How To Duplicate A Virtual Tour

Import, Export, & Duplicate Virtual Tours · https://rextheme.com/docs/wp-vr-duplicate-a-virtual-tour/

Are you using **WP VR** – the leading 360° panorama and virtual tour builder plugin for WordPress – and need to create copies of your existing tours quickly? Duplicating a virtual tour in WP VR is incredibly simple and takes just a few clicks. This feature is perfect for making variations of your immersive 360-degree experiences without starting from scratch.

Whether you're managing real estate virtual tours, hotel walkthroughs, product showcases, or any interactive 360 panoramic content, **cloning a WP VR tour** saves hours of work. Available in both the free and pro versions, this one-click duplicate tool creates an exact copy with a new tour ID, ready for customization.

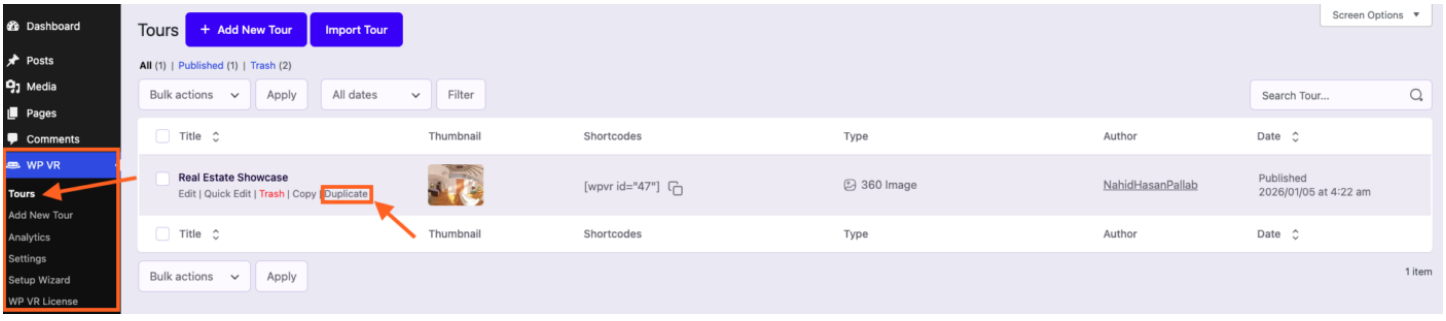

Why Duplicate Virtual Tours in WP VR?

- **Save Time:** Reuse complex setups with multiple scenes, hotspots, and custom controls.
- **Create Variations:** Easily modify a base tour for different pages, clients, or seasonal updates.
- **Test Changes Safely:** Experiment with new hotspots, backgrounds, or VR settings without affecting the original.

You can easily duplicate any published WP VR virtual tour in just a few clicks.

1. Go to **Dashboard** > **WPVR** > **Tours**.

Here, you will find all tours you have created listed on one place.

2. Hover the mouse on the tour you want to duplicate, and you will see a **duplicate** button.

3. Click on it. A duplicate tour will be created and you will be taken to the edit mode of that tour with a new tour Id.

4. You can now make changes if you want, and then publish it and embed it on any page or post.

That's it.
