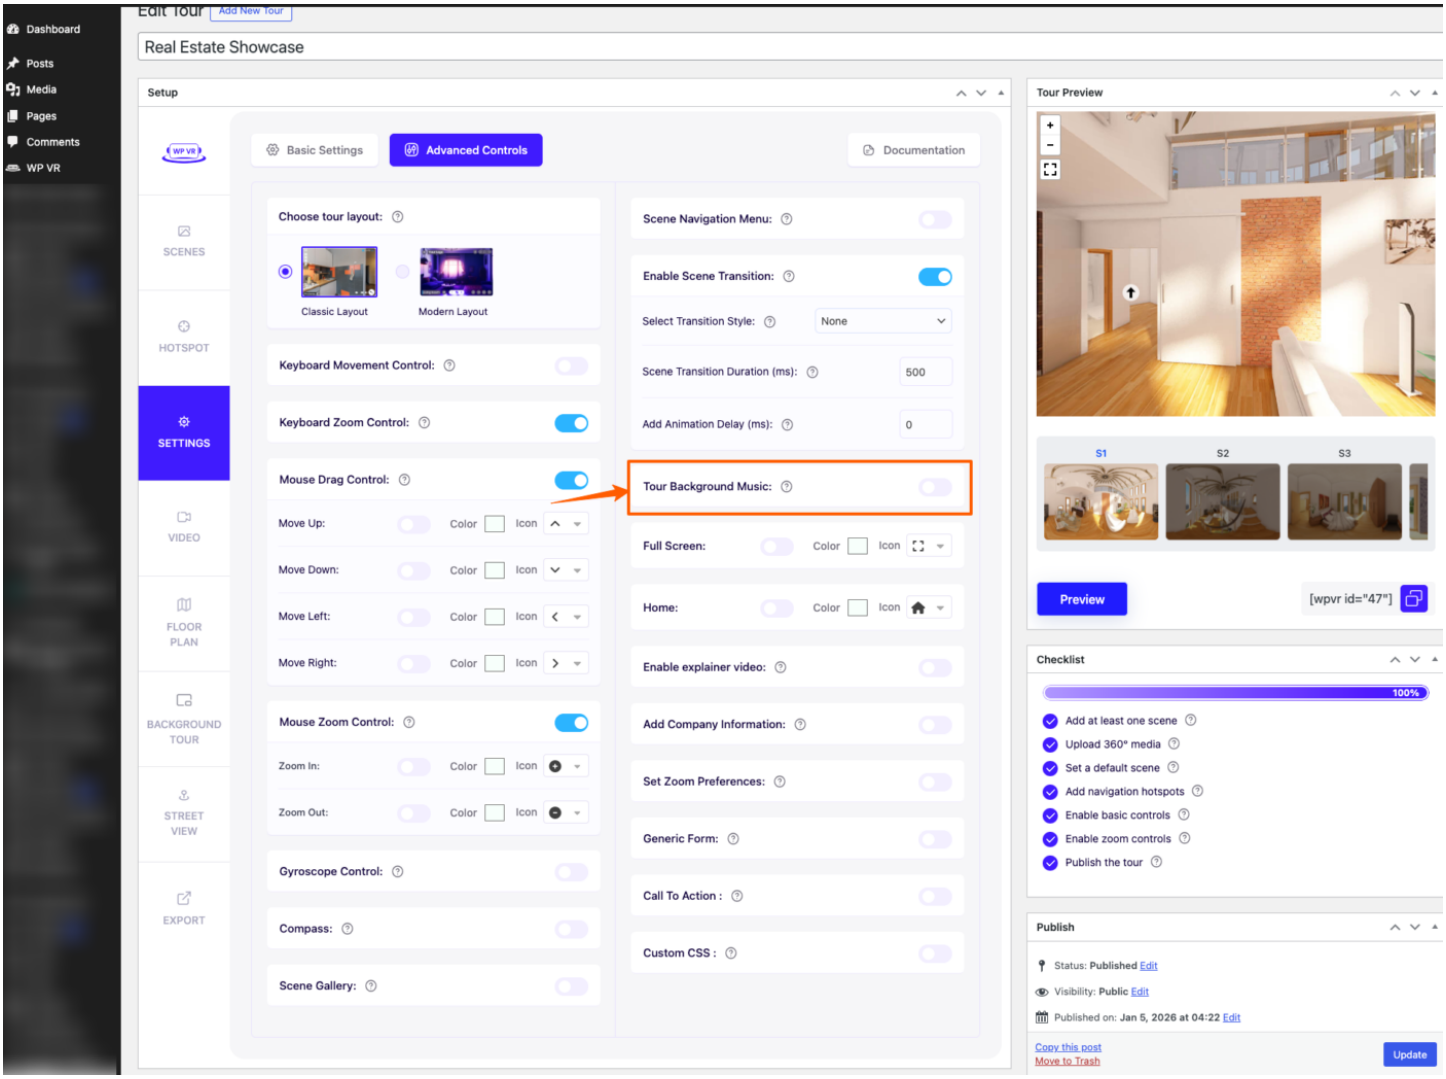

01. Edit or create a new tour. Go to **Wordpress Dashboard > Select your Tour > Settings**

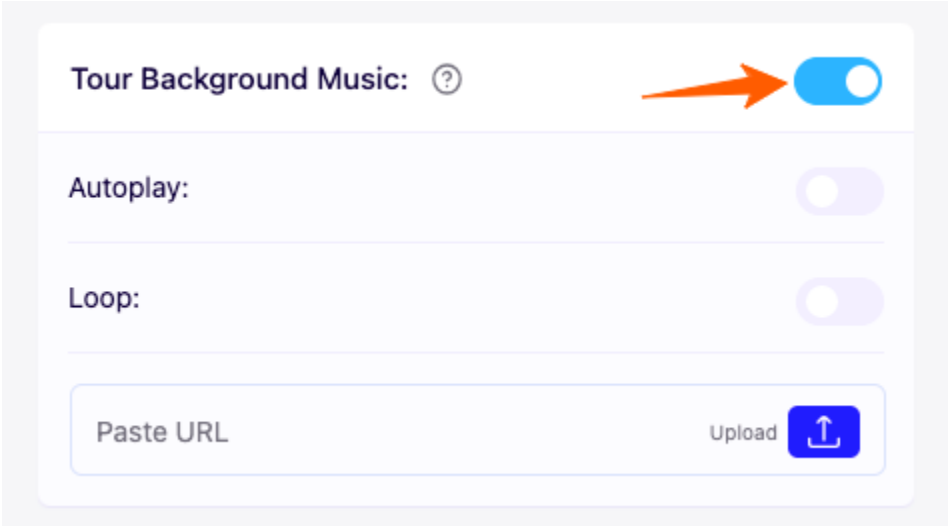

02. On top, click on the **Advanced Controls** tab.

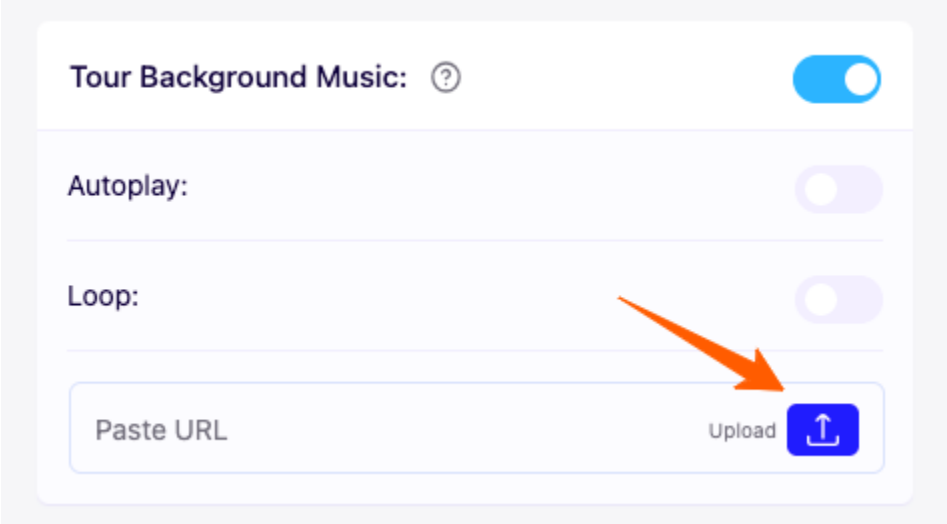

03. On the right side, you will find the option called **Tour Background Music**.

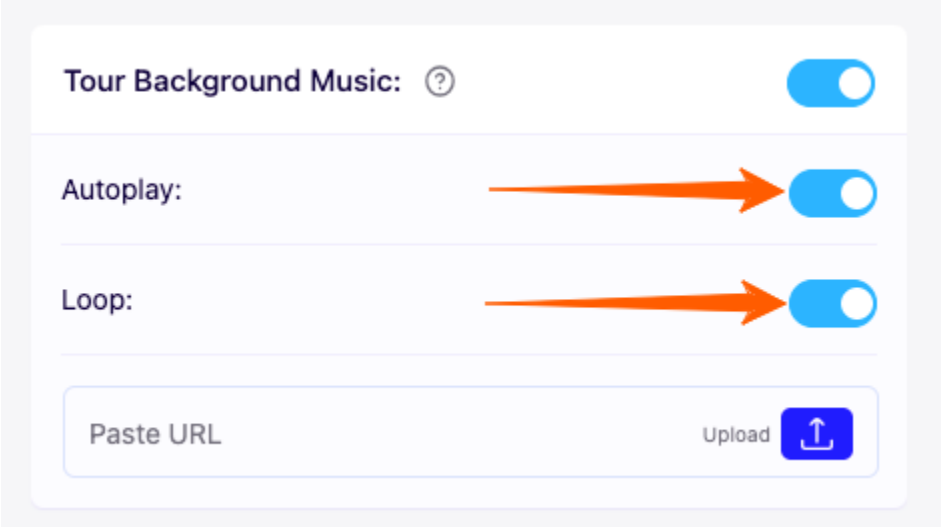

04. Once you enable it, you will get further options called **Autoplay**, **Loop**, and **Upload or Set Audio Link**.

05. Click on the blue button under **Upload** or **Set Audio Link** to upload an audio file.

06. Once you upload the music, you can then choose if you want it to enable **Autoplay** and **Loop**.

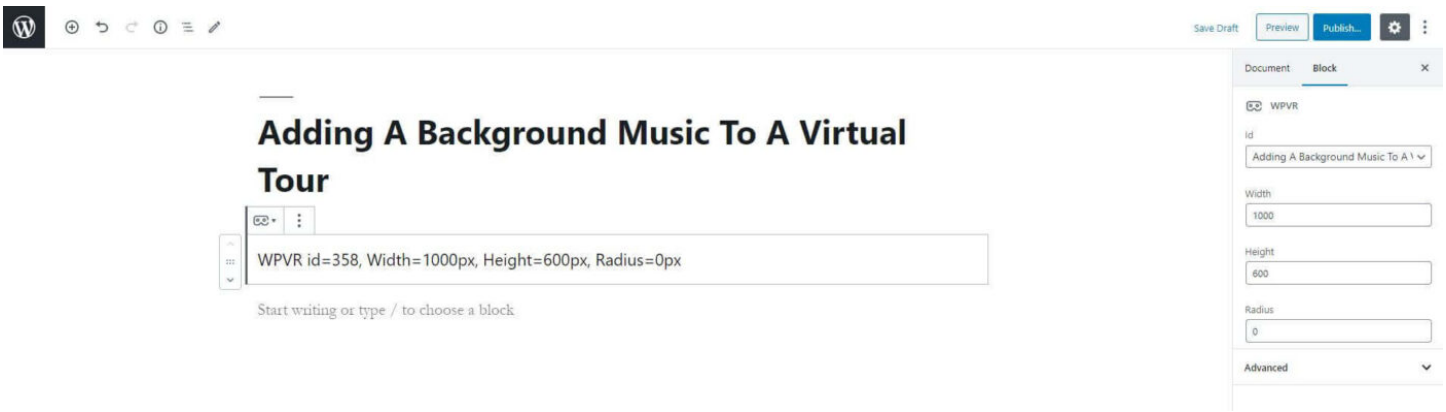

- **Autoplay**

  Enabling it will mean that the music will start playing automatically, the moment the tour loads.

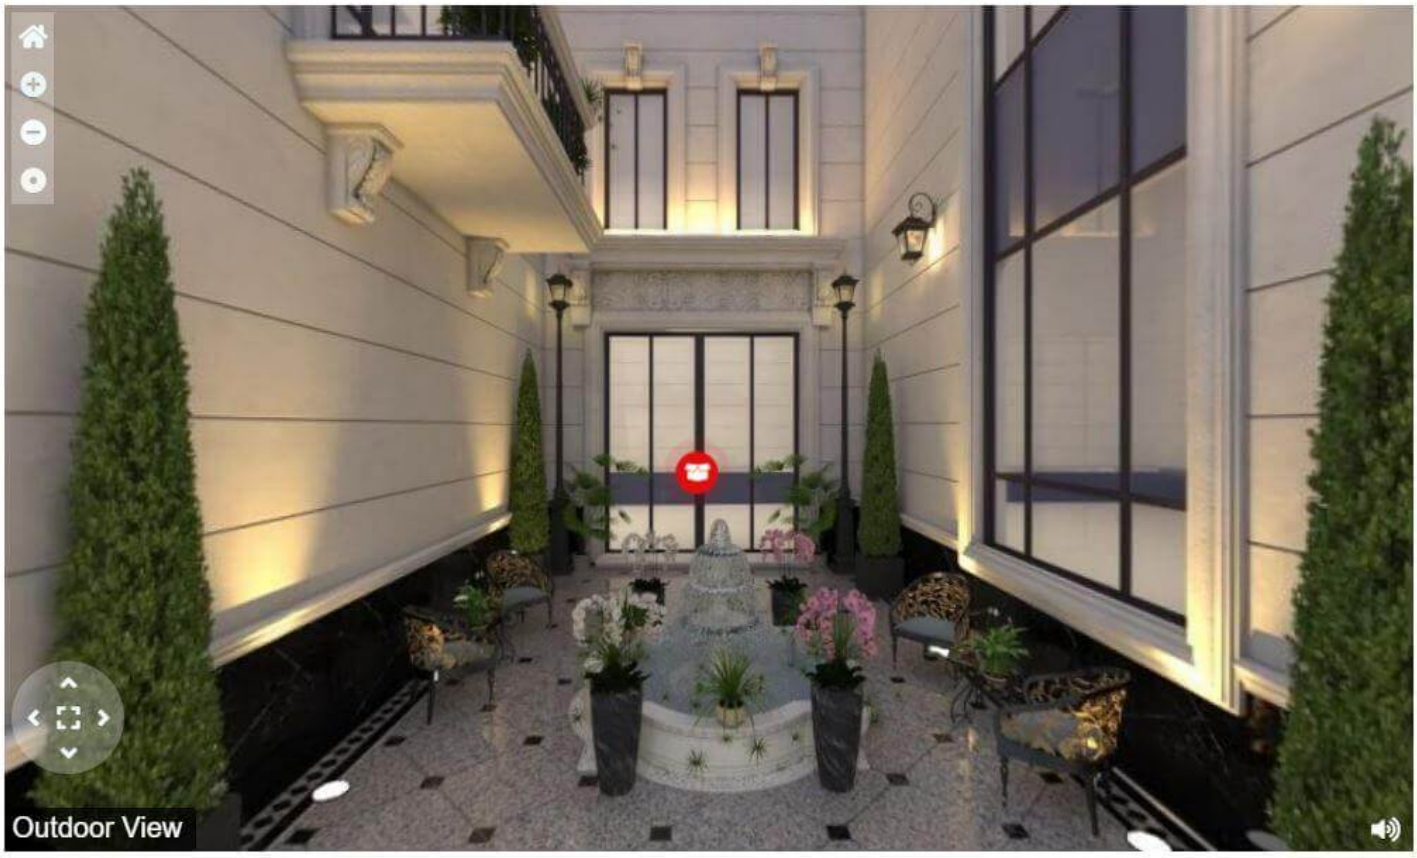

- **Loop**

  Enabling it will mean that if the music has playing for it's full length, it will start playing again from the beginning.

07. Once you have set the background music, next publish the tour, and embed it on a post/page.

08. On the tour you will find an Audio button on the bottom left corner.

If you have enabled **Autoplay**, then clicking on this icon will pause the music. And clicking on it again will resume it.

If you did not enable **Autoplay**, a person will have to click on this icon to start playing the music.

That's it. You can now easily add background music to any of your virtual tours.
